WORK EXPERIENCE

eClerx Services Limited

Process Manager – Transition Programs

JANUARY 2024 - APRIL 2025

- Led strategic transition of ETF and Balance Order middle-office workstreams from US onshore teams to India delivery operations, managing the end-to-end transition lifecycle from planning, knowledge transfer, ramp-up, to stabilization.
- Created comprehensive knowledge transfer frameworks, ensuring teams acquired all process, system, and compliance knowledge efficiently.
- Designed structured handover processes, including readiness checklists, training roadmaps, and documentation standards, to enable smooth adoption by new teams.
- Maintained a centralized repository for all transition documents, including SOPs, process flows, training guides, and progress trackers, enhancing visibility and compliance.
- Led daily and weekly governance calls and prepared leadership reports to track knowledge transfer, risks, and transition milestones.
- Managed RAID logs, identified risks proactively, and escalated complex issues to leadership to ensure timely resolution and uninterrupted transition progress.
- Collaborated with cross-functional and cross-geography stakeholders, ensuring alignment and agreement on timelines, responsibilities, and knowledge transfer objectives.
- Implemented quality assurance protocols during KT sessions, validating process understanding and reducing errors during handover.
- Developed team ramp-up strategies, allocating resources effectively, tracking adoption, and confirming readiness for full operational responsibility.
- Conducted post-transition reviews and continuous improvement initiatives, implementing lessons learned and process optimizations to enhance future transition effectiveness.
- Introduced process improvement initiatives during the transition, streamlining workflows, reducing redundancies, and improving overall efficiency.
- Ensured consistent communication across all transition streams, maintaining transparency and building confidence among leadership, SMEs, and delivery teams.
- Supported integration of IT, compliance, and process teams to ensure smooth access, system readiness, and alignment before the go-live phase.
- Successfully stabilized the transitioned processes, enabling teams to operate

independently while maintaining
compliance, accuracy, and
productivity.
