Objective

Experienced Investment Banking Operations professional with **6 years** of expertise in Trade Lifecycle Management, Middle Office Operations, Fund Accounting, Transfer Agency, and Client Service. Looking to contribute strong analytical, operational, and process management skills to a growth-oriented financial institution.

PROFESSIONAL EXPERIENCE

Alliance Bernstein India – Senior Analyst

Jan'2023 – May'2026

Derivative Operations (Trade Settlement)

Area of Handled

- Executed pre- and post-settlement of OTC derivative trades including Interest Rate Swaps (IRS), Forwards, and Credit Default Swaps (CDS), ensuring timely and accurate processing.
- Matched and validated trade economics against confirmations to ensure settlement readiness.
- Performed cash flow validation and processed settlement payments, ensuring correct value dates, currencies, and counterparty instructions
- Investigated and resolved settlement breaks through detailed reconciliation of trade data, cash flows, and counterparty records.
- Reconciled trades and cash movements in internal systems (CTC) to ensure alignment with custodian and counterparty records.
- Verified **SWIFT** payment details and coordinated with custodians and counterparties to resolve payment and settlement exceptions.
- Verified SSI (Standard Settlement Instructions) and ensured accurate routing of payments via custody platforms (JPM Portal, MYSS, BBH).
- Coordinated with custodians and counterparties to resolve settlement mismatches and payment discrepancies.
- Utilized Bloomberg Terminal to validate market data impacting settlement amounts (Rates, FX, Corporate actions).
- Identified root causes of recurring settlement issues and contributed to process improvements to reduce trade breaks and settlement delays.
- Generated daily settlement reports highlighting failed trades, pending payments, and exception items for tracking and escalation.
- Team handling for New Joiners to raise the access and guide them for process overview and trainings.

AXA Business Pvt Ltd - Specialist

March'2022 – Dec'2022

Derivative Operations (OTC Trade Settlement and reconciliation)

- Ensured departmental standard and deadlines are consistently met.
- Research and resolution of contract discrepancies (price, product, date, etc.)
- Ensured that all DTC eligible trades are settled on contractual settlement date.
- Communicated problems to the business lines and ensured proper escalation.
- Ensure resolution of all operational issues with custodians, banks, and brokers.
- Resolve aged issues and breaks by acting as an escalation point between broker and custodian.

Transfer Agency & Fund Operations – Senior Analyst

Responsibilities:

- Managed end-to-end fund operations, including **Fund Accounting, Transfer Agency**, NAV calculation, reconciliation, investor servicing, and transaction processing.
- Prepared and distributed investor reports, including **Transaction History, Accrual Reports** and capital activity statements.
- Calculated and processed investor allocations for **capital calls, distributions, equalizations** and other fund-related transactions.
- Managed **Drop** and **Post** report processing through the GUI application to ensure accurate fund transaction processing.
- Executed wire transfers for capital stock transactions, including **subscription** and **redemption** of investment funds.
- Maintained fund master data by processing **Add, Modify**, and **Delete** requests for new and existing funds using Fund Connect, Cash Sweep, and GUI applications.
- Supported fund accounting activities by monitoring new **fund setups, balance sheet exceptions, oversell positions**, and **rebate processing**.
- Partnered with the **Investor Relations** team to respond to investor inquiries and communicate capital activities, fund notices, and transaction updates.
- Ensured compliance with internal controls, operational procedures, and Service Level Agreements (SLAs) while maintaining high-quality client service
