PROFESSIONAL EXPERIENCE

Juniper Networks | Hewlett Packard Enterprise | Product Owner(Feb 2023- Present)

Product: jCloud Licensing Platform – SaaS licensing platform enabling customers to activate, revoke, resolve, and manage software entitlements.

- Owned end-to-end product lifecycle including discovery, roadmap planning, backlog prioritization, development, launch, and post-release performance tracking
- Led Agile product ownership activities including defining user stories, acceptance criteria, and prioritization of features for licensing workflows
- Partnered with Engineering, UX, and Support teams to redesign entitlement and activation flows, improving self-service adoption by 25% and reducing support dependency.
- Leveraged Pendo and FullStory insights to identify friction points in customer journeys, reducing average license resolution time by 30% while improving feature engagement by 15%.
- Owned and prioritized the product backlog, translating business and customer requirements into epics, user stories and acceptance criteria.
- Supported healthcare reporting initiatives involving data analysis, workflow requirements and stakeholder coordination, using Informatica and SQL/data analysis capabilities.
- Worked with Engineering teams on Azure-based cloud product environments, translating business requirements into technical user stories, acceptance criteria, and delivery priorities.
- Partnered with technical teams to understand Azure cloud dependencies, APIs, integrations, and application requirements while coordinating feature delivery across product and engineering teams.

University at Buffalo | Product Manager(Aug 2022- Jan 2023)

Product: AI Care – AI-powered elderly care solution supporting medication adherence and assisted care.

- Defined the product vision and roadmap by conducting interviews with caregivers and potential users to identify unmet needs and prioritize features aligned with elderly care challenges.
- Led product discovery efforts across medication adherence, fall detection, and assisted navigation capabilities, translating insights into MVP requirements and user stories.
- Translated elderly-care and healthcare user needs into AI product requirements, user stories, acceptance criteria and implementation priorities.
- Developed wireframes and prototypes to validate concepts with stakeholders, iterating on the experience to improve usability and accessibility for elderly populations.
- Collaborated with multidisciplinary teams to define success criteria, acceptance requirements, and implementation priorities aligned with product objectives.

Wolters Kluwer | Product Manager(Sep 2021- Jan 2022)

- Product: Freelancing Marketplace Platform connecting freelancers and clients.
- Owned product roadmap, MVP definition, and feature prioritization for freelancer-client marketplace platform in an Agile environment.
- Conducted funnel analysis to identify onboarding friction points and implemented targeted improvements that increased free-trial activation rates by 12%.
- Leveraged customer behavior analytics to identify churn drivers and prioritize retention initiatives, resulting in a 4% reduction in monthly churn.
- Collaborated with Design and Engineering teams to validate prototypes and streamline execution, improving delivery efficiency by 15%.

Axtria | Product Owner(Mar 2020-Aug 2021)

- Product: Life Sciences Education & Engagement Portal.
- Led product enhancement roadmap using customer feedback, behavioral insights, and stakeholder inputs in Agile framework.
- Prioritized features and managed backlog to improve engagement and adoption, increasing conversion by 25 basis points
- Supported sprint planning, backlog refinement, and release coordination activities.
- Streamlined prioritization processes and stakeholder alignment activities that reduced defect turnaround times by 20%.
- Worked with Engineering teams on Azure-based cloud product environments, translating business requirements into technical user stories, acceptance criteria, and delivery priorities.
- Supported Agile delivery of Azure-based product capabilities through requirement clarification, backlog prioritization, sprint planning, and cross-functional coordination with Engineering.
- Worked with Azure cloud environments including Azure App Services, Azure

Functions, Azure Storage, Azure APIs and Azure DevOps to support cloud-based product delivery and integrations.

TCS | Product Analyst / Business Data Analyst(Jun 2015-Feb 2020)

- Product: Mobile Banking, Scheduling, and US Healthcare Reporting Platforms.
- Supported Product Owners in Agile/Scrum environments by defining requirements, user stories, and backlog items and Participating in Agile ceremonies including backlog refinement, sprint planning, and reviews .
- Worked on US Healthcare reporting platforms, gathering and translating business requirements into reporting specifications, user stories and actionable backlog items.
- Collaborated with Product Owners and cross-functional teams to define **acceptance**
- Supported initiatives valued at \$3–5M impacting 20,000+ users by prioritizing self-service capabilities and improving customer journeys.
- Redesigned scheduling workflows for a home tour platform, reducing booking turnaround times by 45% and decreasing manual intervention by 25%.
- Defined reporting requirements supporting healthcare initiatives using Informatica, improving data retrieval efficiency by 60% and reducing turnaround times by 20%.
