

Naveen Muddana

Senior Network Engineer

iiTill naveenmudda2302@gmail.com, 9154858027, Hyderabad.

* Professional Summary

Senior Network Engineer with over 5 years of experience designing, deploying, and maintaining large-scale ISP and enterprise networks. Proven expertise in routing protocols (BGP, OSPF, ISIS, MPLS), switching (VLAN, STP, RSTP, EtherChannel), and multi-vendor environments (Cisco, Nokia, Huawei, MikroTik). Skilled in firewall management (Palo Alto, Fortinet), network automation using Python, and incident management.

<> Skills

- Routing: BGP, OSPF, EIGRP, RIP, ISIS, MPLS, LOP, VPN
- Switching: VLANs, VTP, STP, PVST, RSTP, MSTP
- Redundancy: HSRP, VRRP, SRRP, EtherChannel
- Multi-Vendor: Cisco (ISR, Catalyst), Nokia (7750 SR, IXR), Huawei, MikroTik
- Firewalls: Palo Alto, Fortinet (NAT/PAT, IPsec, SSL, Security Policies, HA)
- Automation: Python scripting, network automation
- Networking Services: DHCP, PPPoE, RADIUS, TACACS+, DNS
- Monitoring & Troubleshooting: SolarWinds, The Dude
- Certifications: CCNA (Cisco Certified Network Associate)

● Professional Experience

Senior Network Engineer

Dec 2025 - Present

STL Digital PVT LTD, Hyderabad

- Track network utilization, traffic patterns, and uptime using SolarWinds to ensure optimal network health
- Configure and manage external BGP (eBGP) peering policies on edge routers, implementing prefix-lists and AS-Path prepending.
- Demonstrate technical versatility by seamlessly deploying, configuring, and troubleshooting network infrastructure across multi-vendor environments (Nokia, Cisco, Huawei).
- Managed VLANs, Spanning Tree Protocol (STP/RSTP), and EtherChannel (LACP) across access and distribution layers to optimize LAN performance.

Senior Network Engineer

Sep 2022 - Dec 2025

Atria Convergence Technologies LTD, Hyderabad

- Monitored vital health parameters (CPU utilization, interface drops, memory thresholds) of distributed Cisco ISR/Catalyst switches and Nokia SR OS platforms using SolarWinds.
- Established BGP peering with service providers, managed traffic flow, added routes, and announced prefixes to enhance customer browsing performance.
- Designed and deployed IPsec VPN tunnels across Palo Alto Next-Generation Firewalls for secure multi-site connectivity and DM/ application access.
- Provisioned, configured, and staged Cisco ISR (4000/1000 series) routers and Cisco Catalyst (9000/3850 series) switches for branch deployments.
- Maintained robust security architectures by establishing IPsec VPN tunnels and managing complex NAT policies (Source NAT/PAT, Destination NAT) using Palo Alto Next-Generation Firewalls.
- Developed Python scripts to automate daily repetitive tasks and streamline network configurations, reducing human provisioning errors
- Utilized Palo Alto Monitor Logs and Traffic Log Viewer to analyze policy drops, verify rule matching, and resolve user technical/no-browsing complaints.
- Provided 24/7 incident response support, driving ticket resolution for Huawei and Nokia network infrastructure.

Network Engineer

Jun 2021 - Sep 2022

GTPL Hathway PVT LTD, Hyderabad

- Conducted daily monitoring and real-time troubleshooting on Cisco and MikroTik devices using The Dude monitoring tool.
- Deployed and configured Cisco Catalyst 9300/3850/2950/2960 Series switches, managing VLANs and optimizing loop-free topologies with RSTP and MSTP
- Served as a core member of the Network Operations team, providing 24/7 support to monitor, investigate, and resolve LAN/WAN routing and stability issues.

'9' Education

- **B.Tech Mechanical Engineering** - KKR & KSR Institute of Technology and Sciences, JNTU Kakinada (2016-2019)
- **Diploma Mechanical Engineering** - GVMP College, SBTET (2013-2016)
- **SSC** - Saraswathi High School, Prakasam (2013)
