

NAGARAJU R

Bengaluru, India | +91 9493843943 | Raj.raj.8392@gmail.com | [LinkedIn – Nagaraju R](#) | [GitHub](#)

PROFESSIONAL SUMMARY:

Senior Data Quality Analyst with 10+ years of experience across Data Quality, Data Analytics, and Corporate KYC. Strong expertise in end-to-end KYC lifecycle (CDD, EDD, UBO mapping, risk assessment) combined with hands-on experience in SQL (CTEs, joins, window functions) for data validation and anomaly detection.

Skilled in Root Cause Analysis, risk scoring, and dashboarding (Power BI/Tableau) to improve data quality, support compliance, and drive data-driven decision-making.

CORE SKILLS & TECHNICAL EXPERTISE

Data Analytics: SQL (CTEs, Joins, Window Functions), Data Validation, Anomaly Detection, Pattern Analysis, Root Cause Analysis (RCA), QC Frameworks, Exception Analysis

Data Quality & Governance: Data Quality Management, Data Certification, Data Standards, Data Governance, Data Reconciliation & Validation

KYC & AML: Customer Due Diligence (CDD), Enhanced Due Diligence (EDD), Risk Assessment, UBO Mapping, Corporate Hierarchies

Fraud Detection: Structuring (Smurfing), Behavioural Analysis, Geo-location Anomalies, Risk Scoring Models

Visualization & Reporting: Power BI (DAX), Tableau, Dashboard Development, MI Reporting

Databases & Tools: MS SQL Server, Oracle SQL, Excel (Advanced), MS Office, Workflow Tools

Process & Business: Audit & Regulatory Issue Remediation, Business Requirements Documentation, Stakeholder Management, Process Optimization & Risk Assessment

PROFESSIONAL EXPERIENCE

Senior Analyst- Data Quality & Analytics | LSEG (Refinitiv) — Bengaluru | Jun 2022 – Present

- Designed and implemented SQL-based frameworks (CTEs, joins, aggregations) to validate large datasets and identify anomalies, missing attributes, and inconsistencies
- Developed fraud detection logic to uncover suspicious patterns including dormant activity, structured transactions (smurfing), and cross-border anomalies
- Built a rule-based risk scoring model using transaction and KYC attributes to classify customers and support compliance decision-making
- Performed trend and pattern analysis to identify systemic data issues, enabling process improvements and reducing recurring errors
- Led QC operations including sampling strategy, risk-based case selection, quality scoring, and performance reporting
- Conducted root cause analysis (RCA) and thematic reviews to identify underlying issues and recommend data and process remediation
- Implemented advanced matching logic to detect duplicate entities and maintain golden record standards
- Developed interactive dashboards (Power BI/Tableau) to monitor SLA performance, exception trends, and quality metrics
- Migrated and optimized SQL scripts from Oracle to MS SQL Server, improving data processing efficiency and query performance
- Collaborated with cross-functional teams to define validation rules, improve data governance, and align with business requirements

Analyst | Refinitiv India Shared Services Pvt Ltd. Bengaluru | Oct 2018 – May 2022

- Performed end-to-end Corporate KYC processes including Customer Due Diligence (CDD) and Enhanced Due Diligence (EDD)
- Analyzed corporate structures including IBO, UBO, subsidiaries, SPVs, JVs, and complex ownership hierarchies
- Assigned and validated client risk ratings based on KYC policy, jurisdictional risk, and business activity
- Performed screening and due diligence to identify regulatory and compliance risks
- Maintained and validated KYC data attributes ensuring accuracy, completeness, and audit readiness
- Collaborated with stakeholders to resolve data issues and improve KYC data quality and coverage

Order Fulfilment Specialist | Thomson Reuters India Pvt Ltd. Bengaluru | Jan 2017 – Sep 2018

- Handled high-volume entitlement cases; performed operational analytics to support workflow allocation and SLA management.
- Prepared daily/weekly reports analysing case volumes, backlogs, and turnaround times for management.

Trainee Content Analyst | Thomson Reuters India Pvt Ltd. Bengaluru | Sep 2015 – Dec 2016

- Analysed SEC filings (8-K, 10-K) and global disclosures to derive organizational structures and validate reference data.
- Supported data pipelines feeding downstream KYC analytics and compliance functions.

GitHub Project: Global KYC & Fraud Risk Analytics

- Designed and implemented a SQL-based fraud analytics solution to detect suspicious financial behaviours
- Analyzed multi-dimensional datasets (customers, accounts, transactions and risk flag) to identify risk patterns and anomalies
- Developed fraud detection logic including structuring, dormant account activity, and behavioural anomalies
- Created a rule-based risk scoring model to classify customers & support compliance decision-making
- Published project on GitHub for end-to-end analytics demonstration

GitHub: <https://github.com/Raj-8392/global-kyc-fraud-risk-analytics>

Key Achievement:

- Cleaned and reconciled **large datasets (20K+ records)** improving data integrity.
- Delivered ~30% cycle-time reduction & ~15% productivity uplift through process analytics and improvement initiatives.
- Built 8+ dashboards to track data quality and performance metrics.

EDUCATION

- MBA (Finance) — Lovren International Institute of Management Studies, Bangalore University
- B.Sc. (MPCs) — Smt. BSR Degree College, Andhra University
