

MANISH SINGH THAKUR

Senior Business Analyst | BFSI & Capital Markets

Hnnmanish.thakur9187@gmail.com | +91 7999516812 | Pune, Maharashtra, India

PROFESSIONAL SUMMARY

Results-driven Senior Business Analyst with 13+ years of BFSI experience specialising in trade surveillance, corporate actions, fixed income, derivatives, and regulatory compliance across Tier-1 investment banks (HSBC, UBS, BNY Mellon). Proven track record in reducing manual processing time, improving data quality, and delivering large-scale surveillance model rollouts end-to-end. Proficient in Agile/Scrum, SAFe, SQL, XML/JSON data transformation, Dremio, Cucumber BDD, and ELK Stack monitoring. Skilled at bridging business stakeholders and technology teams to deliver measurable, compliance-aligned outcomes under MiFID II, MAR, and EMIR frameworks.

CORE COMPETENCIES

- Requirements Gathering & Documentation (BRD, FRD, User Stories, Acceptance Criteria)
- Trade & Market Surveillance | Market Abuse Regulatory Compliance (MiFID II, MAR, EMIR)
- Data Discovery, Feed Onboarding, Data Governance & Quality Management
- Corporate Actions Processing — Mandatory & Voluntary (DTC, Bloomberg, SWIFT MT/MX)
- Derivatives, Fixed Income & Repo Trade Lifecycle (IRS, CDS, TRS, Currency Swaps)
- Agile / Scrum / SAFe PI Planning / Waterfall / LEAN Methodologies
- Stakeholder Management — Cross-functional & Global (UK, USA, Zurich)
- UAT, SIT, Functional Testing, Regression Testing & Test Case Preparation
- SQL, PySpark, Dremio, Cucumber / Gherkin BDD
- XML / JSON / FpML Parsing & Data Transformation | ELK Stack Dashboard Monitoring
- JIRA, Confluence, ServiceNow, Figma, Balsamiq

PROFESSIONAL EXPERIENCE

Lead Business Analyst | Synechron Pvt Ltd (Client: HSBC)

Pune, India | Feb 2024 – Apr 2026

Surveillance Data Factory (SDF) — Data Pod | Trade & Market Surveillance

- Led end-to-end feed onboarding for 10+ trade surveillance models, owning data discovery, XML-to-tabular field mapping, and feed completeness governance — reducing new model onboarding cycle time by ~30%.
- Authored and maintained BRDs, XML-to-2D mapping specifications, SLA matrices, and UAT test plans; served as single point of contact between the Data Pod and MARS (model execution) teams, cutting requirements rework by 40%.
- Defined and enforced data quality and completeness rules across PTS to DSL to tabular pipeline, proactively identifying and resolving feed gaps before model execution — improving upstream data accuracy by ~25%.
- Designed and maintained ELK Stack (Elasticsearch, Kibana) dashboards to monitor feed SLAs in real time, enabling detection and resolution of 95%+ of feed failures within agreed SLA windows.
- Facilitated Agile ceremonies (daily stand-ups, sprint planning, backlog refinement, retrospectives) across a cross-functional team of 12, consistently delivering sprint goals with fewer than 5% story carry-overs.
- Built and maintained a Cucumber BDD regression suite validating surveillance model outputs post-release, reducing post-deployment defects by ~35% over two release cycles.
- Collaborated with global stakeholders across UK, US, and Asia on product roadmap prioritisation and regulatory alignment under MAR and MiFID II surveillance obligations.

Business Analyst | UBS Business Solutions

Pune, India | Jul 2019 – Jul 2023

Swiss Booking Centre | Mandatory Corporate Actions | On-site exposure in Zurich

- Managed mandatory corporate action processing for UBS Swiss booking centre, achieving 99.5%+ event accuracy and on-time notification SLA across equity, fixed income, and structured product events.

- Identified that ~55% of client notifications were dispatched late (Project Mount Everest / CAIP Renewal); led cross-functional process reengineering to release notifications within 24 hours of SWIFT receipt, directly reducing client-impacting breaks.
- Delivered a SharePoint automation initiative cutting payment processing downtime from 120 minutes to under 30 minutes, saving approximately 5 hours of manual effort per month with zero impact on service levels (LEAN project).
- Received formal recognition from the Managing Director for a robotics/automation solution subsequently scaled across multiple teams due to its reusability.
- Performed root-cause analysis on reconciliation breaks across SWIFT message flows and desktop data feeds; reduced recurring break volume by implementing targeted data validation controls.
- Delivered full BA lifecycle across multiple change requests: requirements elicitation, BRD/FRD authoring, UI mock-ups (Figma), feasibility and impact analysis, UAT coordination, and post-implementation sign-off.
- Gained on-site experience in Zurich managing mandatory corporate actions and income events, strengthening cross-border operational knowledge for the Swiss booking centre.

Business Analyst — Corporate Actions | BNY Mellon India International Operations Pvt Ltd

Pune, India | Dec 2012 – Jul 2019

RAW Team | Custody & Corporate Actions

- Notified and processed mandatory and voluntary corporate events (DTC, Bloomberg) for US and global custody clients with a 99.9% accuracy target; consistently achieved SLA in a high-volume, deadline-driven environment.
- Ran three time-critical intraday reports (DTC Announcement, Bloomberg Global, DTC Update) to capture new events and updates, ensuring zero missed announcements across the client portfolio.
- Contributed as BA on the CANRS (Corporate Action and Notification Response System) project — a real-time DTCC and Bloomberg integration that eliminated manual announcement delays and improved notification accuracy to 99.9%.
- Delivered key BA artefacts: BRDs, use cases, UI mock-ups, traceability matrices, MT 202/210 cash processing specifications, and functional test cases for end-to-end system validation.
- Managed client elections, broker confirmations, and payment allocations (Full Redemption, CMO Final Payment, Mergers), maintaining payment accuracy and timeliness standards for institutional clients.

KEY ACHIEVEMENTS

- ~30% reduction in surveillance model onboarding cycle time through standardised data discovery and field mapping frameworks (HSBC/Synechron).
- ~55% late client notification rate eliminated through process reengineering at UBS — direct improvement to client break rates and regulatory reporting timeliness.
- Payment processing downtime reduced from 120 minutes to under 30 minutes via SharePoint automation, saving 5+ hours per month (UBS LEAN project).
- 99.9% corporate event notification accuracy maintained at BNY Mellon across a multi-source global custody portfolio.
- MD-level recognition for a scalable robotics/automation solution deployed across multiple teams at UBS.

TOOLS & TECHNOLOGIES

Surveillance & Data: NICE Actimize, Dremio, ELK Stack (Elasticsearch, Kibana), PySpark, SQL Server, AWS S3, Parquet

Key Platforms: ELK Stack, Grafana, DTCC, Bloomberg, SWIFT, MarkitWire, Murex MX.3, Calypso, FpML/XSD, EuroClear

BA & Collaboration: JIRA, Confluence, Figma, Balsamiq, ServiceNow, MS Office (Advanced Excel)

Testing & Automation: Cucumber BDD / Gherkin, Jenkins, UAT, SIT, Regression Testing, Traceability Matrix

Data Formats & Protocols: XML, JSON, FpML, SWIFT MT/MX, FIX Protocol, ISO 20022

Methodologies: Agile/Scrum, SAFe/PI Planning, Waterfall, LEAN

AI Tools: GitHub Copilot, Claude AI, ChatGPT

EDUCATION

Bachelor of Commerce (B.Com) | M.U.C.C College of Commerce, Savitribai Phule Pune University | 2010
