🌐 [Linkedin](#)

A highly skilled and Seasoned Data Engineer with 5 years of experience specializing in resilient data architecture and modernization. Deep expertise in transforming complex data challenges into robust, real-time solutions, leveraging Apache Spark for high-throughput processing. Proficient across major cloud platforms including AWS and Azure, Skilled in Python and SQL for development, coupled with DevOps practices to ensure continuous integration and deployment of critical data platforms.

SKILLS

- Big Data Frameworks - Apache Spark, PySpark, Scala Spark, Hadoop (HDFS, Hive).
- Languages - Python, Scala, SQL (Advanced), Bash, Shell, Java, Javascript.
- Cloud Computing - AWS (S3, Athena, RDS, EC2, EMR), Azure (ADLS, Databricks, Synapse), GCP (BigQuery, Dataflow)
- Workflow Orchestration - Apache Airflow, DevOps & CI/CD, Docker, Grafana, PostgreSQL, MySQL, Kubernetes, GitLab.

WORK EXPERIENCE

Nielsen Media | 2024 - Current | Senior Data Engineer

Tech Stack - Pyspark, Scala, AWS S3, RDS, EC2, SQS, Airflow, Sql, Postgress, Kubernetes, Docker

- **Led the end-to-end migration** of a legacy on-premise data project to **AWS**, leveraging **Scala and Spark** to improve system scalability and performance, ensuring a seamless decommissioning of old hardware.
- **Engineered Big Data Solutions:** Designed, implemented, and optimized high-performance ETL/ELT data pipelines responsible for processing Terabyte-scale digital advertising campaign data, ensuring accurate measurement and reporting.
- **Workflow Orchestration:** Managed and maintained over 45 mission-critical data workflows using Apache Airflow, dramatically improving process reliability and reducing manual intervention.
- **Data Modeling & Persistence:** Developed robust analytical data models in Scala Spark and managed production PostgreSQL instances, tuning schemas and queries to maximize retrieval efficiency for downstream Apps.
- **Automated Delivery:** Implemented and managed CI/CD pipelines via GitLab, automating code testing and deployment to accelerate release cycles and enforce high standards of code quality.

PriceWaterHouse Copper (PWC) | 2022-2024 | Senior Consultant DE | Client Adobe

Tech Stack - Pyspark, Scala, MySQL, Azure Databricks, Airflow, Shell Scripting, Delta Lake, Grafana

- **Product Analytics & Insights:** Engineered a comprehensive **"Top Pages" ETL pipeline that** transformed raw granular data into actionable product insights; enabled the Product team **to identify high-conversion user journeys and optimize page performance.**
- **Managed the end-to-end data pipeline** for the Adobe Main Home Page, processing petabyte-scale click-level data that was initially streamed in real-time and then consumed for complex batch analytics and reporting..
- **Migrated Adobe's On Premise Data from Hadoop to Spark** and later migrated to Azure Cloud.
- Collaborated closely with data scientists to operationalize deeper insight in production pipelines. Communicated technical concepts effectively to stakeholders, ensuring alignment of data engineering efforts with business objectives.

Tata Consultancy Services (TCS) | 2021-2022| Data Engineer | Client RBI

Tech Stack - Pyspark, Scala, MySQL, Hadoop, Hive, Ozzie, Shell Scripting, Talend

- **Designed and implemented scalable ETL pipelines** using Talend, PySpark, and SQL to process and integrate Banking Data from across the country.
- Utilized **Talend Data Integration Studio** to design and deploy complex ETL jobs, ensuring efficient data extraction, transformation, and loading processes. Developed custom components and reusable templates to streamline development.
- **Migrated Data from RDBMS servers to On Prem Hadoop Ecosystem.**

EDUCATION

- BACHERLOR OF ENGINEERING IN COMPUTER SCIENCE | 2016-2020
SHAH AND ANCHOR KUTCHHI ENGINEERING COLLEGE
