EXECUTIVE SUMMARY

Results-driven Technical Project Manager with 13+ years delivering complex Banking, FinTech, and Software Product programs across Singapore and India. Expertise spans end-to-end SDLC delivery, agile product development cycles, PMO governance, stakeholder management, and P&L oversight. Proven track record of on-time delivery, 30% incident reduction, and 25% productivity uplift. PMP-certified with hands-on experience in core banking transformations, payments integration, and regulatory compliance — now targeting impactful TPM roles in software product-led organizations.

SGD 1.5M+ Programs Delivered On-Time	30% Production Incidents Reduced	40% Fewer SLA Breaches	25% Team Productivity Uplift	12 Zero-Defect Production Cycles

CORE COMPETENCIES

Program & PMO Management	Agile / Scrum	Product Delivery (SDLC)	Roadmap Planning
JIRA, confluence	Stakeholder Management	Vendor & Partner Management	Risk & Issue Management
Core Banking & Payments	API & Systems Integration	Regulatory Compliance (MAS/RBI)	Release & Change Management
Cross-functional Team Leadership	OKR / KPI Tracking	Operational Cadence Design	Executive Reporting & Escalation

TECHNICAL SKILLS — SOFTWARE PRODUCT CONTEXT

- Project Tools:** Jira, Confluence, MS Project, Asana, monday.com
- SDLC Methodologies:** Agile, Scrum, Kanban, SAgile, Waterfall, Hybrid
- CI/CD Awareness:** Jenkins, Git, GitHub Actions, deployment pipelines
- Cloud Concepts:** AWS / Azure fundamentals, SaaS product delivery models
- API & Integration:** REST APIs, SWIFT/ISO 20022, NEFT/RTGS, MQ messaging
- Programming:** Java, SQL, Unix Shell Scripting, Spring Batch
- Data & Analytics:** SQL Performance Tuning, Dashboards, Power BI basics
- AI/ML Tools:** Gen AI for PMs, Jira RoVo AI, Fireflies.ai, ClickUp Brain
- Monitoring & Ops:** Splunk, ITSM, ITIL-based incident/change management
- Documentation:** BRD / FRD / RFC / SoW / Risk Registers / Runbooks

PROFESSIONAL EXPERIENCE

Technical Delivery Manager · TCS India

Apr 2026 - Present

- Spearheading client discovery for new implementation requirements, driving project delivery management from day one in a software product delivery environment.
- Compressed requirement-to-plan cycle by 20% through structured intake workshops, backlog grooming, and cross-functional stakeholder alignment sessions.
- Leading coordination across Dev, QA, Business, and third-party vendors — maintaining sprint velocity tracking and delivery cadence reporting.

Technical Project Manager · TCS Singapore (MUFG Bank Onsite)

Jul 2020 - Mar 2026

- Led end-to-end delivery of banking transformation programs with 99% on-time, zero-defect release rate across 12 production cycles — equivalent to running major product release trains.
- Managed cross-functional squads of 15+ (Dev, QA, Business Analysts, Infra) achieving 25% productivity gain through sprint planning, backlog grooming, and team mentoring.
- Drove executive stakeholder reporting cadences, regulatory submission packs, and escalation management — zero audit findings over 5+ years with MAS-regulated programs.
- Designed and introduced automation dashboards replacing manual monitoring — reducing operational overhead by 30% and improving real-time project visibility for senior leadership.
- Coordinated vendors and business partners to align delivery timelines, manage dependencies, and resolve blockers proactively — sustaining 40% fewer SLA breaches.

Technical Lead · TCS Gurgaon

2016 - 2020

- Directed 8-member engineering team delivering zero-defect releases on mission-critical core banking applications processing 1M+ daily transactions.
- Mentored 3 junior leads into senior roles — building a sustainable talent pipeline and reducing key-person dependency by 35%.
- Streamlined release cycles in collaboration with business stakeholders — cutting average release window by 15% with zero production rollbacks.
- Automated monitoring processes via custom dashboards, reducing manual effort by 30% and increasing STP ratio by 20%.

Module Lead – NEFT / RTGS · TCS Onsite, Jaipur

2013 - 2016

- Led NEFT/RTGS payment module as primary SME — ensured 99.9% transaction uptime and full RBI compliance across all production cycles.
- Automated payment monitoring via centralized dashboards, boosting STP ratio by 20% and reducing reconciliation effort significantly.

KEY PROJECTS

Vietnam NAPAS API Integration · MUFG Bank (Onsite)

Mar 2025 - Mar 2026

- Led NAPAS API integration for MUFG Bank's Vietnam branch, adding a new customer payment channel and improving transaction efficiency — analogous to a product feature launch in a regulated environment.
- Developed configurable channel parameters and robust exception handling / cutoff management protocols, reducing processing errors and improving operational resilience.

Beneficiary Name Lookup — India Regulatory · MUFG Bank (Onsite)

Jan 2025 - Mar 2026

- Delivered RBI-mandated Beneficiary Name Lookup Facility — streamlined account verification across all Indian banks, enhancing transaction security and customer trust.
- Coordinated cross-functional teams for seamless integration, testing, and validation — reducing transaction errors and meeting regulatory go-live deadlines.

NEFT/RTGS ISO 20022 Migration · MUFG Bank (Onsite)

Mar 2024 - Nov 2025

- Led migration from plain-text to XML-based ISO 20022 message format — end-to-end testing with beneficiary banks, managing STP/NSTP flows and comprehensive return handling.

SMILE to T24 Core Banking Migration · MUFG Bank (Onsite)

Jan 2022 - Mar 2023

- Directed full CBS migration from SMILE to T24 — developed booking request/response mappings, managed MQ queues, and handled multi-scenario response management for zero-downtime cutover.

CBS Application — Rajasthan Co-operative Bank · Offsite, Jaipur

March 2013 - Feb 2016

- Built and maintained CBS application for 30 co-operative banks — integrating NEFT, RTGS, ATM services and HRMS, enhancing operational efficiency and transaction throughput.
