EDUCATION

Master of Computer Applications (M.C.A)

Osmania University - India

Bachelor of Science (B.Sc.)

Osmania University - India

SKILLS AND ABILITIES

- Digital Transformation
- API-driven AI/ML integrations
- Omnichannel Enablement
- Architecture:
 - Monolith / Microservices
 - API Gateway / API Platform
 - System Agnostic
 - Open Banking
 - Secure Integrations
 - Event Driven Design
- Transformation Leadership
 - Product Strategy
 - AI/ML Integration Strategy
 - Agile Delivery
 - PI Planning
 - Cross team coordination
 - Stakeholder Management across multiple time zones
- Enterprise Integrations:
 - KYC / AML
 - Credit Bureaus
 - Mobile Banking
 - Online Banking Portals
 - Digital Account Opening
 - Payments, Clearing Switches (ACH, RTP, WIRES)
 - Account Aggregators
 - P2P Systems
 - Identity Access Management
- Technical Skills & Tools
 - JIRA, Visio, Postman
 - REST/SOAP, JSON, XML
 - C, C++, Java, Oracle, SQL
- Innovation
- Fostering New Talents

MOHAMMED ABDUL WAJID

PROFESSIONAL SUMMARY

- Techno-Functional Leader in Retail, Corporate and Investment Banking Modernization, Client Onboarding, Digital Banking** in driving digital transformation across client onboarding, account opening, and channel enablement. Proven track record of aligning complex technical roadmaps with commercial objectives to evolve legacy core banking monoliths into cloud-native, API-driven ecosystems in **agile** environment.
- Strategic Architecture & Compliance Delivery:** Expert in architecting API-first strategies and RESTful microservices that convert intricate business requirements into scalable, system-agnostic solutions. Successfully compresses corporate client time-to-transact while ensuring strict adherence to global regulatory frameworks.
- Ecosystem Integration & Compliance:** Expert at integrating mission-critical subsystems—such as **KYC/AML and Account Aggregators**—into unified ecosystems. I embed **IT Audit and Regulatory governance** into the product lifecycle to ensure secure, compliant, and frictionless global workflows.
- Global Delivery & Synergy:** Proven ability to unify business, tech, and compliance teams within **multi-vendor, multi-geography environments**. I lead **cross-functional global teams** to transform high-stakes challenges into measurable business outcomes through disciplined Agile execution and customer-centric design and cross functional collaboration with stake holders.

WORK EXPERIENCE

Digital Transformation Consultant

Consultant, Bangalore – India | 2025 – Till date

- Providing end-to-end design of **system-agnostic digital solutions, Human-in-the-Loop (HITL)** frameworks that safely **integrate AI/ML** capabilities into core banking processes. Specially, simplifying customer onboarding and loan-origination journeys.
- Developed comprehensive business cases and documentation** to secure executive buy-in and provide a clear blueprint for enterprise-wide digital initiatives.

Principal Analyst / Product Owner / Business Systems Analyst

FIS, Bangalore – India | 2016 – 2025

- Orchestrated end-to-end digital product lifecycles** for Corporate & Investment Banking platforms, supporting Bank of America digital banking modernization, institutional client onboarding, investment product servicing, and API-led transformation.
- Owned the product backlog and technical grooming sessions for a cross-functional team of engineers, translating complex financial workflows into actionable user stories, sequence diagrams, and system architecture specifications.
- Directly managed multi-country transformation initiatives**, unifying business, technology, and global vendors to ensure alignment with diverse international

regulatory requirements.

- **Designed an enterprise-wide exception management and error-handling framework**, standardizing governance and drastically improving audit readiness across banking subsystems.
- **Optimized global delivery velocity** through precision backlog refinement and sprint governance, driving alignment on scope and acceptance criteria across onshore/offshore teams.
- **Spearheaded real-time KYC/AML and third-party integrations**, delivering compliant, frictionless workflows within a secure, API-driven ecosystem.
- **Wrapped siloed legacy systems in modern API contracts**, transforming a disjointed, manual **corporate onboarding** process into a seamless, automated digital journey and **omni channel** experience.
- **Led Product Owner activities for Corporate & Investment Banking** digital transformation initiatives across client onboarding and account servicing.
- **Defined business requirements and user stories for institutional client** onboarding and KYC/AML workflows.
- **Worked with Investment Banking operations teams** to digitize client onboarding, entitlement management, and regulatory compliance.
- **Collaborated with global business stakeholders to deliver API-driven solutions** supporting institutional banking products.
- **Supported onboarding of corporate and institutional clients** through automated workflow orchestration and compliance integration.
- **Worked with payment, treasury, and investment banking** stakeholders to modernize enterprise banking platforms.
- **Collaborated with Bank of America stakeholders** to modernize digital banking and legacy banking platforms through Product Owner-led transformation initiatives.
- **Supported institutional banking product** enhancements involving equity products, investment product workflows, and corporate actions, translating business requirements into user stories and functional specifications.
- **Supported trade validation, trade enrichment**, post-trade processing, and client servicing workflows for institutional banking platforms.
- **Partnered with Investment Banking operations**, technology, and compliance teams to deliver secure onboarding, entitlement management, and servicing capabilities for institutional clients.
- **Contributed to modernization initiatives supporting** investment product servicing, corporate actions processing, and client lifecycle management within enterprise banking ecosystems.

Project Manager

Consulting, India | 2014 – 2015

- **Provided strategic project management consulting** to drive short-term banking modernization initiatives, aligning technology upgrades with business objectives, engineered rigorous test plans and execution strategies to independently validate with functional requirements.
- **Architected and implemented remediation frameworks** to eliminate critical IT control gaps, substantially strengthening the organization's overall governance and risk posture.
- **Redesigned privileged access & control framework** resolving long-standing governance deficiencies.

Project Manager

SBG, Jeddah – Saudi Arabia | 2010 – 2014

- **Led end-to-end Oracle ERP implementations**, orchestrating the decommissioning of legacy systems to streamline global enterprise operations and data integrity.
- **Pioneered an enterprise-wide change management framework**, significantly enhancing audit readiness and governance across complex regulatory environments.
- **Directed IT audit methodology development**, leveraging advanced tools to strengthen control effectiveness, risk mitigation, and compliance reporting.

Application Analyst / Product Owner

Qatar First Investment Bank, Doha - Qatar | 2009 – 2009

- Implemented **IAM** for granular entitlement structures (e.g., Maker-Checker workflows, tiered payment authorization limits) for corporate clients.

- **Managed end-to-end SIT/UAT phases**, validating that technical deployments met the business requirements.
- **Led the implementation** Asset Management Services, Operating Lease, Mortgage products for the new bank.
- **Product Owner for Asset Management and Mortgage** products supporting an Investment Banking platform.
- **Managed product backlog, business requirements, SIT/UAT**, and production readiness.
- **Designed authorization workflows including Maker-Checker**, entitlement hierarchy, and approval matrices for institutional clients.
- **Partnered with business** users to automate investment banking operational workflows.
- **Delivered secure onboarding capabilities** for high-value institutional customers.

Application Analyst

SAMBA Financial Group, Riyadh – Saudi Arabia | 2007 – 2008

- **Orchestrated the technical carve-out of a banking entity**, delivering a standalone General Ledger (GL) and complex data migration for a Capital & Investment Management entity.
- **Played a pivotal role in implementing of multi-currency mutual fund products, equities, corporate actions**, ensuring **regulatory requirements** are met with seamless transaction processing
- **Partnered with Compliance and Legal stakeholders** to integrate real-time, automated **AML/KYC** screening vendors collaborated with Corporate Operations, and Risk to align the onboarding product roadmap with high-value institutional pipeline priorities.
- **Implemented Investment Management** solutions supporting Equity products and Mutual Fund operations.
- **Worked on Corporate Actions processing** supporting dividend, bonus, rights issue, and stock split events.
- **Participated in business analysis** for Equity transaction processing and investment product servicing.
- **Supported investment product onboarding** and lifecycle management for institutional customers.
- **Coordinated with Compliance and Operations** teams to ensure AML/KYC adherence for investment products.

IT Analyst / Programmer

Saudi Hollandi Bank, Riyadh – Saudi Arabia | 2002 – 2007

- **Integrated complex payment gateways and credit bureau systems**, optimizing real-time transaction accuracy and speed across multiple digital channels.
- **Engineered the Bank Master Application** (Kindle/Misys) using **C and Pro*C**, architecting flexible interfaces to meet evolving regulatory requirements, eliminating operational bottlenecks and ensuring end-to-end data integrity across the enterprise.
