Experience

Ascent Business Technology

Jan 2024 - Present

Software Developer

Gurugram, Haryana

- **Developed and optimized reactive forms and configurable components in React**, leveraging Hooks, Context API, and custom reusable components, which improved form validation speed and reduced code duplication.
- Built scalable, real-time **Policy Management module (GRC product)** with React and Spring Boot, using state management and lazy loading to ensure seamless synchronization and efficient performance.
- Full-Stack Expertise: Implemented backend solutions using **Java, Spring boot** led to improving API response time by **25%** and Designed and implemented responsive user interfaces, configurable form with React js which leading to a **15%** improvement in user satisfaction.
- Executed client change requests by analyzing requirements and delivering UI/UX enhancements in React with WebSockets-driven live updates, ensuring 100% on-time delivery.
- Resolved frontend and backend bugs by debugging React components, state issues, and API interactions deliver high-quality solutions.

QA Infotech

Feb 2022 - Aug 2022

Software Engineer

Noida, UP, India

- Built RESTful APIs using Spring Boot for CRUD operations with proper HTTP status codes, exception handling and secured REST APIs with JWT-based authentication

Education

DIT University

2016 - 2020

Bachelor of Technology(B.Tech) in Mechanical Engineering

Dehradun, India

NIIT StackRoute Institute

Oct 2022 - Nov 2023

Full-Stack Software Development

Technical Skills

Languages: JAVA, JavaScript, HTML, CSS

Technologies: Spring Boot, React JS, Angular, Microservices, MySQL, RESTful API, Hibernate, Docker, MongoDB, GIT

Concepts: Problem Solving, Unit Testing, Debugging and Troubleshooting

Projects

KanBan Board | React, MySQL, Spring Boot, Microservices, MongoDB

- A kanban board is an agile project management tool designed to help visualize work and maximize efficiency, using React, MySQL, Spring Boot Application.
- Built reusable **React components** for task cards, lists, and modals, improving code maintainability UI consistency and reusability.
- Implemented real-time updates with WebSockets to sync task status across multiple users simultaneously.
- Integrated **backend microservices** with React frontend via REST APIs, ensuring smooth task creation, assignment, and tracking.

SongPlay(SPOTIFY) Music Application | Spring Boot, React, MySQL

- Created a music streaming interface in React where users can browse tracks and manage playlists.
- Implemented React Router for seamless navigation and Integrated **REST APIs** to fetch and manage music data, ensuring a smooth and fast user experience.
