Profile Summary

Generative AI Engineer with hands-on experience in RAG modeling, LLM application development, and AI infrastructure integration. Specialized in LangChain, LangGraph, and AWS Bedrock with a strong background in semantic search, vector databases, and enterprise Q&A; system design. Skilled in integrating Claude, OpenAI, and Bedrock models into production-ready environments. Strong foundation in Python scripting, data workflows, and cloud infra support for LLM applications.

Key Skills

LLM & GenAI Frameworks: Retrieval-Augmented Generation (RAG), LangChain, LangGraph, Transformers
Cloud & Infra: AWS (S3, Lambda, Bedrock, OpenSearch, API Gateway, IAM), Infra automation
Vector Tech: Semantic Search, Context Similarity Search, Vector Databases (Pinecone, OpenSearch, FAISS)
Programming & Integration: Python scripting, API development, Claude & Bedrock LLM integration
Data & Analytics: SQL, Power BI, ETL, Tableau, Data Visualization
Security & Governance: Guardium, Imperva, access control, compliance automation

Professional Experience

MetLife – Generative AI Engineer (Jul 2023 – Present)

- Built enterprise-grade Q&A; platform using RAG pipelines with AWS Bedrock, OpenSearch, Lambda, LangChain, LangGraph.
- Integrated Claude LLM for high-quality contextual responses with semantic search.
- Designed modular infra-ready architecture for scalable GenAI deployments.
- Worked with security teams to align AI solutions with compliance standards.
- Automated deployment workflows using Python and AWS services.

IBM – Generative AI Engineer (Jun 2022 – Jun 2023 | Pune)

- Developed RAG-based assistants using LangChain, vector databases, and Transformer models.
- Integrated Claude and OpenAI LLMs with enterprise search.
- Implemented prompt engineering and context optimization to reduce hallucinations.
- Collaborated with infra team for secure, scalable model deployment on AWS.

VCare Corporation – Data Analyst (Jul 2020 – May 2022 | Noida)

- Built automated ETL pipelines to collect and clean data from multiple sources, reducing manual processing time by 60%.
- Developed KPI dashboards in Power BI and Tableau for business teams.
- Optimized SQL queries for faster reporting.
- Implemented Python data validation scripts to ensure quality and consistency.

Skylex Technology – Data Analyst (Jul 2019 – Jun 2020 | Pune)

- Built reusable data transformation scripts in Python and migrated legacy reports to Power BI.
- Worked closely with project managers to align reporting with business KPIs.
- Performed data audits and reconciliations improving reporting accuracy by 25%.

Key Projects

Pharma Document Intelligence (RAG + AWS Bedrock + Claude)

- Designed and deployed an enterprise-grade Q&A; system to handle pharma regulatory and compliance documents using RAG (Retrieval-Augmented Generation) on AWS.
- Implemented document chunking, vector embeddings, and semantic search using AWS OpenSearch + LangChain for faster and more accurate retrieval.
- Integrated Claude LLM on AWS Bedrock for generating context-aware answers from pharma documents.
- Automated ingestion of PDFs and metadata using AWS Lambda and S3 pipelines.
- Reduced manual query resolution time by 50% with instant retrieval of compliance and drug data.

- Ensured security compliance with HIPAA standards and internal governance.
- Built modular architecture supporting multi-domain document types (policy, SOP, drug research, and safety data).

GenAI Q&A; Platform (RAG + AWS + Claude) – Built an enterprise chatbot using LangChain, LangGraph, Claude, and AWS Bedrock. Used semantic search with vector DBs to improve response precision and latency.

Policy Document Assistant – Developed a secure AI assistant for compliance documents using RAG + Bedrock + Claude integration, improving internal policy query handling by 40%.

Code Summarization Tool – Created an internal summarizer using Transformers + LangChain to generate human-readable code documentation.

Data Automation Pipelines – Automated KPI dashboards with Python and SQL to reduce manual reporting time.

Education

B.E. in Computer Science Engineering – Sipna College of Engineering & Technology, Amravati
Diploma in Computer Science Engineering – Dr. Panjabrao Deshmukh Polytechnic, Amravati

Certifications & Training

Generative AI Specialization – DeepLearning.AI
LangChain for LLM Application Development – DeepLearning.AI
Prompt Engineering for LLMs – Databricks / DeepLearning.AI
AWS Certified Machine Learning – Specialty (in progress)
Claude LLM Integration & Advanced Prompting (self-learning)
Oracle Certified MySQL Database Administrator
IBM Guardium Data Protection Fundamentals
Microsoft Azure Security Technologies (AZ-500) (in progress)
