PROFESSIONAL SUMMARY

Experienced Software Testing Professional with **3.8years** of expertise in **manual testing, API testing, database testing, and mobile/web application testing**. Proficient in **test case design, defect tracking, regression testing, and functional validation**. Adept at collaborating in Agile environments to ensure high-quality software delivery and contribute to organizational success.

EXPERIENCE

- **3.8 years of experience** in Software Testing with expertise in **manual testing, API testing, database testing, and mobile/web application testing**.
- Proficient in **Agile (Scrum) methodologies**, collaborating with development teams to ensure timely and high-quality software releases.
- Skilled in creating **test cases, test scenarios, test plans, and test strategies** for comprehensive manual testing.
- Experienced in **API testing using Postman**, validating endpoints, data flows, status codes, and performance.
- Proficient in **SQL database testing**, writing and executing queries for data validation and backend verification.
- Conducted **mobile and web application testing** across multiple platforms and browsers to ensure compatibility and performance.
- Familiar with **non-functional testing** (performance, load, security) to uphold software quality standards.
- Expertise in **functional, regression, smoke, sanity, and compatibility testing**.
- Strong understanding of **SDLC and STLC**, with hands-on experience in **end-to-end testing workflows**.
- Skilled in **defect tracking and reporting using Jira**, managing issues from identification to closure.
- Adept at generating **detailed test reports and documentation**, highlighting critical defects for timely resolution.

TECHNICAL SKILLS

- **Testing:** Manual Testing, API Testing (Postman), Database Testing (SQL)
- **Defect Management:** JIRA
- **Application Testing:** Mobile and Web Applications
- **Testing Types:** Functional, Regression, Smoke, Sanity, Compatibility Testing
- **Methodologies & Processes:** Agile (Scrum), STLC, SDLC

EDUCATION

Bachelor of Engineering in Electronics and communication

AMC Engineering College | 2017 – 2021

Pre-University (PCME)

St Joseph's Indian Composite PU College – Bengaluru | 2015 – 2017

SSLC

St Philomean's High School – Bengaluru | 2014 – 2015

PROFESSIONAL EXPERIENCE

Software Test Engineer – Bright Canyon Solutions India Pvt. Ltd. | Aug 2022 – Till date
Software Analyst – Keyloop India Pvt. Ltd. | Apr 2022 – July 2022

PROJECTS

Project – 1:

- **Project name** - Classroom
- **Client** - Codigo Club Private Limited
- **Role** - Manual and API Tester
- **Technologies** - Manual Testing, API Testing (Postman), SQL, Mobile Testing, Web Testing

Aptipro.ai is an innovative **EdTech platform** designed to enhance learning through **personalized assessments, interactive learning modules, and real-time progress tracking**. The platform supports both **mobile and web applications**, ensuring learning accessibility across devices. It enables content creators to **design, publish, and sell courses** and includes a **classroom feature for conducting live tests**.

Roles and Responsibilities:

- Performed **manual testing on web and mobile applications**, ensuring proper **functionality, usability, and cross-platform compatibility**.
- Conducted **API testing** using **Postman**, validating **data flows, API endpoints, error handling, and performance**.
- Executed **SQL-based database testing** to ensure **data integrity, consistency, and validation**, with a focus on **data migration and backend processes**.
- Involved in **functional testing, regression testing, and UI/UX testing** to ensure a seamless and optimal user experience.
- Collaborated within **Agile sprint cycles**, participating in **daily stand-ups, sprint planning, defect resolution, and retrospective meetings** to ensure efficient and timely software delivery.
- Utilized **JIRA** for **defect tracking, test case execution, and progress monitoring**.
- Validated **end-to-end integration workflows** to ensure seamless functionality and integration across multiple platform modules.

Project – 2:

- **Client** - Bayview
- **Role** - Manual and API Tester
- **Industry** - Mortgage Loan Servicing

Bayview is a comprehensive Loan origination and mortgage processing platform designed to streamline and digitize the end-to-end mortgage lifecycle. The system facilitates automated loan underwriting, document verification, Eligibility checks, and Workflow-based loan

approvals. It enables financial institutions to reduce manual effort, minimize errors, accelerate approval timelines, and ensure compliance with regulatory standards.

Roles and Responsibilities:

- Created and validated orders via **REST APIs** for testing various business scenarios
- **Manually tested billing invoices** as per **business requirements** to ensure accurate and compliant billing
- Handled **multiple change requests (CRs)** and performed **regression testing** across key modules
- Worked closely with cross-functional teams to align test coverage with business workflows and priorities
- Actively participated in **Test Plan meetings**, collaborating with **QA Leads and Business Analysts** to define and finalize the **testing approach**.
- Designed and executed **test cases for functional testing**, ensuring all system requirements were accurately validated.
- Conducted **manual testing and API testing** to verify system **functionality, performance, and reliability**.
- Performed multiple types of testing including **functional testing, smoke testing, sanity testing, system testing, regression testing, and retesting** to ensure product quality throughout various development phases.
- Debugged and executed **test cases**, analyzed results, and identified defects to ensure optimal application performance.
- Conducted **cross-browser compatibility testing** on platforms like **Chrome, Firefox, and Microsoft Edge**, ensuring a consistent user experience.
- Managed the **bug lifecycle** using **JIRA**, including defect identification, tracking, and collaborating with developers for resolution.
- Documented and communicated **testing progress, bug reports, and enhancements** to ensure alignment and clarity among cross-functional teams.

DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge and belief.
