**DevSecOps Engineer | DevOps Engineer | Platform Engineer | SRE Engineer |
Cloud Security | AWS | Azure | GCP | Kubernetes | Docker | Terraform |**

Gurugram

PROFESSIONAL SUMMARY

DevSecOps / DevOps / Platform / SRE Engineer with **10.5 years of experience** in designing, securing, and **operating** highly available **cloud-native platforms** across **AWS, Azure, and GCP**. Experienced in **cloud security, Kubernetes orchestration, Infrastructure as Code (Terraform), CI/CD automation, and Site Reliability Engineering (SRE)** practices. Proven ability to build **secure, scalable, and resilient systems**, implement **DevSecOps pipelines**, reduce **MTTR**, improve deployment **frequency**, and ensure compliance with enterprise **security** standards.

PROFESSIONAL EXPERIENCE

DevSecOps Engineer

Accenture, Feb 2018 – Present

- ❖ Supported and implemented **DevOps and DevSecOps practices** across **AWS, Azure, and GCP**, contributing to **enterprise application environments**
- ❖ Assisted in building and maintaining **CI/CD pipelines** using **Jenkins and Git-based workflows**, integrating **security scans** such as **SAST, dependency checks, and container image scanning**
- ❖ Automated **infrastructure provisioning and configuration** using **Terraform** and **cloud-native services**, reducing manual setup and configuration drift
- ❖ **Architect, lead & secure DevOps solutions** across **AWS** and on-prem environments using **Infrastructure as Code**
- ❖ Implemented and maintained **cloud security controls**, including **IAM policies, secrets management, encryption, and access controls**
- ❖ Implemented and supported **monitoring and observability solutions** using **Prometheus, Grafana, ELK/EFK, and CloudWatch**, enabling proactive alerting
- ❖ Experience in **Architecting, Automating & optimizing Devops tools**
- ❖ Led **incident response, root cause analysis (RCA)**, and post-incident reviews to improve **system reliability** and reduce **MTTR**
- ❖ Collaborated with **application, QA, and security teams** to promote **shift-left security** and improve **release stability**
- ❖ Mentored and guided **DevOps/DevSecOps engineers**, driving standardization, automation, and operational excellence.
- ❖ Contributed to **standard DevSecOps frameworks** and reusable pipeline templates for enterprise projects.

CERTIFICATIONS

- ❖ **AWS Certified** solution architect – Associate
- ❖ **HashiCorp Certified:** Terraform Cloud and Enterprise Associate
- ❖ **Google Cloud Professional Cloud Security Engineer** – Google Cloud
- ❖ **Certified DevSecOps Engineer (CDSOE)** – DevSecOps Academy

TECHNICAL SKILL

- ❖ **Cloud Platforms:** AWS (EC2, S3, RDS, Lambda, IAM), Azure (Azure Security Center, Azure DevOps)
- ❖ **Containerization & Orchestration:** Docker, Kubernetes, Helm, OpenShift
- ❖ **DevSecOps Tools:** Jenkins, GitLab CI, Azure DevOps
- ❖ **CI/CD:** Pipeline design, Automation, Build & Deployment workflows
- ❖ **Infrastructure as Code (IaC):** Terraform, CloudFormation
- ❖ **Security Tools:** Snyk, SonarQube, Aqua Security, OWASP ZAP
- ❖ **Monitoring & Logging:** Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Splunk
- ❖ **Version Control:** Git, GitHub
- ❖ **Automation Scripting:** Python, Shell, Bash, PowerShell
- ❖ **Configuration Management:** Ansible, Puppet
- ❖ **Vulnerability Scanning & Remediation:** Nessus, OpenVAS
- ❖ **Compliance & Security Standards:** GDPR, HIPAA, SOC 2, NIST, CIS Benchmarks
- ❖ **Incident Response & Monitoring:** Security Incident Response, Threat Hunting, SIEM Tools
- ❖ **Operating Systems:** Linux (Ubuntu, CentOS), Windows Server, macOS
- ❖ **Networking:** VPNs, Firewalls, Load Balancers, DNS, HTTP/HTTPS, TCP/IP
- ❖ **Databases:** Oracle, MySQL, PostgreSQL, SQL

DevSecOps Engineer | DevOps Engineer | Platform Engineer | SRE Engineer |
Cloud Security | AWS | Azure | GCP | Kubernetes | Docker | Terraform |

Gurugram

Senior Cloud Engineer

ITC Infotech, Feb 2017 – Feb 2018

- ❖ Managed **AWS and Microsoft Azure environments**, including **VPC, EC2, Azure Monitor, CloudWatch, and CloudTrail**, ensuring stable and secure cloud operations
- ❖ Supported **cloud infrastructure operations**, maintaining **high availability, performance, and reliability** across production environments
- ❖ Assisted in **server migration projects**, handling planning, execution, and post-migration validation with minimal downtime
- ❖ Implemented and supported **monitoring and logging solutions**, improving **application visibility, alerting, and incident response**
- ❖ Participated in **incident troubleshooting** and conducted **root cause analysis (RCA)** for **production issues**
- ❖ Assisted in securing **cloud and on-prem infrastructure** through **IAM, RBAC, access controls, secrets management, and basic security hardening**
- ❖ Supported **DevOps and DevSecOps practices** by assisting in **automating build, test, and deployment pipelines**
- ❖ Automated **infrastructure provisioning and configuration** using **shell scripting** and **early Infrastructure-as-Code (IaC) practices**
- ❖ Worked closely with **development teams** to reduce **deployment failures** and improve **release stability**
- ❖ Contributed to **documentation of deployment standards, operational runbooks, SOPs, and cloud best practices**

Cloud Support Engineer

Magna Infotech, Aug 2015 – Feb 2017

- ❖ Monitored and supported **cloud environments** across **AWS and Microsoft Azure** to ensure **high availability and performance**
- ❖ Continuously tracked **system metrics, logs, and dashboards** using **cloud monitoring tools** to proactively identify issues
- ❖ Responded to **alerts, incidents, and service disruptions**, performing **root cause analysis** and **timely resolution**
- ❖ Managed **IAM and RBAC configurations**, including **user access, roles, and permissions** to ensure **secure cloud operations**
- ❖ Assisted in **incident management, escalation, and cross-functional coordination** to minimize **downtime**
- ❖ Performed regular **health checks** and **audits of cloud resources** to maintain **compliance** and **best practices**
- ❖ Documented **incidents, resolutions, and standard operating procedures (SOPs)** for effective **knowledge sharing**

Key Technologies:

- ❖ CI/CD Tools: **Jenkins, GitLab CI**
- ❖ Cloud Platforms: **AWS (EC2, S3, Lambda, IAM)**
- ❖ Containerization: **Docker, Kubernetes, OpenShift**
- ❖ Security Tools: **SonarQube, Snyk, Aqua Security**
- ❖ Infrastructure as Code (IaC): **Terraform, Ansible**

Responsibilities & Achievements:

- ❖ **CI/CD Pipeline Design**: Automated code build, testing, and deployment using **Jenkins** and **GitLab CI**, **reducing deployment times by 40%**.
- ❖ **Security Integration**: Integrated static and dynamic application security testing (**SAST/DAST**) into the pipeline with **SonarQube** and **Snyk** for early **vulnerability** detection.
- ❖ **Containerization & Orchestration**: Deployed microservices in **Docker containers** and orchestrated using **Kubernetes** and **OpenShift** improving **scalability** and reducing deployment errors.
- ❖ **Compliance Automation**: Automated security and compliance checks using **Terraform** and **Ansible**, ensuring adherence to industry standards (**SOC 2, GDPR**).
- ❖ Managed containerized application deployments and scaling using **Red Hat OpenShift**, ensuring **high availability** and streamlined CI/CD workflows.
- ❖ Implemented **GitOps deployment models** using **ArgoCD/Flux** for auditable and reliable releases.
- ❖ Led **incident management, RCA, and post-mortems**, reducing **MTTR by 40%+**.
- ❖ Embedded **cloud and application security** practices, reducing vulnerabilities by **50%+**.

Soft Skills

- ❖ **Team Leadership and Mentoring**
- ❖ **Strong Collaboration, Communication Skills, Problem-Solving and Troubleshooting**
- ❖ **Agile & Scrum Experience**

Education

- ❖ **Bachelor of Computer, 2015**
