

Mayank Bhayana

+91-9663525130 mayankbhayana9@gmail.com LinkedIn Credly

With over 13 years in IT and 6+ years as a **Technical Product Owner** and 7 years in Product Development, I have a proven track record of driving product strategy, vision and innovation across core Digital Environment.

Proven expertise in AI/GenAI product development, Microsoft Azure, Azure OpenAI, Azure DevOps, Agentic AI, RAG, AI-driven product delivery, Data Analytics, Agile/Scrum and SAFe methodologies.

Strong engineering professional with a Post-Graduation-Advance Diploma focused in Wireless and Mobile Computing from CDAC ACTS, Bengaluru; Certified in Hands-on Approach to AI for Real-World Applications (HAAI - IIT Kharagpur).

Professional Experience

Tata Consultancy Services

Jan 2024– Present

Technical Product Owner

2 years 7 months

- Led the rollout of VIA from a GenAI agent-assist to an Agentic AI co-pilot, cutting email handling time from 25+ mins to 2 mins, clearing 90% of a 12K backlog in 8 weeks, improving SLA from 33 to <5 days, reducing backlog by 90%, and delivering ~40% cost savings with sustained CSAT uplift.
- Led discovery, analysis and requirements gathering for multilingual AI chatbots (NL/FR/EN), improving intent recognition accuracy to 98% and reducing fallback rate by 30%; write Epics/Features/Stories with DoR/DoD, AC, and NFRs. Impact - Reduced hallucinate rate to $\leq 2\%$ and p95 latency to ≤ 2 s with caching and retrieval tuning.
- Optimized Backlog Prioritization with MOSCOW/WSJF/RICE; accelerating feature delivery by 25% and improving sprint predictability across the Agile Release Train; run PI Planning, PO Sync and System Demos; manage dependencies, manage Risks, and capacity allocation across trains, fares, disruptions.
- Led product delivery for AI and GenAI solutions on Microsoft Azure, working closely with Azure architects, engineering, data and AI teams to drive scalable and production-ready solutions.
- Leveraged Azure OpenAI for enterprise GenAI and conversational AI use cases, evaluating model performance, response quality, hallucination, latency and business outcomes
- Used Azure DevOps for product backlog management, sprint planning, user-story tracking, release coordination, dependency management and Agile delivery governance.
- Worked with technical teams on Azure-based RAG and AI solutions, covering retrieval, embeddings, content management, evaluation, performance and production readiness.
- Translated business and technical requirements into Epics, Features, User Stories, Acceptance Criteria and NFRs for Azure-based AI products, aligning product roadmap with technical feasibility and business priorities.
- Design & govern the RAG Pipeline: content source selection, retrieval schemas (chunking strategy /metadata), embeddings, and freshness SLAs, citations, versioning, ownership, and vectors.
- Led LLM augmentation of the NLU bot by evaluating GPT-4o (OpenAI/Azure OpenAI) for long-tail, multi-turn queries, improving first-contact resolution by 25% and reducing fallback rate by 30%.
- Own the AI product vision and multi-quarter roadmap for Mobi & Norio chatbots; translate business goals (containment, task-success, CSAT, NPS, automation ROI) into OKRs and an executable backlog aligned to SAFe ART objectives.
- Deliver omni-channel experiences (Mobile apps, Web, WhatsApp, Facebook Messenger, IVR), ensuring session/state continuity and reducing agent handoff time by 40%.
- Increased HR self-service adoption by 40% by deflecting policy Q&A to the Norio chatbot and enabling context-aware escalation to HR specialists.
- Executed Try Before You Buy (TBYB) journey, increasing customer activation by 38% and reducing churn by 12%.
- Applied WSJF & RICE prioritization, accelerating delivery of high-ROI features and improving sprint velocity by 15%.
- Led AI-driven personalization, boosting digital engagement and feature adoption by 22% and leveraged Big Data-driven analytics, enabling users to experience trial versions of services before purchasing.

- Define, monitor, and iterate on KPIs and metrics across journeys, teams, and product features, including CSAT, NPS, feature adoption, and customer retention rate.
- Integrated digital identity verification (Onfido, Jumio), reducing manual KYC effort by 90% and improving onboarding time by 50%.
- Led evaluation and strategic adoption of AI/ML-driven AML and Fraud monitoring solutions, improving detection effectiveness and reducing false positives.
- Built and Assessed ML model algorithms, performance, explainability, regulatory defensibility, and operational impact to enable compliant, data-driven decisioning.
- Delivered ML-based product improvements, increasing feature adoption by 30% and retention by 12%.

NextGen Healthcare

May 2020– Sep 2023

Technical Product Owner

3 years 5 months

- Built Customer Support Diagnostics & Chatbot, incorporated ML and Generative AI models, reducing support tickets by 35% and improving resolution time by 40%.
- Improved app rating from 1.5 to 4.5 via increased rigor on customer-focused enhancements and rigorous QA.
- Delivered IMO Modifiers Search (HL7 & HIPAA compliant), enabling seamless payment initiation and reducing claim errors by 20%.
- Worked with healthcare compliance, clinical workflows (EHR Data), legal regulations and digital identity tools to verify provider credentials and ensure HIPAA-aligned secure access control.
- JIRA: Conducted Root Cause Analysis and Data Mapping to support customer support automation.
- Troubleshoot and Investigate Client Production Issues in NGMS app, Created User Stories & Estimations, Functional Reviews, Business Requirement Document, Implemented Pagination.
- Identify, Manage and Minimize project risks by conducting standard RAID Analysis.
- Migrated legacy code from Objective-C to Swift, PR Reviews, leveraging VIPER architecture and modern concurrency, reducing crash rate by 28%.
- Worked on mModal (Cloud Based Online/Offline Dictation) Integration in NextGen Mobility Solutions - iOS

Litmus7

Sep 2019– Mar 2020

Senior Product Developer

7 months

- Developed video streaming features using AVFoundation, improving engagement by 15%.

Textron Inc.

May 2013– Sep 2019

Senior Software Engineer

6 years 5 months

- Built offline/online order management for field service apps on Salesforce Cloud and SF Client Credentials; OAuth 2.0 User-Agent Flow, reducing sync failures by 50%.
- Developed Greenlee Pulling Calculator iOS App, achieving 10K+ downloads and 4.8 rating on App Store.
- Migrated enterprise websites to Drupal & Magento CMS, reducing maintenance effort by 50%.
- Designed wireframes for the industrial websites under E-Z-GO, by using Microsoft Visio.

Skills and Certifications

Tech Stack: Artificial Intelligence, Generative AI (GenAI), Agentic AI, Machine Learning (ML), NLP, Microsoft Azure, Azure OpenAI, Azure DevOps, AWS, GCP, Data Analytics, Big Data, Security

Core Competencies: Product Discovery, Product Ideation, Product Vision, Product Strategy, Product Roadmap, Product Backlog, Product Prioritization, Product Design, Business Analysis, Backlog Refinement, Product Development, User Research, Product Metrics and Analytics, OKRs, KPIs, **Databricks**, **Data Analysis**, Market Analysis, Stakeholder Management, A/B Tests, SAFe, Scrum, Kanban

Programming Languages: Objective-C, Swift, Core Java, Python, SQL

Tools: Aha, Figma, Trello, Rally, Asana, Maze, Lucidchart, Balsamiq, Xray, Miro, Mixpanel, Azure DevOps, JIRA, API, Confluence, Cloud Computing, Power BI, Tableau, Postman, Xcode, GitHub, Amplitude, RACI Matrix

Certifications: CSPO, SAFe PO/PM, AWS Partner: Agentic AI Sales and Agentic AI Essentials, SAFe RTE, IBM Enterprise Design Thinking– AI, AWS AI Practitioner

Education

Indian Institute of Technology / IIT, Kharagpur <i>Certification, Artificial Intelligence (AI)</i>	Sep 2024 - Mar 2025
Centre for Development of Advanced Computing / C-DAC, Bengaluru <i>Post Graduation Advance Diploma, Wireless and Mobile Computing</i>	Sep 2012 - Mar 2013
Maharshi Dayanand University, Rohtak <i>Bachelor of Technology/B. Tech, Computer Science and Engineering (CSE)</i>	July 2008 - June 2012
