Professional Experience

VIRTUSA | Lead Business Analyst (Client: Citi Bank)

Jul'23 – Present

Currently working at **Virtusa** as **Lead Business Analyst** associated with **CITI Bank** projects for Modernizing the legacy systems – Credit risk rating for HNI/UHNI's; NAV bulk Upload; Digital Credit Memo & Quality Control Checklist and UNCO (Unused Commitment Amount) to meet the OPTIMA, CRE CCAR reporting requirements of the bank.

- Lead end-to-end development of Trade Lifecycle in building Global Lending System Risk Rating User Interface common to all the regions across globe for CITI BANK 's HNI/UHNI customer risk rating. This is an automated unified digital interface which reduces manual effort

and improved compliance (OPTIMA reporting compliance) across APAC, EMEA, and NAM regions.

- Collaborated with engineering team to digitalize the manual Credit Memo and Quality Control Checklist, which involved the re-design of the credit workflows, driving architectural decisions to improve the system scalability and data integrity.
- Involved in Data & Automation –Designed the logic for auto updating the NAV bulk uploads and for calculating the Un-used commitment amounts ensuring accurate data flow to downstream reporting systems for critical CCAR/OPTIMA reporting.
- Worked On Fixed Income, Equities, Derivatives

TECH MAHINDRA | Business Analyst/Technical Lead) Jan'22 – Jul'23

Worked at **Tech Mahindra** as Business Analyst/Technical Lead associated with Bank of Nova Scotia project for modernizing the platform to comply with Canadian regulations for KYC & AML. As part of this project the existing manual process of capturing KYC/ AML attributes is digitized to comply with CDD- Customer Due Diligence, KYC- Know Your Customer which form core compliance under AML to verify client identities and assessing risks, while STR- Suspicious Transaction Report flags the potential money laundering both are part of regulatory compliance under OSFI AML regulations in Canadian Banking system.

INDIAN OVERSEAS BANK | Chennai, India Jun 2014 – Jan 2022

Worked at Indian Overseas Bank for 8 years doubled up as Product Owner and Business Analyst, associated in

- Roll –out of Core Banking Solution Finacle (10.2). Lead the digital adaption by acting as SPOC between branch and central development team. Also involved in creating the SOP for product release and conducted training workshops for branch staff to ensure high adoption rates of the new eco-system.
- Implemented AML and fraud screening processes aligned with RBI guidelines.
- Spearheaded launch of Mobile & Internet Banking applications, enabling UPI, Cards, Wallets, and Net Banking payment modes.
- Managed payment initiation, authorization, success/failure handling, refunds, reversals, disputes, and chargebacks.
- Optimized transaction success rates by redesigning retry logic and improving customer payment experience.
- Collaborated with banks and payment gateways to integrate UPI PSPs, card networks, and secure APIs for payment initiation and status checks.
- Implemented OAuth, API keys, and encryption mechanisms to ensure secure authentication.
- Designed routing logic and failover mechanisms to maintain SLA adherence and uptime optimization.
- Managed **T+0/T+1/T+2 settlement cycles**, including gross vs net settlement calculations.
- Applied **MDR, platform fees, and GST deductions** for merchant transactions.
- Coordinated with banks for settlement file processing and handled exceptions/failed settlements.
- Gather user requirements, mapped them to product features and identified functional gaps in launching the Mobile Banking and Internet Banking application from Zero- to- one across the bank's customer base catering to both individuals and Entities.
- Lead end-to-end development in the transition of manual work flows to digital for Online Loan Processing across Product line (include Retail, Commercial and Agri loan products) which helped in reduced TAT across product category.

- Designed spreadsheet based BI dashboards to monitor the product level profitability and branch –level KPI trends, presenting actionable insights to senior – management for strategic decision making.
- Managed high-value Forex and Derivative products for corporate clients, ensuring compliance with regulatory risk parameters.
- In-charge of reporting CRR, SLR and other mandatory parameters to regulatory on daily basis at bank level, to comply with regulatory risk compliance of RBI.
