EDUCATION

B.Tech in Computer
Science & Engineering,
Jawaharlal Nehru
Technological University

SKILLS

Automation Tools:

Microsoft Power Apps,
Power Automate,
Dataverse, AI Builder,
Copilot Studio, Blue Prism, Graph API
UiPath, AWS, Grafana,
Kibana, Jenkins, Ansible,
YAML

Cloud Integration: Dell
Boomi

Databases: SQL Server

Programming: C#, Python

IDE: SSMS, Visual Studio,
VS Code

Collaboration Tools: JIRA,
Confluence, ServiceNow,
Git

Maheswara Reddy S

RPA | Power Apps & Automation Solutions

Experienced IT professional with 10+ years in software engineering, specializing in Robotic Process Automation (RPA) with 6+ years of hands-on implementation on Power Apps, Power Automate, Dataverse, AI Builder, Copilot Studio, Blue Prism and UiPath. Proven expertise in team leadership, solution design, and process automation across diverse industries. Skilled in DevOps practices (Ansible Ops), cloud integration (Dell Boomi), and observability solutions (Grafana, Kibana). Adept at designing scalable automation frameworks, conducting feasibility assessments, and delivering high-quality solutions under tight deadlines.

EXPERIENCE

PLATFORM ENGINEER | State Street Corporation (May 2023 – Till Date)

- Designed advanced low-code solutions using Power Apps (canvas & model-driven) with Dataverse as the core data platform, improving process efficiency and data reliability.
- Developed end-to-end automation pipelines combining Power Automate, Dataverse, and custom connectors to integrate with enterprise systems.
- Can implement AI-driven workflows using AI Builder and conversational automation and virtual agents using copilot studio.
- Designed and implemented health checks across applications using Blue Prism
- Designed and automated enterprise workflows using Power Automate, including integrations with internal applications and cloud services
- Built observability dashboards in Grafana for cutover services in AWS with automated alerting
- Developed automation-as-a-service (AaaS) health checks using Ansible Tower
- Created Linux/Windows jump servers in AWS using YAML, Jenkins, and Ansible
- Led code reviews, deployments, and production support

SYSTEMS DEVELOPER 2 | Thermo Fisher Scientific (May 2020 – May 2023)

- Built scalable business applications using Power Apps and Dataverse to support clinical data and operational workflows.
- Automated clinical data processes with Blue Prism, UI Path and Power Automate
- Integrated Veeva Vault with APIs for large file uploads/downloads
- Built automation for AR Aging reports, SOP synchronization, and Cherwell ticketing

Certifications

→ AWS Cloud Practitioner
Certified

→ Blue Prism Solution
Designer

→ Blue Prism
Developer

→ UiPath Advance
Certified

→ Dell Boomi Associate
Developer

Other Details

Language known

→ English, Telugu and
Hindi

- Collaborated with business teams for requirement gathering and documentation (PDD, SDD, Runbooks)
- Conducted code reviews, migrations, and production bug fixes

RPA DEVELOPER | NTT DATA (Apr 2019 – May 2020)

- Automated FedEx shipping and dealer information processes using Blue Prism and UiPath
- Streamlined SAP and mainframe processes for spare parts forecasting of an automobile manufacturer
- Designed custom codes for Excel handling and reporting
- Supported production processes and collaborated with clients in Agile environments

SENIOR SOFTWARE ENGINEER | Tech Mahindra Ltd. (Dec 2017 – Mar 2019)

- Automated daily execution and RCA processes using Blue Prism
- Delivered customer billing and subscription reports via Linux scripts
- Acted as Business Analyst for requirement gathering and feasibility analysis
- Provided best practices for performance optimization

SOFTWARE ENGINEER | Ventois Software Solutions (Oct 2014 – Dec 2017)

- Developed marine insurance automation solutions using Blue Prism
- Created feasibility analysis reports and requirement documents
- Delivered end-to-end SDLC implementations
- Created visual metrics using Tableau for stunning representations
