Profile Summary

Results-driven **Business Analyst** with over 8 years of experience across Banking, Capital Markets, and Financial Services domains, driving digital transformation, process optimization, and automation initiatives. **Proven expertise in Loan Origination Systems (LOS), Trade Finance, and Core Banking Solutions with hands-on Experience in Requirement Elicitation, Gap Analysis, Agile Delivery, and Stakeholder Management.** Skilled in preparing **BRD, FRD, User Stories, Process Flows, and Traceability Matrices** to ensure alignment between business needs and technical delivery. Adept at managing end-to-end SDLC, collaborating with cross-functional teams, and conducting UAT and functional testing to deliver high-quality, scalable solutions. Proficient in JIRA, Confluence, Power BI, SQL, and API Postman, with a consistent track record of improving efficiency, enhancing user adoption, and enabling data-driven decision-making.

Core Competencies

- Agile & Scrum Methodologies.
- Requirement Elicitation
- Documentation – Proficient in preparing **BRD, FRD, User Stories, Use Cases, Workflow Diagrams**
- User Acceptance Testing
- Stakeholder Management
- Change Management
- Gap Analysis
- Technical Tools – Hands-on experience **with Power BI, SQL, API Postman, JIRA, Axure, Visio, Confluence**, and Excel for analysis, prototyping, and reporting.
- Project & Product Management – Strong understanding of **SDLC, Agile** project execution, product road-mapping, sprint planning, and team coordination

Professional Experience

Senior Business Analyst

Aston Cartan (Client:HSBC Global Banking and Markets)| May 2026 – till present

- Support business readiness and operational readiness activities across business and technology workstreams within HSBC transformation initiatives.
- Coordinate with business stakeholders, operations, technology teams, and delivery leads to identify risks, dependencies, and readiness requirements.
- Conduct business impact assessments and support implementation planning for change initiatives.
- Facilitate stakeholder discussions and governance reviews to ensure alignment with programme objectives and deployment milestones.
- Support deployment planning, readiness validation, issue resolution, and operational transition activities.

- Collaborate with testing, operations, and delivery teams to ensure successful implementation and business adoption.

Business Analyst

BNY Technologies Pvt. Ltd | Nov 2023 – 2026

Project: LOS (Loan Origination System)

- Act as a liaison between business stakeholders and technical teams to gather, analyze, and validate end-to-end requirements, resulting in a **35% improvement in requirement clarity and delivery speed**.
- Conduct requirement elicitation sessions (interviews, JAD sessions, workshops) with cross-functional teams (Credit, Risk, Legal, Operations, IT), reducing requirement gaps by **30%**.
- Create and maintain critical BA artifacts including:
 - **BRD and FRD** for all loan processing modules, reducing functional ambiguity by **40%**
 - Use Case Diagrams and Process Flows (Lucidchart / Draw.io)
- 100+ detailed User Stories with clear Acceptance Criteria in **JIRA**, enabling smooth sprint execution
- Define and manage epics, user stories, and sprint backlog items, supporting timely delivery of **12+ sprints** with **95% adherence to sprint goals**.
- Perform gap analysis and impact assessment across modules like loan application, credit check, document upload, approval, disbursement, and closure, leading to **20% faster loan processing time**.
- Collaborate with UI/UX teams to design 30+ intuitive wireframes and screen mockups, enhancing customer experience and reducing form abandonment by **25%**.
- Document API integration requirements for services like **CIBIL, Aadhaar eKYC, PAN verification**, and integration with **Core Banking System (CBS)**—resulting in **90% process automation** for KYC and credit evaluation.
- Support data mapping and interface design with **DMS and LMS**, reducing manual effort by **40%** and increasing data accuracy by **30%**.
- Coordinate with QA for test case validation, UAT support, and defect triaging, contributing to **98% test coverage** and successful Go-Live with **zero critical issues**.
- Present status updates, risk logs, and sprint reports to stakeholders, contributing to **on-time delivery of MVP within 4 months**.

Project: Application Customization & Client Delivery Optimization

- Lead client workshops to elicit, analyse, and validate business requirements, ensuring seamless customization and successful end-to-end implementation of enterprise applications.
- Act as the primary liaison for managing client change requests, documenting enhancements, and prioritizing backlog items using Moscow and business value frameworks.
- Prepare and maintain **detailed Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) to ensure traceability and alignment with business goals**.
- Collaborate with development and QA teams to translate requirements into user stories, define acceptance criteria, and ensure smooth sprint execution.
- Manage and track defects in JIRA, ensuring timely resolution, validated fixes, and consistent delivery of high-quality product functionality.
- Conduct functional testing and **User Acceptance Testing (UAT) to confirm readiness for production release, minimizing post-deployment issues**.
- Lead triage efforts during critical production downtimes, coordinating across Technology, QA, and Professional Services teams to ensure rapid issue resolution and maintain business continuity.
- Deliver client training sessions and knowledge-sharing programs to drive adoption, enhance user experience, and maximize application value realization.

Business Analyst

Credit Suisse India Pvt. Ltd | May 2021 – Oct 2023

Project: Capital Markets – Business Process Optimization & Automation

- Led comprehensive requirement-gathering sessions through workshops and stakeholder interviews, ensuring accurate capture of business needs.
- Translated business requirements into **BRDs, FRDs, user stories, and process flows for clear technical implementation.**
- Performed gap and impact analysis using UML and flowcharts to identify inefficiencies and recommend improvements.
- Conducted **AS-IS and TO-BE assessments** to design scalable, fit-for-business solutions aligned with organizational goals.
- Prioritized change requests using MoSCoW, ensuring timely delivery of high-value features.
- Collaborated with technical teams during Agile ceremonies to ensure sprint alignment and quality outcomes.
- Executed UAT and functional testing to validate end-to-end functionality and ensure smooth go-live.
- Delivered post-implementation training and support, resulting in a 15% drop in post-launch defects and higher user satisfaction.

Consultant

Deutsche Bank | Nov 2017 – May 2021

- Managed end-to-end lifecycle of Bank Guarantees, including issuance, advising, confirmation, amendments, extensions, and cancellations.
- Utilized SWIFT message types (MT760, MT202, MT769, MT767, MT103, MT768, MT799) for execution and monitoring of trade finance transactions.
- Enforced AML and KYC compliance across all trade operations, mitigating regulatory and operational risks.
- Ensured strict adherence to SLAs and TATs for trade finance products, driving process accuracy and service efficiency.
- Investigated and resolved transaction breaks using TLM tools, improving reconciliation accuracy and reducing operational discrepancies.
- Collaborated with technology teams to define business requirements, validate test cases, and enhance trade finance automation.
- Prepared and analyzed aging and month-end reports, delivering actionable insights to management for performance improvement.
- Supported digital transformation initiatives by streamlining trade processes, enhancing compliance, and improving data governance.

Education & Certification

- B. Com | Garware College | May 2019
- Business Analysis & API Mastery Certification | 2024

Key Achievements

- **Enhanced Loan Origination efficiency** by 35% through optimized requirement gathering, workflow automation, and integration with credit and KYC APIs.
- **Reduced manual efforts by 40%** by automating data mapping and validation processes across LOS and DMS systems, ensuring 99% data accuracy.
- **Streamlined Capital Markets processes**, leading to a **10% reduction in documentation time** and **15% decrease in post-launch defects** through improved BRD and UAT practices.
- **Improved reconciliation accuracy by 25%** in Trade Finance operations by leveraging TLM tools and implementing proactive error resolution measures.
- **Accelerated Agile delivery** by leading cross-functional teams through 12+ sprints with **95% adherence to sprint goals** and improved stakeholder visibility via JIRA dashboards.
- **Recognized for delivering a zero-defect Go-Live** for a critical LOS revamp project impacting 500K+ customer records with 99.5% migration accuracy.
