Targeting challenging assignments in Cisco ACI, SD-WAN & Project Manager in IT Infra structure with an organization of high repute.

Education

- 2016 | 73.6
B.Tech. (CSE) from RGPV
- 2012 | 62.8
XII from BSEB

Core Competencies

Project Management in Data center\Network Infrastructure

Cisco ACI (Leaf, Spine, APIC)
Cisco Viptela SD-WAN

Routing, Switching, Firewalls,
Wireless, F5 load balancer

Compliance & Governance of
Network and Data center

Automation Tools (Postman,
Ansible and Python)

Personal Details

Address: 68 Bheem Nagar,
Vartak Nagar,
Thane 400606

Date of Birth: 12th August 1995

Languages Known: English, Hindi,
And Bhojpuri

Marital Status: Single

Driving License: DL-
MH40/0112531/
2024

Nationality: Indian

No. of Dependents 4 Members

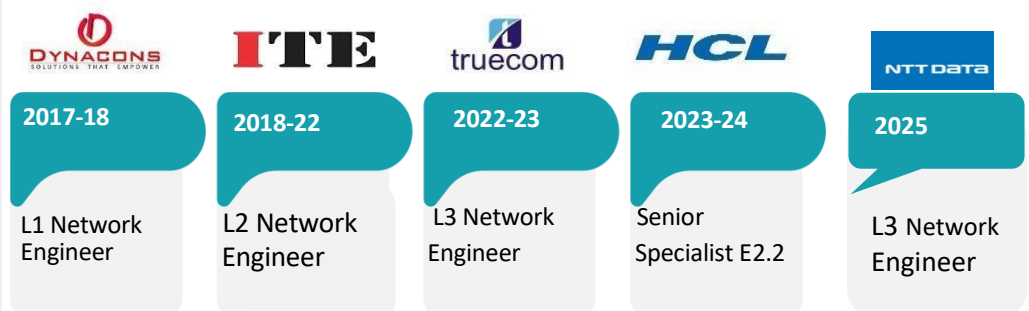

Passport Number: R0076291

Passport Validity: 27th July 2027

Profile Summary

- A competent professional with over 8.5 years of experience in the IT industry, Specializing in Project Management in IT Infra & ACI Data center and NOC Operations activities
- Previous working at NTT DATA**, engaged in Project Management and resolving technical challenges on client site at National Stocks Exchange on daily basis.
- Executing Production and Co-Location project for **NSE (National Stocks Exchange of India)**.
- Led multiple projects of **The Indian Air Force, Indian Navy and India Army** of various initiatives Collaborated on PAN India.
- with involving surveying and architecting sites for the nuclear power corporation limited of India and managed projects for the Reserve Bank of India and EXIM Bank.
- Successfully handled global projects with international clients and engineers.
- Led the **Design, and implementing high-availability network architectures** in Network enhancing in process management and change management as per Client's expectations.
- configuration and troubleshooting of **BGP, OSPF, HSRP/VRRP, VPN GRE, IPSEC, SSL and MPLS** networks.
- Cisco SD-WAN (Viptela)**- deployment, policy creation, application-aware routing, and troubleshooting, monitored network performance closely, identifying areas enhancement.
- Cisco ACI**- fabric deployment, tenant configuration, contracts, VRFs, bridge domains, and endpoint troubleshooting and integrated network hardware and software, ensuring security measures were in place.
- Firewalls- (Cisco FTD/ASA, Palo-alto, FortiGate and Checkpoint)** policy management, VPN implementation, NAT configuration, and security hardening. Network monitoring, capacity planning, traffic analysis, and performance optimization.
- Recently accomplished a significant milestone in enhancing network efficiency, resulting in improved client satisfaction.
- Incident handling and resolution within SLA-driven enterprise environments. Change management, documentation, and cross-functional team collaboration.

Career Timeline

Institutional Certifications at Apron institute of technology, Noida.

- Cisco Certified Network Associate (CCNA) in Routing and Switching.
- Cisco Certified Network Professional (CCNP) in Routing and Switching.
- Cisco Certified Internetwork Expert (CCIE) in Routing and Switching.

Work Experience

NTT DATA India Pvt. Ltd, Mumbai | January 2025 to February 2026, Networking Managed Service Engineer – L3

Responsibilities:

- Project Planning and Design for Network Project Management, initiate and plan of network projects, including designing network infrastructures that meet organizational needs. Handling and delivering **project actives withing timeline, Budget Management, Stakeholder Communication, Reporting and Documentation, Continuous Improvement.**
- Team Coordination with cross-functional teams, including network engineers, IT staff, and external vendors, to ensure project deliverables are meet on time and within budget.
- Implementation & Monitoring and Overseeing the running activities of network solutions, monitoring project progress, manage risks, and address any issues that arise during the project lifecycle.
- Configure and deploy ACI fabrics, policies, and application profiles. Network Troubleshooting and Support Provide advanced-level support for network-related issues, including ACI-related incidents. Troubleshoot and resolve network problems in collaboration with multiple teams and venders of the network issues on daily basis.
- Configure and deploy ACI components such as leaf/spine architecture and **ACI concepts like Tenant, EPGs, BD, Contracts, L2out, L3out AAEP, VRF, Interface profile, interface policy group, Switch profile, Switch policy group.**
- Managed and resolving on daily basis review of system logs, Devices backup & checklist, Multicast checklist and others activities to proactively catch suspicious network activity.
- Implementing and managing Network concepts like **BGP, OSPF, HSRP, VRRP, Ether channel, STP, VTP, DNS, DHCP, Multicast** Network Protocols, Network Configuration and Troubleshooting, Firewall Monitoring, Policy creation, addition and deletion.
- Proficient in routing and switching technologies, including configuration, optimization, and troubleshooting, to ensure seamless network connectivity and performance.

Previous Work Experience

HCL Technology Ltd., Nagpur | November 2023 to March 2024 (E-2.2) Senior Specialist

Responsibilities:

- Configure and deploy ACI fabrics, policies, and application profiles. Network Troubleshooting and Support Provide advanced-level support for network-related issues, including ACI-related incidents. Troubleshoot and resolve network problems in collaboration with multiple teams and venders of the network issues on daily basis.
- Configure and deploy ACI components such as leaf/spine architecture and ACI concepts like Tenant, EPGs, BD, Contracts, L2out, L3out.
- Managed and resolving on daily basis review of system logs, Devices backup & checklist, Multicast checklist and others activities to proactively catch suspicious network activity.
- Implementing and managing Network concepts like BGP, OSPF, HSRP, VRRP, Ether channel, DNS, DHCP, Multicast Network Protocols, Network Configuration and Troubleshooting, Firewall Monitoring, Policy creation, addition and deletion.
- Proficient in routing and switching technologies, including configuration, optimization, and troubleshooting, to ensure seamless network connectivity and performance.
- Utilized diverse tools for navigation, troubleshooting, and escalation when necessary.

Truecom Network Pvt. Ltd., Noida (posted in Thane, Mumbai and PAN India) | February 2022 to October 2023 (L2 & L3) Network Engineer.

Responsibilities:

- Design, plan, and implement Cisco SD-WAN & ACI solutions based on business requirements. Configure and deploy vManage, vBond / vSmart / vEdge & templates and ACI fabrics, policies, and application profiles.
- Provide advanced-level support and troubleshooting for network issues, including SD-WAN & ACI-related incidents.
- Configure and deploy ACI components such as leaf/spine architecture and ACI concepts like Tenant, EPGs, BD, Contracts, L2out, L3out
- AAEP, VRF, Interface profile, interface policy group, Switch profile, Switch policy group, VxLan and vPC.
- Data centers implementation, Configure and troubleshooting Cisco Nexus switches, ACI Leaf & Spine fabric devices.
- Proficiency in scripting and automation tools (Postman, Ansible, Python).
- Proficient in routing and switching technologies, including configuration, optimization, and troubleshooting.
- Managed & set-up multiple products such as Cisco Switches, routers, F5 Load balancer with Cisco NGFW Firewall ASA & FTD, Palo alto.
- Configured IPSEC and SSL VPN according to organization policies and conducted troubleshooting.
- Enhanced performance by resolving network problems, scheduling upgrades, and monitoring network health.
- F5 Load balancer, Installation, Upgradation and Configuration ASM / WAF and LTM GTM.

Responsibilities:

- Proficient in routing and switching technologies, including configuration, optimization, and troubleshooting.
- Managed & set-up multiple products such as Cisco Switches, routers, F5 Load balancer with Cisco NGFW Firewall ASA & FTD, Palo alto.
- Proficient in routing and switching technologies, including configuration, optimization, and troubleshooting, to ensure seamless network connectivity and performance.
- Led LAN infrastructure design, implementation and deployment of wireless network as well.
- Designed, installed, maintained, and troubleshoot Web/Email Filtering Solutions (i.e. IronPort and Websense) and Firewall Services Module (FWSM) integrated with FortiGate, Palo alto and Checkpoint NGFW Firewall.
- Updated and maintained Network Assessment and Documentation.
- Installed and configured Windows/Linux OS and software; configured MS Office/outlook and local/Network printers.
- Designed system configurations, directed installations, and maintained network performance.
- Monitored the health of all devices (Routers, Switches, and Servers) and reported findings to client.

Dynacons System and Solution Pvt. Ltd., Mumbai (Delhi NCR, PAN India) | February 2017 to April 2018(L1) Desktop and Network Support Engineer

Responsibilities:

- Installed operating systems (Windows and Linux series) and servers (Windows and Linux Servers).
- Configured and managed Local and Network printers.
- Fixed and configured basic software and drivers.
- Managed and troubleshoot MS Outlook.
- Assembled desktops and laptops.

Technical Skills

Technologies	WAN, LAN, Wireless.
Products UCS	ACI Data center, Routers, Switches, Firewall.
Servers	Cisco- C220, C240, M3, M4, M5, M6, ESXI.
Cisco Routers	1900, 2900, 3900, 800, 1800, 2800, 3800, 7200, 7600, ISR4K, ASR1K, ASR900, ASR9K.
Cisco Switches	3500, 3650, 3700, 3900, 4000, 9300, 9500, 9600, Nexus- N9K, N7K, N77, N6K, N5K, N3K, N2K.
Firewalls	Cisco ASA/FTD (1100/2100/4100), Fortinet FW (300D, 900D, 400E/F), Palo Alto FW (PA 200, 800) Policy creation, addition, deletion and modification of rule and configuration & authentication security.
Switching/LAN-	VLAN, VTP, DTP, STP, RSTP, DNS, DHCP, Ether channel, port channel, Port-security Gigabit Ethernet, 802.1q, ISL, DHCP Snooping, Storm-control.
Routing Multicasting	Protocols include Static, RIP, EIGRP, OSPF, BGP (EBGP & IBGP), VRF, HSRP/VRRP/GLBP. IGMP V2 & V3, IGMP Snooping, PIM Dense & Sparse Mode, PIM Bootstrap & Designated Router, PIM Auto-RP & RPF.
Wireless	Cisco/Aruba Wireless LAN Controller & Access Points 802.1x, WPA/WPA2 with TKIP/AES,
Load Balancing	F5 load lancer, installation, upgradation and Big-ip
ACI-Datacenter	Tenant, EPGs, BD, Contracts, L2out, L3out, application profile, switch profile
SD-WAN	Controller Installation- vBond, vSmart, vManage, vEdge & cEdge Onboarding Device.

Key Skills: - Routing and Switching Protocols Static Routing, RIP1v2, OSPF, ISIS, BGP, EBGP & IBGP, EIGRP, SNMP, VLAN, Pvlan, ACL, VSS, VTP, STP, RSTP, HSRP/VRRP, DHCP, IGMP, PIM Dense & Sparse Mode, ACL's, NAT.
