SUMMARY

Senior Business Analyst with 5+ years of experience across BFSI, Regulatory Compliance, Digital Transformation, HR-Tech and AI-driven solutions, with strong experience in translating complex business requirements into functional specifications and technology deliverables.

Currently experienced in supporting Citi Bank programs through Genpact, working across Risk & Compliance, Regulatory Transformation, Data Governance, Control Governance and Business Process Transformation. Strong expertise in requirements elicitation, BRD/FRD/SRS documentation, user stories, process mapping, gap analysis, stakeholder management, UAT and requirements traceability.

Experienced in working with senior stakeholders including VPs, AVPs and Directors, as well as cross-functional teams across Business, Technology, Data Engineering, QA and Analytics. Strong understanding of Agile/Scrum, Kanban and Waterfall delivery methodologies, with hands-on exposure to JIRA, Confluence, SQL, Power BI, Tableau, Visio and Lucidchart.

EDUCATION

Biju Patnaik University of Technology (BPUT)

Bachelor of Technology (B.Tech) – Computer Science 2013

CBSE

Class XII – Science 2008

CBSE

Class X – Science 2006

EXPERIENCE

Business Analyst – BFSI | Citi Bank

Dec 2024 – Apr 2026 Bengaluru

GENPACT

- Supported Citi Bank's Digital Transformation and Regulatory Compliance initiatives, working with business and technology stakeholders to translate regulatory and business requirements into actionable technology deliverables.
- Led end-to-end requirement engineering, conducting requirement elicitation sessions with 15+ global stakeholders and converting complex business requirements into BRDs, FRDs, user stories and functional specifications.
- Worked within the Risk & Compliance / Control Governance environment, supporting Second Line of Defense (2LOD) activities across business functions and ensuring alignment with governance and regulatory requirements.
- Translated regulatory requirements covering areas such as BSA/AML, KYC and Dodd-Frank into business requirements, process changes and Agile user stories.
- Performed AS-IS / TO-BE analysis, gap analysis and process modelling using Visio and Lucidchart to identify process inefficiencies, control gaps and opportunities for operational improvement.
- Collaborated with 1LOD, 2LOD and 3LOD stakeholders, Data Engineering, QA and Analytics teams to drive requirements clarification, issue resolution and delivery across geographically distributed teams.
- Managed 5 concurrent workstreams within an Agile/Scrum environment, supporting sprint planning, backlog grooming, requirement prioritization and delivery tracking.
- Maintained the Requirements Traceability Matrix (RTM) to ensure complete traceability between business requirements, functional requirements, test scenarios and delivered functionality.

- Planned and coordinated UAT activities, including test scenario preparation, business validation, defect triage and stakeholder sign-off, contributing to zero critical defect leakage into production.
- Performed SQL-based data validation to verify data accuracy and integrity for regulatory reporting and governance requirements.
- Supported Data Governance and Data Quality initiatives, including data lineage documentation, data mapping and validation of critical reporting data.
- Conducted Root Cause Analysis (RCA) for business and process issues and coordinated with relevant stakeholders to define corrective actions.
- Developed Power BI and Tableau dashboards for program leadership, improving visibility into project health and reducing manual status-reporting effort by approximately 40%.
- Managed stakeholder communication with VP, AVP and Director-level stakeholders, ensuring timely escalation, decision-making and resolution of project risks and issues.
- Supported risk and issue management, change management and delivery governance across multiple transformation initiatives.

Business Analyst – ERP | HRMS & Payroll Management System

Aug 2022 – Sep 2024

AMAZE INC

Bengaluru

- Led business analysis activities for a cloud-based HRMS and Payroll ERP, covering requirements gathering, process analysis, functional documentation, testing and implementation.
- Conducted requirement elicitation sessions with business stakeholders and translated HR and Finance requirements into BRDs, functional specifications, user stories and process flows.
- Developed AS-IS / TO-BE process maps and wireframes to define future-state workflows for payroll automation and employee self-service modules.
- Collaborated with Product, UI/UX and Engineering teams to clarify requirements, resolve functional gaps and ensure alignment between business expectations and technical implementation.
- Managed product backlog and supported sprint planning, backlog grooming and prioritization within a Scrum environment using JIRA.
- Coordinated UAT cycles, including test case preparation, defect triage, business validation and stakeholder sign-off.
- Analysed payroll calculation processes and supported implementation of automated calculation logic, contributing to a 30% reduction in manual payroll errors.
- Worked closely with cross-functional teams throughout the product lifecycle from requirements and design through development, testing and go-live.

Business Analyst – AI Hiring Automation Project

Feb 2022 – Aug 2022

RCHILLI INC

Mohali

- Gathered and analysed business and functional requirements for a SaaS-based AI-driven recruitment and hiring automation platform.
- Worked on requirements related to Resume Parser and automated candidate data extraction, focusing on improving accuracy and usability of candidate information.
- Developed functional specifications, workflow diagrams and process documentation for automated recruitment processes.
- Collaborated with technical teams to translate business requirements into system functionality and identify process improvements.
- Analysed recruitment workflows and supported the design of automated candidate matching, screening and data extraction processes.

TECHNICAL SKILLS

Business Analysis & Requirement Engineering

Requirement Elicitation & Stakeholder Management

BRD / FRD / SRS Documentation

User Stories & Acceptance Criteria

Functional & Business Requirements

AS-IS / TO-BE Process Mapping

Gap Analysis & Process Optimization
Business Process Modelling
BPMN / UML / Process Flow Design
Regulatory & Compliance Transformation
Risk & Control Governance
Data Governance & Data Quality
Data Lineage & Regulatory Reporting
UAT Planning & Execution
Test Cases & Defect Management
Requirements Traceability Matrix (RTM)
Root Cause Analysis
Agile / Scrum / Kanban / Waterfall
Sprint Planning & Backlog Grooming
Project & Delivery Management
Cross-functional & Global Stakeholder Management
SQL & Data Validation
Power BI / Tableau / Advanced Excel

CERTIFICATIONS

Google Data Analytics Professional Certificate
Scrum Master & Agile Certification
JIRA Certification

TOOLS & TECHNOLOGIES

Business Analysis: BRD, FRD, SRS, User Stories, Use Cases, Acceptance Criteria, RTM, Requirement Traceability,
Gap Analysis Process & Modelling: MS Visio, Lucidchart, Miro, BPMN, UML, Process Flow, AS-IS / TO-BE
Mapping Project & Agile: JIRA, Confluence, MS Project, Trello, Agile, Scrum, Kanban, Waterfall, Sprint Planning,
Backlog Grooming Data & Analytics: SQL Server, Advanced Excel, VLOOKUP, Power Query, Power BI, Tableau
Modern Technology: Generative AI, Prompt Engineering, Agentic AI, API Documentation, Microservices
Architecture, Cloud Adoption Productivity: Microsoft Office 365
