- Application Support:** Vendor Coordination, Production Support (L1/L2/L3), Release Support

WORK EXPERIENCE

Citi

09/2023 – Present | Pune, India

Senior Business Analyst – Capital Market

- Work with Risk, Operations, and Front Office to understand data requirements and support solutions across reference data and trade lifecycle systems.
- Translate business needs into functional requirements and product specifications, contributing to scalable product decisions.
- Analyze large datasets using SQL to validate financial data across asset classes including derivatives, equities, and fixed income.
- Investigate data quality issues, perform root cause analysis, and coordinate with vendors (Bloomberg, ICE, LSEG) for resolution.
- Validate key market data attributes such as contract specifications, pricing, and expiries; support data governance and quality checks for downstream risk and reporting systems.
- Participate in Agile ceremonies, collaborate with engineering teams, and build test cases for complex financial data scenarios.
- Document data lineage and maintain data catalog for critical market data attributes used across multiple downstream applications.
- Identify opportunities for process automation using Python scripts to reduce manual data validation efforts by 30%.
- Provide L2/L3 production support for market data feeds, investigating and resolving data discrepancies in timely manner.

Credit Suisse

12/2021 – 08/2023 | Pune, India

Business Analyst – Capital Market

- Collaborated with business and technology teams to gather and document requirements for reference data and trade lifecycle projects.
- Performed data analysis and root cause investigation to resolve data quality issues impacting risk and reporting systems.
- Ensured accuracy of market data and risk datasets across platforms, covering instruments like derivatives and FX.
- Supported SIT and UAT cycles by validating business scenarios and coordinating for production release.

Northern Arc Capital

04/2021 – 12/2021 | Chennai, India

Risk Analyst

- Conducted financial and risk analysis of partner clients based on financial data; gathered inputs through stakeholder discussions.
- Supported preparation of risk assessment reports for internal decision-making.

Harman Connected

04/2018 – 06/2019 | Pune, India

Business Analyst

- Worked with stakeholders and development teams to support requirement gathering, document functional requirements, and track issues.
- Assisted in creating process flow diagrams and wireframes to visualize business workflows for development teams.
- Conducted gap analysis between current system capabilities and business requirements, identifying areas for improvement.
- Facilitated daily stand-up meetings and coordinated with cross-functional teams to ensure timely delivery of project milestones.
- Performed UAT testing and validated system functionality against business requirements before production deployment.

Tech Mahindra

11/2014 – 04/2018 | Pune, India

Data Analyst – ITSM

- Handled day-to-day data processes and issue resolution based on SLA; provided L1/L2 support for data and application issues.
- Monitored data processes, resolved discrepancies, and supported incident, problem, and change management activities.
- Assisted in QA and release validation by checking data outputs and maintaining operational documentation.

EDUCATION

- Master in Business Finance – XIMB Bhubaneswar | GPA: 8.1 | 2019 – 2021
- B.Tech – Information Technology – West Bengal University of Technology | GPA: 8.4 | 2010 – 2014
