

# PRADYUM RAJ DEVENDRARAJ

Bangalore, India | +91 9940141192 | pradyumraj.raj12@gmail.com | LinkedIn: [pradyumraj](#)

## PROFESSIONAL SUMMARY

**Business Systems Analyst** with nearly 5 years of experience across financial services, investment banking, enterprise operations, automation, reporting, dashboards, and process improvement. Skilled in requirements gathering, stakeholder management, AS-IS/TO-BE process mapping, SQL, Python, pandas, NumPy, APIs, Power BI, Excel, ServiceNow, JIRA, and Confluence. Experienced in translating business needs into scalable workflows, analytical dashboards, automation solutions, and data-driven operational improvements. Hands-on exposure to prompt engineering, Microsoft 365 Copilot agent prototyping, and AI-assisted dashboard tracking.

## CORE SKILLS

**Business Analysis:** Requirements Gathering, Stakeholder Management, User Stories, Acceptance Criteria, BRD/FRD Support, AS-IS/TO-BE Mapping, Workflow Analysis, Functional Specifications

**Data & Analytics:** SQL Joins, Data Extraction, Data Validation, Operational Data Analysis, Trend Analysis, KPI Reporting, RCA, Dashboarding, Business Performance Analysis

**Tools & Reporting:** Power BI, Advanced Excel, Pivot Tables, Excel Macros, ServiceNow, JIRA, Confluence, Lucidchart, Microsoft 365 Copilot

**Technical Skills:** Python, pandas, NumPy, APIs, YAML, SQL, Git, Docker, AWS, Basic CI/CD, Prompt Engineering, OpenAI/LLM Tools, UAT

**Domain Exposure:** Financial Services, Investment Banking Support, Enterprise Operations, Access Governance, Risk & Control Awareness, Infrastructure Operations

## PROFESSIONAL EXPERIENCE

Oct 2024 - June 2026

**Business Analyst** | Accenture | Client: Morgan Stanley

- Gather business requirements from stakeholders and translate them into functional specifications, process flows, workflow rules, and validation logic supporting Investment Banking and Trade Lifecycle workflows across internal financial-services platforms..
- Built financial tracking models and derived actionable insights from financial data to investment decisions and capital allocation
- Owned end-to-end business analysis deliverables including BRDs, FRDs, user stories, acceptance criteria, process flows, AS-IS/TO-BE documentation, and requirement traceability throughout the SDLC.
- Analyze form usage data, workflow patterns, ticket trends, request volumes, approval flows, and operational gaps to identify improvement opportunities and support data-driven decision-making.
- Build and enhance workflow automation using Python, YAML, APIs, and ServiceNow integrations, improving request validation, approval routing, exception handling, and operational tracking.
- Use Python, pandas, NumPy, SQL, and Excel to clean, validate, analyze, and summarize operational data for usage reports, dashboards, and stakeholder updates.
- Created Power BI / Excel-based dashboards and reporting views to track form usage, request patterns, automation performance, and operational KPIs.
- Worked on a Microsoft 365 Copilot agent prototype for dashboard tracking and form usage insights, applying prompt engineering to enable quicker access to operational metrics and business context.
- Contributed to Deco-Pilot, an internal automation tool used by 100+ users, enabling validation support for 1,000+ servers and reducing repetitive manual validation effort by approximately 60%.
- Collaborate with developers, business users, support teams, and senior stakeholders to clarify requirements, validate fixes, resolve production issues, prepare runbooks, and support release readiness.

Apr 2022 - Aug 2024

- Business Systems Analyst** | Mphasis | Client: CBRE
- Worked in a hybrid Business Systems Analyst supporting enterprise applications, infrastructure workflows, operational reporting, and process improvement initiatives.
- Analyzed service requests, change tickets, SLA trends, recurring issues, and operational bottlenecks to identify process gaps, automation opportunities, and reporting improvements.
  - Partnered with application support, infrastructure, business operations, and engineering teams to document requirements, validate issues, coordinate fixes, and improve operational support processes.
  - Built automation scripts, reports, and tracking solutions using Python, SQL, Excel macros, and Power BI to improve reporting accuracy, reduce manual effort, and increase operational visibility.
  - Used SQL joins, filters, aggregations, and validation queries to investigate operational data, reconcile records, support reporting needs, and validate issue patterns.
  - Supported AWS and DevOps-related activities involving AWS services, Docker, deployment support, monitoring, access coordination, and environment-level troubleshooting.
  - Improved ticket closure SLA adherence by approximately 20% and reduced recurring reporting effort by around 30% through runbooks, automation, trackers, and standardized reporting templates.

Jun 2021 - Apr 2022

- PeopleSoft Security Support Analyst** | Mphasis | Client: CBRE
- Managed PeopleSoft security support activities including user access provisioning, role modification, access validation, permission issue analysis, and SLA tracking.
- Coordinated with business users, application teams, and technical stakeholders to validate access requirements, resolve permission issues, and support compliance-oriented access review activities.
  - Analyzed access request patterns, recurring permission issues, and ticket data to improve request handling, documentation quality, and turnaround time.
  - Improved access request turnaround time by approximately 25% through structured validation, documentation, and ticket tracking.

## PROJECTS

- Microsoft 365 Copilot Agent Prototype - Form Usage Dashboard Tracking** | Internal Prototype / Work Exposure
- Worked on a prototype using Microsoft 365 Copilot agent capabilities to help users retrieve dashboard insights and track form usage metrics through natural language prompts.
  - Applied prompt engineering, dashboard interpretation, operational metric tracking, and stakeholder use-case mapping to improve accessibility of reporting insights.

## EDUCATION & CERTIFICATION

**MBA - Business Analysis** | Loyola Institute of Business Administration, Chennai | Pursuing

**B.E. - Computer Science** | Sathyabama Institute of Science and Technology, Chennai | 2017 - 2021 | CGPA: 7.8

**Microsoft Power BI Data Analyst Associate - PL-300** | Valid until January 2027
