PROFESSIONAL EXPERIENCE

Business Analyst | Product Owner

FinIQ Consulting Pvt. Ltd. | Jan 2020 - Dec 2025

- Managed and prioritized product backlogs containing 100+ user stories across multiple releases, ensuring alignment with business objectives and delivery timelines.
- Collaborated with Product Managers, Business Stakeholders, Operations Teams, and Technology Teams to define product vision, roadmap, feature prioritization, and delivery objectives.
- Delivered 6+ implementation and transformation projects across Structured Products, Equities, FX Trading, Securities Processing, and Trade Lifecycle Management platforms.
- Led requirement gathering workshops, stakeholder interviews, brainstorming sessions, and process walkthroughs to define solution scope and business requirements.
- Facilitated Agile ceremonies including Sprint Planning, Backlog Grooming, Sprint Reviews, Retrospectives, and Stakeholder Demonstrations.
- Created BRDs, FRDs, Functional Specifications, User Stories, Acceptance Criteria, Process Flows, Data Mapping Documents, and Release Documentation.
- Conducted AS-IS / TO-BE analysis, impact assessment, and gap analysis supporting digital transformation initiatives.
- Worked closely with Front Office, Middle Office, Back Office, Operations, Compliance, and Technology teams to ensure successful project delivery.
- Managed UAT planning, execution, stakeholder sign-offs, Go-Live activities, and post-production support.
- Performed SQL-based data analysis and API analysis using Postman and Swagger to validate business rules, trade workflows, and integration requirements.

T24 & STP Enhancements

- Led business analysis activities for T24 STP enhancements supporting global banking clients.
- Defined business rules, transformation logic, and trade data mapping between upstream trading platforms and downstream settlement systems.
- Improved settlement automation and reduced manual intervention across trade lifecycle workflows.
- Supported end-to-end validation of trade capture, enrichment, settlement, reconciliation, and reporting processes.

Business Analyst | Application Consultant

FinIQConsulting Pvt. Ltd. | Jan 2017 - Dec 2019

- Gathered, analyzed, and documented business and functional requirements for Capital Markets, Wealth Management, and Structured Products platforms.
- Prepared BRDs, FRDs, Functional Specifications, Use Cases, Process Flows, Data Mapping Documents, and RTMs.
- Performed impact analysis, feasibility assessments, and solution evaluations supporting strategic business initiatives.
- Supported API integrations, trade processing workflows, settlement automation, and securities processing enhancements.
- Coordinated UAT activities and facilitated business sign-offs for successful project deployments.
- Served as the primary liaison between business stakeholders, product teams, development teams, and QA teams throughout the SDLC.
- Contributed to successful delivery of multiple client implementations across Structured Notes, Equities Trading, FX Trading, and Securities Processing platforms.

Quality Analyst

FinIQConsulting Pvt. Ltd. | Jun 2015 - Dec 2016

- Executed regression, smoke, functional, and end-to-end testing for Capital Markets applications.
- Performed SQL-based backend validation to ensure data accuracy and settlement flow consistency.
- Conducted API and manual testing activities across multiple releases.
- Collaborated with Business Analysts, Developers, and Product Teams to validate requirements and improve release quality.

KEY PROJECTS

- **EQ-Connect SN – Standard Chartered Bank:** Led business analysis activities for EQ Connect v4.7 upgrades and T24 STP enhancements. Defined business rules, trade data mapping, workflow specifications, and settlement automation requirements.
- **Pictet:** Gathered and analyzed requirements for API-driven equities order placement and execution workflows. Defined business rules supporting trade execution and post-trade processing.
- **OCBC:** Supported requirement analysis, workflow design, exception management, and compliance reporting initiatives.
- **BOS:** Defined end-to-end trade lifecycle workflows supporting FX Spot and Forward trading solutions.
- **Mashreq:** Supported Corporate Actions processing involving dividends, bonus issues, rights issues, and mandatory events.
- **DocGen:** Led requirement analysis and implementation of automated term sheet generation capabilities. Reduced manual effort and improved operational efficiency through document automation.
- **1FinIQ | CADB:** Supported functional analysis and requirements gathering for Notes, OTC Products, Bonds, and Insurance workflows.
