PROFESSIONAL SUMMARY

PMP-certified Senior Project Manager with 15+ years of IT experience, including 9+ years leading Project and Program Management initiatives. Extensive experience delivering enterprise technology transformation programs within the Banking & Financial Services domain. Experienced in partnering with Engineering, DevOps, QA, Infrastructure, and Product teams to deliver scalable technology solutions using Agile and hybrid delivery methodologies. Expertise in Agile delivery, PMO governance, portfolio management, executive reporting, stakeholder engagement, project financial management, and cross-functional leadership. Proven track record of delivering enterprise transformation initiatives that improve operational efficiency, governance maturity, delivery predictability, and business value across globally distributed teams

KEY ACHIEVEMENTS

- **15+ years of IT experience**, including **9+ years leading Project & Program Management** across Banking & Financial Services.
- **PMP® Certified** and **Certified Scrum Master**, specializing in Agile delivery, PMO governance, and enterprise transformation.
- Led **20+ member globally distributed teams** across the US, UK, and APAC, delivering complex technology programs.
- Managed **40+ business and technology stakeholders**, driving executive alignment and successful program execution.
- Delivered **15 production releases per quarter** through Agile delivery while maintaining governance and quality standards.
- Reduced deployment time by **75% (2 hours to 30 minutes)** through CI/CD transformation, contributing to approximately **USD 1.5M annual program savings**.

PROFESSIONAL EXPERIENCE

Sr. Project Manager | FIS Global | Dec 2019 – Present

- Led **end-to-end delivery of enterprise technology transformation programs**, managing two Agile teams and delivering **15 production releases per quarter** while tracking key delivery KPIs, including release cadence, sprint predictability, and deployment success.
- Spearheaded **CI/CD transformation and Harness migration**, reducing application deployment time by **75% (2 hours to 30 minutes)**, improving deployment reliability, and contributing to estimated annual operational savings of **USD 1.5 million** across the program.
- Managed **cross-functional teams of 20+ members** and **40+ global business and technology stakeholders** across the US, UK, and APAC, driving Agile governance, stakeholder alignment, and delivery excellence.
- Established executive governance through **dashboards, KPI reporting, status reports, and steering committee presentations**, enabling data-driven decision-making and proactive risk management.
- Led **risk, issue, dependency, and change management** across multiple workstreams, ensuring timely identification, escalation, mitigation, and successful project delivery.
- Drove **Agile transformation initiatives**, facilitating PI Planning, Sprint Planning, Daily Stand-ups, Sprint Reviews, Retrospectives, and fostering collaboration across Product, Development, QA, and Operations teams.
- Streamlined **ServiceNow and MIR3 integration** and standardized release processes, improving incident response, operational efficiency, and enterprise release governance.
- Leveraged **Microsoft Copilot and ChatGPT** to automate project documentation, meeting summaries, executive communications, and reporting, improving team productivity and communication efficiency.

Business Process Lead | TCS | Jun 2016 – Nov 2019

- Managed end-to-end infrastructure projects for JP Morgan, overseeing scope, schedule, risks and stakeholder communications.
- Prepared weekly governance reports for leadership overseeing 10+ quarterly migration across globally distributed teams
- Supported project financial monitoring, resource allocation, and schedule tracking.
- Coordinated project risks, issues, dependencies, and change requests across multiple workstreams.
- Led cross-functional global teams of 10+ members delivering infrastructure transformation initiatives.
- Implemented PMO governance processes improving project visibility and reducing escalation rates.
- Worked closely with global stakeholders to ensure project reporting accuracy and timely delivery.

Sr. Software Engineer | Birlasoft | Mar 2010 – Nov 2014

- Oversaw data migration from SQL Server to Oracle 9i for GE Asset Management (invoice resolution, PO placements, transactional error resolution, receiving issues)
- Conducted UAT and manual testing for ClearOrbit/O2S project, ensuring supplier compliance tracking.
- Led a team of 16 engineers, managing requirements, client calls, and technical specifications.
- Supported procurement operations including invoice resolution, purchase order processing, transactional error management, and receiving issue resolution for enterprise customers
- Collaborated with business users, suppliers, and cross-functional teams to ensure timely resolution of procurement and supply-chain related transactions

EDUCATION & CERTIFICATIONS

- Bachelor of Technology (Electronics & Communication Engineering)
West Bengal University of Technology | 2008
- PMP Certified (2025)
- Scrum Master Certified
- SRE Foundation & Practitioner Certified

ADDITIONAL ACHIEVEMENTS

- Published whitepaper: "Migrating New Tool in a Matrix Organization," adopted as a reference framework for enterprise migration initiatives.
- Languages: English, Hindi, Bengali
