

NANDARAJSATISH P A

SENIOR PROJECTS MANAGER / FINTECH DELIVERY LEADER

Email: anmonaar@gmail.com | Mobile: +91 9940592418 | Location: Chennai, India

PROFESSIONAL SUMMARY

Accomplished and result-driven Senior Projects Manager with 14+ years of extensive experience leading complex, cross-functional software development and digital transformation initiatives across the Banking and Financial Technology sectors. Proven track record of delivering end-to-end technology programs spanning Global Transaction Banking (iGTB), Core Banking (iGCB), Investment Banking, Corporate Lending, Cash Management, Treasury, and Payments for Tier-1 global financial institutions. Strong expertise in driving large-scale banking transformation, ISO 20022-compliant payment solutions, enterprise application modernization, and digital banking initiatives. Expert in Agile, Waterfall, and hybrid project methodologies with a hands-on approach to stakeholder management, multi-million-dollar resource optimization, architecture alignment, risk mitigation, and cross-functional technology leadership.

CORE COMPETENCIES & TECHNICAL SKILLS

Management: End-to-End Project Ownership, Agile/Scrum/Waterfall, Risk Mitigation, Stakeholder Management (CXO Level), Resource Planning, Budget & Scope Management, Cross-Functional Team Leadership

Banking Domains: Global Transaction Banking (iGTB), Investment Banking, Core Banking (iGCB), Corporate Lending, Cash Management, Treasury, ISO 20022 Compliance, Real-Time Payment Standards.

Languages & Frameworks: Java EE, Spring, Spring Boot, Microservices, RESTful APIs, Struts 2.0, Hibernate, Scala, Node.js

DevOps & Cloud: Docker, Jenkins CI/CD, Kafka, Zookeeper, JFrog, Tomcat, WebSphere, JBOSS

Databases & Tools: Oracle, MySQL, PostgreSQL, MongoDB, PL/SQL, Git, TortoiseSVN, JIRA, Postman, Rest Assured

Monitoring & Quality: Prometheus, Grafana, SonarQube, SonarLint

Clients: MBSB Berhad, Dubai Islamic Bank (DIB), VCB, Citi Bank, Morgan Stanley, Credit Suisse, Bank of Montreal (Loan IQ) – delivering solutions across Transaction Banking, Core Banking, Corporate Lending, and Investment Banking.

Domain Expertise: Global Transaction Banking | Core Banking | Investment Banking | Commercial Lending | Treasury | Cash Management | Payments | ISO 20022.

PROFESSIONAL EXPERIENCE

Intellect Design Arena Pvt Ltd

Senior Projects Manager — iGTB & Digital Banking Platforms

May 2024 – Present

- Own end-to-end delivery of global transaction banking and core banking solutions across proprietary platforms including iGTB, iGCB, eMach, Purple Fabric, and Capital Alpha.
- Drive project lifecycles from initiation to production rollout for major regional and Tier-1 global banks (including MBSB, VCB, VP, DIB, QNB, BBK, HLBB).
- Engage directly with client CXOs and steering committees to report delivery health, manage key milestones, and mitigate strategic implementation risks.
- Lead multi-disciplinary teams composed of Business Analysts, Solution Architects, Developers, QA, and DevOps engineers across APAC, EMEA, and the Americas.
- Ensure scalable, regulatory-compliant, and high-performance system integrations conforming to ISO 20022 and real-time payment frameworks.

Loma Technology, Cambodia

Technical Lead

Project: KK Exchange, Platform & Tele-bet Systems

Nov 2022 – March 2024

- Defined technical architecture, scope of work, and delivery timelines using Agile Scrum models.
- Led frontend and backend engineering teams to construct highly responsive microservices handling real-time multi-currency exchange fluctuations.

- Built robust Proof-of-Concepts (POCs) for microservices scaling and automated deployment pipelines.
- **Technology Stack:** Java 17, Spring Boot, Microservices, REST API, MySQL, Hibernate, Docker, Redis, Prometheus, Grafana, Jenkins, Jira, SonarQube.

Orion Innovation Pvt Ltd (Client: Fiserv Inc.)

Senior Java API Developer / Tech Lead Consultant

July 2021 – Nov 2022

Project: Bank Intelligence (BI) Platform

- Designed and deployed enterprise-grade RESTful web services providing advanced spatial and financial investment insights for banking branches.
- Collaborated closely with UI teams (React/Node.js) to streamline structural API payloads and system performance.
- Established automated API test suites using Rest Assured framework, minimizing manual UAT cycles by 30%.
- **Technology Stack:** Java 11, Spring Boot, Microservices, Node.js, Oracle, Hibernate, Docker, Git, Maven, Rest Assured, SonarQube, JIRA.

Eagle Software India Pvt Ltd (Client: Government of Haryana)

Technical Lead

June 2018 – July 2021

Project: Smart City Mission Karnal (KSCL) & eDLVRS (Govt of Nepal)

- Directed an engineering group building the Integrated Control, Command, and Traffic Management System for KSCL.
- Architected the end-to-end eDLVRS Vehicle Registration and administrative lifecycle software to automate large-scale public data registries.
- Managed client communication, sprint allocation, code reviews, and cross-functional integration milestones.
- **Technology Stack:** Java 8/7, Spring Boot, Spring Security, Struts 2.0, MongoDB, Oracle 11g, Swing, TortoiseSVN, Tomcat.

Personal Sabbatical

Family Caregiving & Health Management

May 2017 – June 2018

- Dedicated a temporary sabbatical to managing critical family healthcare affairs and supporting parental medical needs.
- Maintained technical currency during this period through self-paced research into cloud infrastructure, modern REST API methodologies, and architectural delivery frameworks.

Virtusa Inc.

Associate Consultant / Application Programmers Lead

Oct 2013 – May 2017

Clients: Bank of Montreal (Commercial Lending) & Credit Suisse (Investment Banking Risk Repository). Worked on enterprise applications supporting syndicated lending, market risk identification, reporting, and production release management.

- Implemented Misys Loan IQ configurations to streamline complex syndicated and commercial lending workflows.
- Spearheaded development of Core Java enterprise components for risk identification, market scenario prioritization, and automated reporting.
- Managed build/release activities across UAT and production environments, stabilizing critical financial systems.

KSAB Software

Software Engineer

March 2010 – Oct 2013

- Developed core web applications using Java/JEE technologies, handling database programming, bug fixes, and unit testing.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science & Engineering

Sathyabama University, Chennai

Graduated: 2008 (First Class — 70%)
