PROFESSIONAL SUMMARY

PMP-certified Project Manager with a unique blend of technical expertise and strategic project leadership. 7+ years delivering eCommerce and FinTech solutions, progressing from a hands-on developer to managing \$500K+ portfolios across 25 accounts. Strong foundation in Java, Spring Boot, AWS/GCP cloud architectures, and microservices enables effective stakeholder communication and swift technical decision-making. Currently leading 28+ professionals across 4 Agile teams with 98% on-time delivery and 95% client satisfaction. Skilled in risk mitigation, financial forecasting, and process improvement, achieving 20–30% faster delivery through data-driven methodologies.

CORE COMPETENCIES

Project & Portfolio Management

- Methodologies: Agile, Scrum, Kanban, Waterfall, SDLC Management.
- Planning & Execution: SOW Development, Resource Allocation, Budget Control, Sprint Planning, Financial Forecasting.
- Risk & Governance: Risk Mitigation, Change Management, SLA Management, Project Governance.
- Strategic Leadership: Stakeholder Engagement, Account Management, Team Leadership, Decision-Making.

Technical Expertise

- Backend: Java, Spring Boot, Microservices, Hibernate, Struts, REST APIs, Python.
- Frontend: React.js, Vue.js, JavaScript (ES6+), HTML5, CSS3, jQuery.
- Database & DevOps: SQL, Docker, Kubernetes, CI/CD Pipelines, AWS, GCP.

Tools & Platforms

- Management: JIRA, Confluence, MS Project, Slack, Microsoft Teams.
- Development: GitHub, GitLab, SonarQube, Postman, VS Code, Eclipse.
- Business: Salesforce CRM, Freshdesk, Microsoft Excel (Advanced), Smart Sheets.

EXPERIENCE

Unilog Content Solutions

Associate Technical Project Manager

May 2025 – Present

- Manage a \$500K+ portfolio for 25 client accounts, utilizing financial forecasting to maintain zero budget overruns and a 95% NPS score.
- Transformed client relationships into strategic partnerships, leading to multiple contract renewals and the approval of additional billable SOWs through transparent project governance.
- Drive cross-functional alignment by translating complex technical constraints into business value for C-suite stakeholders.
- Championed the use of automated JIRA dashboards and Excel trackers to increase delivery visibility by 40%, optimizing resource utilization across four Agile teams.

Technical Project Lead

Sep 2023 – May 2025

- Spearheaded end-to-end delivery for North American eCommerce businesses, managing portfolios worth \$300K+ with 98% on-time delivery.
- Identified upsell opportunities during technical discovery phases, successfully converting project gaps into new billable SOWs.
- Established a standardized code review process using SonarQube, reducing production bugs by 60% and shortening deployment cycles.
- Orchestrated the transition of SMB clients to AWS and GCP cloud architectures, improving application performance and client trust.

Software Development Engineer 2

Dec 2022 – Sep 2023

- Engineered scalable microservices and REST APIs using Java, Spring Boot, and Hibernate for high-traffic eCommerce applications.
- Developed responsive, user-centric front-end components using JavaScript and Vue.js, improving engagement across client platforms.
- Mentored junior developers on debugging efficiency and enforced high coding standards through SonarLint and comprehensive documentation.

HighRadius Technologies

Associate Software Engineer II

Jul 2021 – Dec 2022

- Developed an AI-powered receivables platform using a full-stack Java/Ext.js architecture, supporting over 50 enterprise-level clients.
- Reduced application response time by optimizing complex SQL queries and database indexing, cutting execution time by 19%.
- Integrated Machine Learning models into production pipelines in collaboration with data science teams to automate credit risk assessments.

Associate Software Engineer I

Sep 2020 – Jul 2021

- Collaborated with data science teams to integrate Machine Learning models into the production pipeline, reducing deployment time from days to hours.
- Developed MLOps platform components using Java to enable real-time model predictions for credit risk assessment.
- Designed intuitive UI components using JavaScript and ExtJS, increasing platform usability by 30% based on user feedback.

Frontend Developer

May 2019 – Aug 2020

- Developed autonomous receivables applications using React.js for two major financial services clients.
- Created interactive dashboards and data visualizations using JavaScript, CSS3, and HTML5, resulting in a 25% increase in user engagement.
- Ensured cross-browser compatibility and optimized front-end performance for complex financial data sets.

CERTIFICATIONS

- AI in Agile Delivery | PMI, 2026
- Project Management Professional (PMP) | PMI, 2025
- Data Landscape of GenAI for PMs | PMI, 2025
- Applied Data Science Specialization | Coursera, 2022
- Data Science with Python Track | Data Camp, 2019

ACHIEVEMENTS

- Customer Appreciation Award, Portfolio Excellence | Unilog, Jan 2026
- Outstanding Multi-Project Delivery Award | Unilog, 2025
- Star Employee of the Quarter | Unilog, 2023
- 2x Highflyer Awards | HighRadius, 2021, 2022

EDUCATION

BTech in Computer Science and Systems Engineering | KIIT University | 2020 | CGPA: 8.5.
