Professional Summary

AI Professional with ~12 years of experience (since 2013) in delivering AI/ML/GenAI solutions across Computer Vision, NLP, IoT, and Agentic AI. Currently working as Senior Technical Lead (AI/GenAI) at GSPANN, driving enterprise GenAI Ops, LLMOps, and AIOps initiatives. Proven expertise in retrieval-augmented generation (RAG) pipelines, ML/NLP-powered cross-sell systems, and multi-agent orchestration (Supervisor-Agents-Tools architecture). Adept at leading end-to-end AI lifecycle from R&D to production with MLflow, Docker, Git, and Grafana for scalable deployments.

Core Skills

- AI/ML/GenAI: Deep Learning, Machine Learning, Computer Vision, NLP, LLMs, GenAI, RAG Pipelines, Agentic AI.
- AI Ops: GenAI Ops, LLMOps, AIOps – AI lifecycle management, monitoring, automation, governance
- Programming & Frameworks: Python, C/C++ | TensorFlow, PyTorch, Keras, Hugging Face, LangChain, LlamaIndex
- MLOps & DevOps Tools: MLflow, Grafana, Docker & Docker Swarm, Git, DVC, Edge & Cloud Deployments
- Techniques: Model Tuning, Quantization, Optimization, Data Visualization, Prompt Engineering
- AI Models: YOLO (v3/v4/v8), Inceptionv3, SSD, CNN, KNN, SVM, RNN, RoBERTa, Transformers, Bagging & Boosting
- ML Models: Apriori, DT, RF, SVM, GD, Kmean, KNN etc.

Professional Experience

GSPANN Technologies | Apr 2024 – Present

Senior Technical Lead (AI/GenAI)

- Leading AI/GenAI solution design & delivery for enterprise clients.
- Designed and deployed a Cross-Sell Lead Generation system for medical hardware & consumables using ML + NLP pipelines.

- Built Multi-Agent Orchestration frameworks using LangGraph (Supervisor → SubAgents → Tools).
- Delivered enterprise GenAI Ops solutions for document search, compliance, and knowledge management.
- Established LLMOps pipelines with MLflow + Docker + Git.
- Integrated Grafana dashboards and AIOps practices for monitoring AI systems.

EFKON India Pvt Ltd | Aug 2021 – Mar 2024

Product Development & Delivery (AI/GenAI) Team Lead

- Built high-speed ANPR systems and Smart City video analytics.
- Delivered LLM + RAG pipelines for construction document analysis.
- Introduced LLMOps pipelines for model versioning and governance.
- Deployed AI at scale with Docker, Git, MLflow, Grafana monitoring.

Vaaan Infra Pvt Ltd | Nov 2018 – Aug 2021

R&D (AI) Team Lead

- Delivered multilingual ANPR and AI-powered toll solutions.
- Introduced AI Ops automation practices for retraining and deployment.

Roboflux Technologies | Nov 2016 – Aug 2018

Technical Consultant (AI/ML)

- Developed computer vision and NLP applications (OCR, logo detection, sentiment analysis APIs).
- Delivered gesture-controlled robotics and IoT-based monitoring solutions.
- Implemented Git and Docker for project delivery.

Infi Zeal Technologies | Nov 2013 – Aug 2016

Embedded Systems Developer

- Designed automation circuits and IoT solutions with embedded AI.
- Delivered home automation, gesture-controlled ARM, and footfall detection systems.

Major Projects

- Cross-Sell Lead Generation (Healthcare): AI-powered recommendation engine using ML + NLP for medical hardware & consumables.
- Multi-Agent Orchestration (Agentic AI): Supervisor → Sub-Agents → Tools system with autonomous routing, retrieval, and execution.
- Electronic Enforcement System: Smart City AI for traffic violations (helmet, overspeed, red-light jumping, illegal parking).
- Multilingual ANPR: Vehicle plate recognition in English + Indian regional languages.
- International ANPR (Istanbul): Vehicle recognition with speed & weight detection.

- GenAI + RAG Pipelines: Retrieval-augmented LLM systems for construction & compliance document analysis.
- Complaint Sentiment Analysis (NLP).

Corporate Training & Mentoring

- Delivered **AI/ML/GenAI corporate training programs** tailored for **MSMEs**, focusing on cost-effective adoption of emerging technologies.
- Conducted workshops on **AI-driven automation, predictive analytics, and computer vision** to help MSMEs scale operations.
- Mentored MSME leadership teams on **practical applications of GenAI**, including document automation, RAG-based knowledge management, and customer support bots.
- Designed simplified training modules on **Python, MLflow, Hugging Face, and LangChain** to upskill MSME developers and engineers.
- Assisted MSMEs in **building low-cost AI pipelines** using open-source tools (Docker, Git, Grafana) for monitoring and governance.

Education

B.Tech (Electronics & Communication) | UPTU Lucknow | 2009 – 2013 | 62.12%
