- Gap Analysis
- Risk & Impact Assessment
- Cross-Functional Leadership
- Workshop Facilitation
- Analytical Problem Solving
- Business Process Optimisation

WORK EXPERIENCE

Accenture India Pvt. Ltd | Oct'21 - Present

Client: Barclays

Lead Business Analyst

Owned product discovery, roadmap & scope definition while leading business analysis for the migration of European customers to a new regulated entity

- Impact Assessment: Led impact assessments across multiple workstreams within the issuing business of the entity to understand the impact of migration & cross-workstream dependency mapping.
- Workshop Facilitation: Facilitated stakeholder workshops to establish product scope, align strategic priorities, & secure stakeholder buy-in.
- External Stakeholder Collaboration: Partnered with major card payment schemes to coordinate licensing requirements, enabling seamless transition for the new entity.
- Backlog Management: Reduced requirement ambiguity by ~30–40% through structured workshops, backlog refinement, prioritised user stories and clearly defined acceptance criteria.
- Spearheaded end-to-end execution of automated refund process for CHAPS & SWIFT payment methods, achieving a ~60–70% reduction in manual effort.
- Workflow Optimisation: Improved processing throughput by 40–50% and minimised
 - operational errors through defined business rules, automated validation controls and workflow optimisation.
 - Cards & Payments / Corporate Cards: Worked hands-on on UK and European Cards & Payments programmes, with strong exposure to Corporate Card issuing, card lifecycle, payment processing and related business processes for Barclays.
 - Visa/Mastercard Scheme & Regulatory Changes: Worked with card payment schemes including Visa/Mastercard

on scheme requirements, regulatory changes and implementation activities, assessing business and system impact across the card-issuing environment.

- **Regulatory Change & Implementation:** Analysed regulatory and scheme requirements and translated them into business requirements, process changes and system enhancements, supporting implementation across UK and European markets.
- **AML & Compliance:** Worked hands-on with AML and regulatory compliance requirements within banking/card programmes, collaborating with business, compliance and technology stakeholders to ensure requirements were incorporated into the solution.
- **Risk & Control Assessment:** Performed risk and impact assessments for regulatory and business changes, identifying process/control gaps, assessing downstream impacts and defining remediation requirements.
- **Regulatory Control Framework:** Supported the definition and implementation of regulatory controls across card/payment processes, ensuring business rules, system workflows and operational processes remained aligned with applicable regulatory requirements.
- **UAT & Compliance Validation:** Led/coordinated SIT/UAT, defect management, business validation and sign-off for regulatory and card-payment changes, ensuring implemented requirements met business, compliance and scheme expectations.
- **Regulatory Traceability:** Maintained requirement traceability from regulatory/scheme requirements through functional requirements, development, testing and UAT sign-off, ensuring complete implementation coverage.
- **UK & Europe Regulatory Rollout:** Supported country/market-specific implementation of regulatory and card-payment changes across UK and European markets, coordinating dependencies across business, technology, compliance and testing teams.

- **Delivery Governance:** Translated business goals into actionable epics, wireframes, and acceptance criteria (DoD/DoR), preventing scope creep and reducing development rework.
- **Team Alignment:** Collaborated with Solution Architects to validate design against business requirements and guided Scrum squads during sprint delivery to align technical implementation with roadmap goals.
- Contributed as a Business Analyst to build a centralised customer data platform for the Big Three PSUs
- **Functional Logic Modelling:** Defined deduplication logic to identify duplicate customers;
- Reduced revenue leakage and improved subsidy governance.
- **Requirements Articulation:** Conducted in-person and virtual workshops with cross-functional stakeholders, authoring comprehensive BRD & FRD documentation with clear functional specifications.
- **Data Mapping & API Design:** Supported data mapping activities and defined API request/response structures.
- Participated as a Business Analyst in developing a Product/Process Licensing platform for a Medical and Healthcare Regulatory agency.
- **End-to-End Journey & Workflow Design:** Supported in defining the end-to-end application journey; Designed workflows for submission, validation, and status tracking of applications.
- **System Integration:** Ensured integration of the application submission with backend approval systems

Meditab India Pvt. Ltd | Jan'21 - Sept'21

Product Analyst

- Owned the EHR system enhancement and feature delivery for lab modules and seamless HL7 integrations
- Managed end-to-end backlog grooming and sprint planning, establishing clear Definition of Ready (DoR) standards
- Led User Acceptance Testing (UAT) sign-offs & defect triage to ensure high product quality

Softweb Solutions Pvt. Ltd | Jun'16 - Jan'21

Business Analyst (Presales/Postsales)

- Worked as a BA on various enterprise application projects, understanding & translating business needs into clear & actionable requirements.
- Created user stories, wireframes, and process flows.
- Supported pre-sales activities such as use case feasibility analysis, solutioning & WBS.
- Contributed to product ideation & implementation strategies, particularly in IoT; conducted market research & competitive analysis for informed decision-making.
