Risk & Governance	Risk Identification · Business Impact Analysis · RAID Logs · Compliance · Regulatory Reporting
Agile & Delivery	Scrum · Kanban · Sprint Planning · UAT Coordination · Integration Testing · Defect Tracking · Go-Live Support
Tools	JIRA · Confluence · ServiceNow · Advanced Excel (VBA, Pivots) · SQL · Power BI · Tableau, Pandas, Numpy

PROFESSIONAL EXPERIENCE

Senior Business Analyst

Virtusa Consulting Services Pvt. Ltd. · Hyderabad

April 2022 – August 2026

Business Analyst and technology consultant across 3 programmes at 2 global banks — translating complex business requirements into technology solutions, driving data-driven decision making, and delivering end-to-end change across regulatory, analytics, and integration workstreams in Agile environments.

ANZ Bank — Deposit Management System

Business Analyst | Singapore & Hong Kong

January 2025 – August 2026

- Liaised between ANZ business users and technology teams to define functional specs for SWIFT MT320 Inward & Outward message flows — produced process maps, user stories, and acceptance criteria across Agile sprints.
- Identified and communicated business impacts and risks of system changes — assessed field-level validation gaps and multi-region transaction flow implications (SG, HK) prior to deployment, preventing production incidents.
- Developed and executed 800+ integration test scripts — tracked defects and validated remediation through to release readiness and go-live.

Citibank — Accounting Standardisation Workbench (ASW) / Controller Data Tool (CDT)

Business Analyst | Consent Order Analytics Platform | CBNA UK & Citigroup Global

January 2023 – July 2024

- Led end-to-end requirements gathering for a consent order driven analytics platform — conducted stakeholder workshops across Citigroup and CBNA UK, formulated system scope, and translated findings into detailed BRDs, functional specs, and data models.
- Defined and operationalised a self-service analytics platform (CDT) enabling finance controllers to create use cases to bifurcate and analyse balance sheet positions — replacing manual, error-prone Excel-based reporting across Citigroup globally.
- Managed data pipeline requirements across four source systems (SFTP, NAS, Couchbase, ISG Cloud) through a Bronze-Silver-Gold medallion architecture — ensuring clean, standardised, and business-logic-ready data for Tableau dashboards.

- Built Tableau dashboards for KPI and governance reporting — balance sheet balances, heat maps, and percentage breakdowns presented to senior Citi leadership.
- Coordinated requirements and delivery alignment across 4–5 cross-functional stakeholder groups; developed 500+ UAT test scripts, tracked defects, and supported go-live.

Citibank — PCAT Stability Team

Business Analyst | Risk Analysis & Process Improvement | Citigroup

April 2022 – December 2022

- Analysed complex system stability issues — conducted in-depth evaluation of processes, systems, and industry standards; identified root causes and recommended solutions to improve operational efficiency.
- Maintained governance and RAID logs, tracked remediation progress, and escalated risks and control issues with full transparency; prepared weekly status reports for senior Citi leadership.

KEY HIGHLIGHTS

- Consent order delivery experience at Citigroup — built and delivered a regulatory analytics platform replacing manual balance sheet reporting, directly addressing a US regulator directive across CBNA UK and Citigroup global teams.
- 1,300+ test scripts executed across programmes (800 ANZ integration + 500+ Citi UAT) — consistent end-to-end testing and release delivery track record.
- Data and analytics exposure — Tableau dashboard design, Bronze-Silver-Gold data pipeline requirements, KPI reporting, and Power BI — bridging the gap between business requirements and data engineering teams.
- GenAI certified — completed Virtusa's Gen AI Consultant certification programme in July 2026, demonstrating active upskilling in emerging technology.
- Agile-first practitioner — Scrum and Kanban across all programmes; IIBA-endorsed AAC validates formal methodology expertise.
- Cross-domain adaptability — BFSI primary domain with strong analytical and consulting foundations transferable across industries including healthcare, telecom, and government.
