Test case Validation.	Project Management	Review of Mockup designs
Microsoft Dynamics 365 (CRM)	Microsoft Projects	Data Mining & Analytics

WORK EXPERIENCE

Since **August'2015 till March 2020** with **Swaas Systems Pvt. Ltd.** Chennai as **Business Analyst**

Since **March 2020 to July 2022** with **Unlimited Innovations India Pvt Ltd.** Chennai as **Business Analyst**

From **July 2022 to Till Date** with **Cognizant Information Technology.** Bengaluru as **Sr. Business Analyst**

Accomplishments:

- Single point of contact between Client and Development Team from solution planning, sizing, to fulfillment
- Implemented third party solutions which enabled near real-time order-based surveillance that highlighted potential intentions of market abuse activity.
- Established large, high-performance IT teams to support IT regional operations; utilized local resources and established cost savings worth 30%
- Collaborated with Dev/QA teams on requirement reviews, solutioning, Sprint planning, refinements, and defect analysis/RCAs.
- Owned business development and met 96% of deadlines by identifying and mitigating engineering roadblocks.
- Functioned as the liaison among product, IT, and sales teams to understand customer demand for new features and new potential markets to move into
- Fostered communication between stakeholders, engineering, and marketing, resulting in improved speeds of feature development life cycle by 26% year over year.
- Led junior business analysts in documenting client requirements and implementing all parts of product

lifecycle, serving as the liaison between clients and team to ensure alignment with goals.

PROJECT DETAILS

PROJECT 1

NATWEST

Bridges technical teams and business stakeholders to design, implement, payment systems, gateways, and transactional processes. Key responsibilities include defining payment lifecycles—initiation, authorization, settlement, and reconciliation

Roles and Responsibilities:

- Documented all business processes and operating procedures from scratch for an early-stage startup.
- Continuously monitored and evaluated processes to find areas of improvement,
- Researched and presented to stakeholders, obtaining approvals for requirements and changes.
- Creating detailed workflow diagrams for payment initiation, authorization, and settlement
- Developing Business Requirement Documents (BRDs) and Functional Requirement Specifications (FRS) for new payment products.
- Ensuring accuracy in transactions and managing chargebacks, and payment failures
- Facilitating sessions with product owners, developers, and other teams

PROJECT 2

Learning Management Application

Transforming higher education resources into accessible formats that align with today's teaching and learning needs, ensuring it serves learners from all backgrounds. Delivering the right content at a price that meets institution's requirements while respecting students' expectations.

Roles and Responsibilities:

- Documented all business processes and operating procedures from the ground up for an early-stage startup.
- Collaborated with Product Owners to maintain a healthy backlog.
- Led backlog prioritization to ensure alignment with business goals.
- Authored clear and actionable user stories.
- Gathered requirements from stakeholders and translated them into Epics.
- Conducted research and presented findings to stakeholders, securing approvals for requirements and proposed changes.

PROJECT 3

Ticketing Tool

The ticketing tool is developed to help the in-house IT Support team. The tool helps the team to track the hardware/software issues within the organization and help the employees work much more efficiently by resolving the reported issues as soon as possible.

Technology: Microsoft PowerApps, Power Automate, SharePoint Online

Roles and Responsibilities:

- Documented all business processes and operating procedures from scratch for an early stage startup
- Continuously monitored and evaluated processes to find areas of improvement, significantly improving the client experience by 32% by advising resource allocation to one-on-one health monitoring
- Interchanged between IT and business contacts to manage project lifecycle, and ensured team achieved 96% of deadlines by communicating realistic expectations.
- Researched and presented to stakeholders, obtaining approvals for requirements and changes.

PROJECT 4

Online Compliance Portal

The Online Compliance Portal was developed to manage the compliance process of acts. The tool helps the team to digitize the entire process of configuration of acts, sections, departments, groups etc., data storage in a structured format, automated approvals, user interface to input compliance details along with signature image upload and analytical reports.

Technology: Microsoft PowerApps, Power Automate, SharePoint Online

Roles and Responsibilities:

- Understanding source systems and customer requirements and prepared business requirements and design documents.
- Understanding the team's expectations.
- Generate emails which will automate the communication between approvers and submitters.
- Involved in creating roles for various users and restricting access to the data.

PROJECT 5

Invoice App – Leading Journalism company.

The project involved creating invoice app that can generate new invoices and manage invoices.

Technology: PowerApps, SharePoint Online, Power Automate, Power BI.

Roles and Responsibilities:

- Understanding source systems and customer requirements and build a canvas app from scratch.
- Store the recorded safety observations.
- Designing a SharePoint data store that can store all the details without any errors/issues.
- Generating various invoices.
- Validating the user inputs so that the data is clean at the data store.

PROJECT 6

Training App- Leading Waste management company

The application was developed to create training schedules for employees in the organization. The schedules for several types of training such as personal safety can be created and conducted using the app. There is provision for marking attendance also for each schedule. Emails are sent out to the respective people for better coordination among those individuals. Role based access is also implemented within the app, to make sure there is no unrestricted access.

Technology: PowerApps, Power Automate, Share Point Online

Roles and Responsibilities:

- Understanding source systems and customer requirements and was a part of the team preparing business requirement and design documents.
- Understanding the current system and client expectations.

- Designing the UI of the application which had to be both simple as well as user friendly.
- Creating various forms which can be used by end user to enter visitor details.
- Validating the data entered by user to make sure that it is all clean.

Other Project Details:

Worked with Multiple projects and Clients to reach their goal and preparation of SRS Documents, UAT Testing, Defining the Tasks, helping the team to understand the requirement, Demonstration of the progress to Client.

Technology: PowerApps, Power Automate, Share Point Online, PHP, SQL, SQL Server, Power BI, Tableau, Dot net, Signal R.

Roles and Responsibilities:

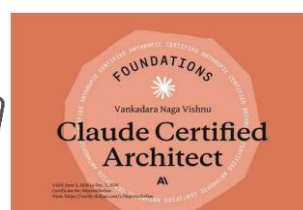

- Plan and implement projects
- Help define project scope, goals, and deliverables
- Define tasks and required resources
- Collect and manage project team
- Create schedule and project timeline
- Track deliverables
- Support and direct team
- Lead quality assurance
- Implement and manage change when necessary to meet project outputs

IT SKIL SET
