Profile Summary

Results-driven Software Engineer with 3+ years of experience in frontend development and full-stack web applications. Specialized in Angular framework with strong expertise in HTML5, CSS3, JavaScript, TypeScript, and modern development practices. Proven track record in developing scalable web applications for Finance, Banking, and Healthcare domains. Skilled in Agile methodologies, RESTful services integration, and responsive UI development with excellent problem-solving capabilities.

Professional Skill

Frontend Technologies:

HTML5, CSS3, JavaScript, TypeScript, Angular 16,18,19, Bootstrap, Angular Material, Reactive Forms, Single Page Applications(SPA),Nodejs,RXJS,Jest,SCSS

Backend & Languages:

Java, C, C++, Spring Boot, Hibernate, RESTful Web Services, JSON,Azure XML,AWS,, MySQL, Vb..net, SQL

Development Tools:

Visual Studio Code, Angular CLI, WebStorm, Notepad++, NetBeans,JUnit, Automation Testing,Unit testing tools, Git, GitHub, GitBash, Bitbucket, JIRA, SonarQube, Checkmarx, Nexus, ESLint,Figma, Optimization,UI/UX

Education

Mahendra Institute of Technology, Salem

Bachelor of Engineering in Computer Science and Engineering

2021-2023

PROFESSIONAL EXPERIENCE

Creative Synergies Group

Angular Consultant

Project: Sales force for student course details

2025-Present

TVM INFO TECH PVT LTD, Chennai

Software Engineer

Project: Task Management System

Technologies: HTML5, CSS3, JavaScript, Angular, Java, RESTful APIs

Developed a comprehensive employee task management application enabling time tracking, task monitoring, and ticket management system. Implemented modules for Dashboard, Employee Management, Client Management, Site Management, Tickets, Jobs, and Locations.

Project: VPA NG (Finance & Banking)

Technologies: Angular 10, Angular Material, Bootstrap, Java, Hibernate, Spring Boot

Designed and developed internal admin application for finance and banking operations. Implemented modules for Suppliers Management, Payment Processing, Account Transaction History, and VPA Automation Payables with enhanced user experience and data security.

Project: IFIS (Indian Farmer Information System)

Technologies: Angular (Latest Version), Angular Material, Bootstrap, RESTful Services

Built a revolutionary tech platform for collecting and analyzing smallholder farm data. Transformed manual data collection processes into digital solutions, providing detailed farm information and analytics for remote area farmers.

Technical Infromation

- **Domain Expertise:** Finance & Banking, Healthcare, Facility Management Systems
- **Soft Skills:** Strong analytical and problem-solving abilities, excellent communication, team collaboration, quick learner, self-motivated
Operating Systems: Windows XP/7/10, Linux Web Development: Building interactive portfolio websites, Single Page Applications (SPAs), API Integration, Performance , Optimization, User-Centric Design, State Management (NgRx).
- **GenAI & Emerging Tech:** Prompt Engineering, GenAI-based UI/UX Prototyping, Chatbot Integration, Workflow Automation, AI-driven Code Assistance

KEY ACHIEVEMENTS

- Successfully delivered multiple frontend applications with zero production bugs
- Improved application performance by 30% through code optimization and best practices
- Led frontend development initiatives and mentored junior developers
- Recognized for exceptional problem-solving skills and timely project delivery
