PROFESSIONAL SUMMARY

Business Analyst with **5.2+ years of Business Analysis experience** and **8.5+ years of overall experience** in Investment Banking, Capital Markets, and Banking Operations. Experienced in gathering and analyzing business requirements, stakeholder management, BRD/FRD preparation, user stories, acceptance criteria, Agile Scrum, UAT, process mapping, and business process improvement.

Possess strong domain expertise in **Global Payment Hub Modernization, Payment Processing (SWIFT, ACH, SEPA, Fedwire), Trade Lifecycle Management, OTC Derivatives, and Banking Operations**. Proven ability to bridge the gap between business stakeholders and technical teams by translating business needs into functional requirements and ensuring successful project delivery.

Experienced in conducting workshops, requirement elicitation sessions, impact analysis, gap analysis, process modelling, UAT coordination, production support, and change management. Proficient in Jira, Confluence, SQL, API analysis, Visio, Excel, and Agile methodologies to deliver scalable business solutions aligned with organizational goals.

CORE BUSINESS ANALYSIS SKILLS

- Requirement Gathering & Elicitation
- Business Requirement Document (BRD)
- Functional Requirement Document (FRD)
- User Stories
- Acceptance Criteria
- Stakeholder Management
- Requirement Analysis
- Gap Analysis
- Impact Analysis
- Process Mapping
- AS-IS / TO-BE Analysis
- Workflow Design
- Business Process Improvement
- User Acceptance Testing (UAT)

- Functional Testing Support
 - Change Request Management
 - Backlog Grooming
 - Sprint Planning
 - Agile Scrum Methodology
 - SDLC
 - Defect Management
 - Data Mapping
 - Process Documentation
 - Wireframes
 - Root Cause Analysis
 - Production Support
-

DOMAIN EXPERTISE

Banking & Payments

- Global Payment Hub
- Payment Lifecycle
- SWIFT
- ACH
- SEPA
- Fedwire
- Payment Validation
- Payment Routing
- Clearing
- Settlement
- Payment Exceptions
- Payment Investigations

Capital Markets

- Trade Lifecycle Management
- OTC Derivatives
- Trade Capture

- Trade Validation
 - Trade Settlement
 - Reconciliation
 - Exception Management
 - Margin Processing
 - Collateral Management
 - Cash Management
-

TOOLS & TECHNOLOGIES

- Jira
- Confluence
- SQL
- API Analysis
- Postman
- Microsoft Excel
- Microsoft Visio
- Microsoft Word
- Microsoft PowerPoint
- Agile Scrum

Accenture Feb – 2022 to May 2025

Role: Business Analyst

Experience: 4 Months

Project – SOP Process Improvement

Client: Barclays

Domain: Payment process | Process Improvement

Project Description

The objective of this project was to standardize and optimize operational processes by reviewing existing Standard Operating Procedures (SOPs), identifying process gaps, eliminating manual

activities, and improving operational efficiency. The project focused on enhancing workflow standardization, reducing processing time, minimizing operational risks, and improving compliance through process automation and streamlined business workflows.

Responsibilities

- Gathered business requirements from business users, payment operations teams, compliance teams, and stakeholders.
- Conducted requirement elicitation workshops to understand existing payment processes and future business needs.
- Prepared Business Requirement Documents (BRD) and Functional Requirement Documents (FRD).
- Created detailed User Stories with Acceptance Criteria for Agile delivery.
- Documented AS-IS and TO-BE business process flows for payment modernization.
- Performed Gap Analysis to identify process improvements and eliminate manual activities.
- Worked on the complete **Payment Lifecycle**, including payment initiation, validation, authorization, routing, clearing, settlement, and confirmation.
- Defined business rules for payment processing across **SWIFT, ACH, SEPA, and Fedwire** payment networks.

Environment

Domain: Payments | Process Improvement

Methodology: Agile Scrum

Tools: Jira, Confluence, Excel, Visio, PowerPoint, SQL (Basic), Postman (API Validation)

PROFESSIONAL EXPERIENCE

State Street Corporation

Role: Business Analyst

Experience: 5.2 Years

Project 1 – Global Payment Hub Modernization

Domain: Banking & Payments

Project Description

The objective of this project was to modernize the organization's payment infrastructure by replacing multiple legacy payment systems with a centralized **Global Payment Hub**. The solution enabled

seamless processing of domestic and international payments while supporting multiple payment rails such as **SWIFT, ACH, SEPA, and Fedwire**. The project focused on improving payment processing efficiency, reducing operational risk, ensuring regulatory compliance, and enhancing straight-through processing (STP).

Responsibilities

- Gathered business requirements from business users, payment operations teams, compliance teams, and stakeholders.
- Conducted requirement elicitation workshops to understand existing payment processes and future business needs.
- Prepared Business Requirement Documents (BRD) and Functional Requirement Documents (FRD).
- Created detailed User Stories with Acceptance Criteria for Agile delivery.
- Documented AS-IS and TO-BE business process flows for payment modernization.
- Performed Gap Analysis to identify process improvements and eliminate manual activities.
- Collaborated with Solution Architects and Development teams to convert business requirements into functional solutions.
- Worked on the complete **Payment Lifecycle**, including payment initiation, validation, authorization, routing, clearing, settlement, and confirmation.
- Defined business rules for payment processing across **SWIFT, ACH, SEPA, and Fedwire** payment networks.
- Participated in API requirement discussions for payment system integration with internal and external applications.
- Performed data mapping between legacy payment systems and the Global Payment Hub.
- Worked closely with Compliance and Risk teams to ensure regulatory requirements were incorporated into business requirements.
- Coordinated with QA teams during SIT to validate functional requirements.
- Prepared UAT test scenarios, reviewed test cases, supported business users during execution, and obtained business sign-off.
- Managed defects during SIT and UAT by coordinating with developers and business stakeholders.
- Participated in Agile ceremonies, including Sprint Planning, Daily Stand-up, Sprint Review, and Retrospective meetings.
- Maintained requirement traceability throughout the Software Development Life Cycle (SDLC).
- Supported production deployment, post-production validation, and issue resolution.

Project 2 – Trade Lifecycle Dashboard

Company: State Street Corporation

Role: Business Analyst

Domain: Capital Markets | Investment Banking

Project Description

The objective of this project was to develop a centralized **Trade Lifecycle Dashboard** to provide end-to-end visibility of trade activities across multiple asset classes. The dashboard enabled Front Office, Middle Office, Operations, and Management teams to monitor trade status from execution through settlement by consolidating trade information from multiple upstream and downstream systems.

The solution helped improve operational efficiency by reducing manual monitoring, identifying failed trades, tracking settlement exceptions, monitoring KPIs, and providing real-time trade status across the complete trade lifecycle.

Responsibilities

- Gathered business requirements from Front Office, Middle Office, Operations, Risk, Compliance, and Business stakeholders.
- Conducted requirement elicitation workshops to understand existing trade lifecycle processes and reporting requirements.
- Prepared Business Requirement Documents (BRD), Functional Requirement Documents (FRD), and Solution Documents.
- Created User Stories, Acceptance Criteria, and maintained Product Backlog in Jira.
- Documented AS-IS and TO-BE business process flows for Trade Lifecycle reporting.
- Performed Gap Analysis to identify process inefficiencies and automation opportunities.
- Worked with stakeholders to define dashboard requirements, KPIs, filters, reports, and business rules.
- Collaborated with Solution Architects and Development teams to translate business requirements into functional specifications.
- Analyzed the complete **Trade Lifecycle**, including Trade Capture, Trade Validation, Trade Enrichment, Allocation, Confirmation, Clearing, Settlement, and Reporting.
- Worked on OTC Derivatives and Capital Market trade workflows.
- Performed data mapping between source applications and dashboard reporting tables.
- Defined functional requirements for trade status tracking, settlement monitoring, exception management, and operational reporting.
- Worked closely with data teams to validate trade data accuracy across multiple systems.

- Supported API integration discussions for real-time trade status updates between applications.
 - Participated in SQL data validation to verify dashboard reports and business calculations.
 - Created process flow diagrams, business workflow documentation, and functional specifications.
 - Coordinated with QA teams during SIT to validate functional requirements.
 - Prepared UAT scenarios and supported business users during User Acceptance Testing.
 - Logged defects, prioritized issues, and coordinated with developers until successful resolution.
 - Validated dashboard reports against business expectations before production deployment.
 - Managed change requests and analyzed business impact for new dashboard enhancements.
 - Conducted stakeholder walkthrough sessions and requirement review meetings.
 - Participated in Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective meetings.
 - Supported production deployment, smoke testing, and post-production issue resolution.
 - Collaborated with Operations teams to ensure dashboard functionality aligned with daily trade processing activities.
 - Worked closely with Project Managers and Product Owners to prioritize business requirements and deliver project milestones on schedule.
-

HSBC

Role: Operations Analyst

Experience: 3.2 Years

Domain: OTC Derivatives | Trade Lifecycle Management | Investment Banking Operations

Project – OTC Derivatives Trade Lifecycle Operations

Project Description

Worked in Investment Banking Operations supporting OTC Derivatives and Trade Lifecycle processes for global financial markets. Responsible for ensuring smooth execution of post-trade operational activities including trade validation, reconciliation, settlement support, exception management, reporting, and stakeholder coordination while maintaining operational accuracy and regulatory compliance.

Responsibilities

- Managed end-to-end post-trade operational activities for OTC Derivatives transactions.
 - Monitored the complete Trade Lifecycle from trade booking through settlement and reporting.
 - Performed trade validation to ensure transaction details were accurate before downstream processing.
 - Supported trade settlement activities by coordinating with internal operations teams and counterparties.
 - Investigated trade exceptions and worked towards timely resolution to avoid settlement failures.
 - Performed daily cash, trade, and position reconciliations to identify and resolve operational breaks.
 - Coordinated with Front Office, Middle Office, and Back Office teams for trade-related queries and issue resolution.
 - Monitored settlement status and escalated critical exceptions within defined SLA timelines.
 - Supported collateral-related operational activities and verified transaction details whenever required.
 - Maintained static data and reference data accuracy for smooth trade processing.
-

Environment

Domain: Investment Banking | OTC Derivatives

Function: Trade Lifecycle Operations

Tools: Excel, Outlook, Internal Banking Applications

EDUCATION

Bachelor of Commerce (B.Com)

Institute of Management Education, Chaudhary Charan Singh University, Meerut – 2016

Higher Secondary (CBSE) – 2013

High School (ICSE) – 2011
