WORK EXPERIENCE

THB (Technology|Health Care|Big Data Analytics) | *Senior Backend Engineer* 07/2022 – Present/

- Designed and developed an enterprise **Slot Management** and **Appointment Booking platform** for India's largest hospital chains (**Max Healthcare, Medanta**), processing **6M+ appointments annually** across **15+ locations** with unified **real-time slot management**, replacing **legacy infrastructure** and reducing **administrative overhead by 40%**.
- Implemented **bidirectional integration** on **on-premises servers** to synchronize data between THB's platform, hospital **HIS systems**, and **third-party vendors**, achieving **zero data loss** across all connected systems.
- Designed and implemented a **centralized concurrency management layer** that reduced **development overhead** and became a **widely adopted utility** across the engineering team.
- Designed and developed a flexible **fallback mechanism** for **on-premises servers** to process consumer events, replacing **multiple special-case cron jobs** with a **single generalized solution**.
- Designed developed **RESTful API ecosystem** with consistent patterns clear documentation using **NestJS** and **TypeScript**, implementing **request validation middleware**, **error handling patterns**, and **API versioning strategies** that reduced integration time for new hospital partners from **2 weeks to 3 days**.

Kindlife | *Founding Engineer* 02/2021 – 07/2022

- Designed automated **order shipment system** improving delivery processing from **3 days to minutes**, scaling from **150 orders/day to real-time processing** using **PHP, MySQL, and AWS SQS**.
- Redesigned payment flow architecture resulting in **20% increase** in online payment completion rates and built **reward point system** increasing user engagement by **40%**.
- Designed and developed **product and brand tagging** integration between commerce website and community platform, enabling seamless content cross-referencing.
- Collaborated with founders on **order status feature requirements** and developed **state machine** for order lifecycle management, improving order tracking transparency.

Twango Social Network Pvt. Ltd. | *Backend Developer* 10/2019 – 01/2021

- Optimized API response times from **600ms to 300ms** and designed **asynchronous processing mechanisms**, improving system performance and implementing automated training **REST APIs** for sales teams.
- Led **technology migration** from **PHP to Node.js** and built internal automation systems for lead distribution and customer support operations.

SKILLS

- Backend Technologies** | NestJS | Node.js | TypeScript | Java | Python | Express | PHP | Laravel
- Databases & Storage** | PostgreSQL | MySQL | MongoDB | DynamoDB | Redis | Database Design
- AWS & Cloud** | Lambda | ECS | CloudWatch | CodeBuild | CodeCommit | SQS | SES | S3 | Athena
- Architecture & Development** | RESTful APIs | System Integration | CI/CD | Jenkins | Docker | Git | Agile
- AI/ML Technologies** | LangChain | RAG | Vector DB | Supabase | ComfyUI | Flux | AI Model Fine-tuning

PROJECTS

Blaze - AI-Powered Development Automation | *Personal Project* | **Open Source** Present

- Built **Blaze** — an **open-source AI-powered Slack bot** that automates end-to-end code changes by fetching **Jira/Linear tickets**, generating implementation plans via **LLM**, and opening reviewed **PRs** from a **Docker sandbox** with **zero manual setup**.

Hubby.ai - AI Relationship Assistant | *Personal Project* 2024

- Built **AI chatbot backend** using **Node.js, LangChain, RAG architecture, vector database**, and **Supabase** integration for relationship guidance and communication assistance.

Wingardium - AI Image Generation | *Personal Project* 2024

- Fine-tuned image models on **Flux** and created AI workflows using **ComfyUI** for customized visual outputs, generating **production-grade product images** deployed across live e-commerce platforms (**Zepto, Calae**).

EDUCATION

Indian Institute of Information Technology Kota | 07/2014 – 05/2018

B.Tech

AI-DRIVEN DEVELOPMENT & AUTOMATION

- Building **intelligent automation agents** and **AI-powered workflows** that eliminate repetitive tasks and accelerate development cycles, with expertise in **LLM orchestration, prompt engineering**, and **agentic systems** using **Claude, Cursor**, and **GitHub Copilot**.
