WORKING EXPERIENCE

MAVERIC SYSTEMS LIMITED - March 2024 – October 2025

Designation: Project/Product Manager

Bangalore, Karnataka.

- Gathered and analyzed business requirements to identify data sources and reporting needs.
- Created data visualizations to communicate insights to stakeholders.
- Partnered with stakeholders to balance competing priorities and ensure optimal value delivery.
- Collaborated with cross-functional teams to refine user stories, define acceptance criteria, and maintain a clear backlog.
- Developed test plans and test cases related to change requests (CRs).
- Implement QA standards, best practices, and test process frameworks (e.g., Agile, Waterfall, V-Model).
Introduce and drive improvements in test automation, tooling, and workflows.
- Conduct root cause analysis (RCA) for defects and ensure quality gates are met.

Client Project 1: Trusted Novus Bank (TNB) – April 2024-Sep 2024.

- Results-driven functional consultant and subject matter expert (SME) involved in product certifications.
- Identified business and functional requirements by collaborating with application end-users and led the collection, analysis, documentation, and coordination of those requirements.
- Served as the primary point of contact for clients, effectively addressing and solving functional issues.
- Provided functional insights into high-level business requirements.
- Involvement in analysis & investigation of Production defects and Testing issues raised during project life cycle.
- Managed system testing and validation to ensure compliance with business requirements.
- Supported the development of training materials and conducted training sessions.
- I gained experience in writing Business Requirement Documents, Scope of Work, Daily Status Reports, Weekly Status Reports, Test Strategy, and Test Design.
- Managed a team of business users, providing functional support to enhance their efficiency.
- Engaged with clients and internal stakeholders to review test designs and ensure their approval.

Client Project 2: Arab National Bank (ANB) – October 2024-March 2025.

- Assisted in the development and implementation of organizational strategies, policies, and procedures.
- Gathered requirements and prepared business documents for the current functional upgrade.
- Demonstrated expertise in writing Business Requirement Documents, Scope of Work, Daily Status Reports, Weekly Status Reports, Test Strategies, and Test Designs.
- Efficiently managed teams and stakeholders to negotiate and balance demands and expectations.
- Assisted the team in raising functionality defects in JIRA and effectively managed defect triage calls to discuss bugs raised by the team.
- Managed walkthrough sessions for business users regarding the collection application.
- Prepared detailed test plans and executed projects according to the plan.
- Guided the test team during SIT support and provided functional assistance to define the regression test scope.
- Assisted in translating the functional design into a technical design by explaining functionalities to developers.
- Possessed hands-on experience in writing SQL queries.
- Identified gaps and suggested transformations in the bank's processes and procedures.
- Analyzed issues logged by the client and provided solutions within the agreed turnaround time (TAT).
- Executed releases and rollouts during the tenure.

Client Project 3: Abu Dhabi Commercial Bank (ADCB) – March 2024- Present.

- Analyzing the requirements and mapping them to the current functionalities of the system.
- Prepare and review the training material for client training.
- Assisting in the initial parameter set up for the client.
- Testing Real time scenarios in terms of functional part to identify the gaps that need to be developed.
- Preparing the detail Test Plan and executing the project as per plan.
- Guided test team for SIT support and provided functional support to define regression test scope.
- Assist in cascading the functional design into technical design by explaining functionality internally to the developers.
- Oversee defect lifecycle: logging, prioritization, triage, fix verification, and closure.
- Prepared and executed test cases based on FRD/BRD, conducted validation testing, and raised defects in Jira.
- Collaborated with developers for quick issue resolution and reported status to clients.
- Prepare daily/weekly test status reports, dashboards, and quality metrics.
- Maintain documentation: test strategy, test summary reports, risk logs, and compliance records.
- Liaise with business teams to plan and support User Acceptance Testing.
