

MONALISHA DAS

|Data Analyst|4 + Years |Investment Banking|

Bangalore, India | monalishad441@gmail.com +91- 7735875649

PROFILE SUMMARY

Results-driven Data Analyst with 4 years of experience in Banking, **Credit Risk, Business Intelligence, and Data Analytics**. Skilled in **SQL, Python, SAS, Alteryx, Power BI, and Excel** for data analytics, ETL automation, KPI reporting, dashboarding, portfolio analytics, and MIS reporting. Strong experience in **IFRS 9, ECL, PD/LGD/EAD**, customer segmentation, root-cause analysis, and stakeholder management, delivering actionable insights for business and risk decisions. Supported Investment Banking analytics initiatives, working with large-scale financial and transactional datasets to deliver data-driven insights for portfolio, risk, and business decision-making.

TECHNICAL SKILLS & COMPETENCIES

- **Databases:** SQL Server, SQL
- **Programming:** Python, PySPARK, R, SAS
- **Analytics & BI Tools:** Power BI, Alteryx, AWS, GCP, Excel, Tableau, JIRA, Agile Methodology, Big Query
- **Data Skills:** Data Cleaning, Data Modeling, Data Visualization, Data Storytelling, Data Validation, Dashboard Development, Data Governance, Stakeholder Management, MIS Reporting, Data Quality, Data Transformation
- **Key Competencies:** EDA, ETL, Model Development, Cross-Functional Collaboration, Credit Risk Analytics, Portfolio Monitoring, Risk Segmentation, Roll-Rate Analysis, ECL Monitoring, IFRS 9 Reporting, Basel III, Risk Strategy, PD/LGD/EAD Analysis, KPI Reporting, Regulatory Reporting, EWS, RCA, Vintage Analysis

WORK EXPERIENCE

Data Analyst | BNP Paribas SA | 03/2026 – Present

- Analyzed **secured and unsecured lending portfolios** across loan origination, portfolio performance, delinquency monitoring, and credit risk assessment using **SQL, SAS, and Python** to support data-driven risk decisions.
- Extracted, transformed, validated, and analyzed **large-scale credit datasets** for **risk analytics, portfolio management, MIS, and regulatory reporting**, ensuring data accuracy and reporting quality.
- Performed **30+/60+/90+ DPD, delinquency, NPA, roll-rate, vintage, cohort, and portfolio segmentation analysis** to identify emerging credit risk trends and monitor portfolio health.
- Supported **IFRS 9 ECL** reporting by preparing, validating, and reconciling **PD, LGD, and EAD datasets**, ensuring data integrity, regulatory compliance, and audit readiness.
- Developed and optimized **SQL queries and daily/weekly/monthly MIS reporting workflows**, while automating **ETL and reporting processes using Alteryx, SAS, SQL, and Python**, improving processing efficiency by **30%** and reducing manual effort by **40%**.
- Built **Power BI dashboards** for NPA, delinquency, roll rates, loan disbursements, and portfolio growth; performed **EWS, data reconciliation, root-cause analysis, and ad-hoc analytics** in collaboration with Risk, Underwriting, Finance, Compliance, Operations, and Technology teams to support credit policy and portfolio risk management.

Credit Risk Analyst | Bank Of Queensland | 09/2022 – 12/2025

- Integrated **loan origination, bureau, customer master, behavioral, and macroeconomic datasets** covering **500K+ customer records** using **SQL, Python and SAS**, enabling accurate **risk parameter extraction** for **secured and unsecured lending portfolios**.
- Built and maintained **Credit Risk Master datasets (Origination, Performance, Customer, Bureau, and Portfolio Master)** using **SQL and Alteryx**, supporting **daily MIS reporting** for loan portfolios exceeding \$114M+.
- Designed scalable **ETL pipelines** using **SQL, Python, and Alteryx** to automate **data extraction, transformation, validation, and loading** into enterprise **Data Marts**, reducing **manual effort by 40%** and improving **processing speed by 30%**.
- Supported Investment Banking and financial-services analytics initiatives in Queensland, working with large-scale financial and customer datasets to deliver data-driven insights for business and risk decisions.
- Performed **SQL- and Python-based analysis, data validation and reporting** on investment-banking datasets, supporting portfolio analytics, data quality and stakeholder decision-making.
- Developed interactive **Power BI dashboards** to monitor **loan applications, approvals, disbursements, rejections, cancellations, portfolio growth, delinquency, DPD, NPA, and business KPIs**, enabling faster **executive decision making**.

- Performed **portfolio monitoring, delinquency analysis, DPD (30+/60+/90+), roll-rate analysis, vintage analysis, cohort analysis, and customer segmentation** using **SQL and Power BI** to identify **high-risk accounts** and emerging **portfolio trends**.
- Supported **IFRS 9 Expected Credit Loss (ECL)** reporting by preparing and validating datasets for **PD, LGD, and EAD** calculations, ensuring **data quality** for **regulatory and internal risk reporting**.

- Analyzed **policy exception approvals, bureau scores, underwriting performance, and override trends** using **SQL, SAS, and Power BI**, strengthening **credit governance** and improving **lending decision quality**.
- Delivered automated **MIS reports, ad hoc analysis, executive dashboards, and stakeholder insights** by collaborating with **Risk, Finance, Compliance, Operations, and Business teams** to support **portfolio optimization** and **strategic decision-making**.

Data Analyst | Uber | 12/2025 - 02/2026

EDUCATION

M.Tech | BPUT University | 2021 – 2023

LANGUAGES

English | Odia | Hindi

CERTIFICATIONS

- Alteryx Designer Core
- Hacker Rank – Advanced SQL

ACHIEVEMENTS

- **Improved credit risk reporting efficiency by 30%** and reduced manual effort by **40%** by automating ETL and MIS reporting workflows using **SQL, SAS, Python, and Alteryx**.
- **Strengthened portfolio risk monitoring** across \$114M+ **lending portfolios** by developing automated Power BI dashboards and performing **DPD, NPA, roll-rate, vintage, and delinquency analysis**.
- **Enhanced data quality and regulatory reporting readiness** by validating and reconciling **PD, LGD, EAD, and IFRS 9 ECL datasets**, supporting accurate risk and compliance reporting.
