Assistant Vice President | Enterprise Data Governance | Data Quality | Risk & Controls | Regulatory Compliance |
Portfolio Governance, India | +91 9867187069/ 9945701208 | prescilla.franklin@gmail.com

EXECUTIVE PROFILE

Assistant Vice President with 16+ years of progressive experience across global investment banking, specializing in Enterprise Data Governance, Data Quality, Risk & Controls, Regulatory Compliance, and Portfolio Governance. Proven expertise in designing and strengthening governance frameworks that enhance data integrity, improve control effectiveness, and ensure compliance with BCBS 239, GDPR, CCPA, LGPD, and enterprise Data Management standards.

Demonstrated success in leading independent KPI validation, Governance Risk Assessments, Core Data Management Standards (CDMS) adherence reviews, Critical Data Elements (CDEs) governance, and Data Stewardship validation to improve governance accountability, audit readiness, and executive confidence in enterprise reporting.

A trusted partner to senior stakeholders across Technology, Risk, Compliance, Operations, and Business functions, driving governance transformation, regulatory remediation, executive reporting, and reporting automation through Clarity PPM, SAP Business Intelligence, and AI-enabled solutions. Recognized for delivering measurable improvements in governance maturity, data quality, operational efficiency, and decision-making across complex global banking environments.

CORE EXPERTISE

- Enterprise Data Governance & Data Management Frameworks
- Data Quality Framework & Data Integrity
- Data Control Testing & Control Effectiveness Reviews
- Core Data Management Standards (CDMS) Adherence Reviews
- Data Stewardship Validation (Collibra)
- Regulatory Compliance (BCBS 239, GDPR, CCPA, LGPD)
- Policy Adherence, Gap Assessment & Remediation
- Portfolio Governance & PMO Controls
- Executive Reporting & Governance Packs
- Reporting Automation & Data Visualization (SAP BI / DBRIB)
- Stakeholder Governance & Senior Management Engagement
- Data Governance Policies & Standards
- KPI Validation & Data Quality Assurance
- Governance Risk Assessment
- Critical Data Elements (CDEs)
- Governance Accountability
- Governance Compliance & Regulatory Assurance
- Risk & Control Frameworks (RCSA, MCS Mapping)
- Clarity PPM Governance & Delivery Oversight
- Audit Readiness & Regulatory Evidence Management
- Enterprise Control Assurance
- Governance Automation & AI-enabled Reporting

DATA GOVERNANCE TOOLS & TECHNOLOGIES

- Data Governance:**
Collibra | Clarity PPM | SAP BusinessObjects Business Intelligence (SAP BI)
- Governance & Workflow:**
GFMS | GEMS | RDMS | ServiceNow
- Reporting & Productivity:**
Microsoft Excel (Advanced) | PowerPoint | Visio | Microsoft Office 365 | Microsoft Teams | SharePoint
- Identity & Access Management:**
Mainframe (RACF/ACF2)
- AI & Automation:**
Microsoft Copilot | ChatGPT | Claude

CAREER HIGHLIGHTS

- Elevated enterprise data governance and KPI assurance frameworks, driving ~20% improvement in data accuracy, completeness, and audit readiness across critical reporting.
- Led independent KPI validation and control testing, ensuring robust design and operating effectiveness of data management controls with consistent senior-level sign-offs.
- Directed regulatory alignment and control gap assessments, strengthening compliance with Data Management Policy and MCS standards and enhancing overall control maturity.
- Spearheaded reporting automation and dashboard transformation (SAP BI / DBRIB), reducing manual effort by ~25–30% and delivering scalable, standardized governance outputs.
- Influenced 8–12+ global stakeholders to accelerate remediation cycles, driving timely closure of control gaps and elevating accountability across functions.

PROFESSIONAL EXPERIENCE

Deutsche Bank India — Assistant Vice President

June 2023 – June 2026

Enterprise Data Governance, Data Quality & Control Assurance

Data Governance & KPI Validation

- Led independent KPI validation and Data Quality Framework assessments, improving data integrity, accuracy, completeness, and alignment with Enterprise Data Governance standards.
- Performed end-to-end Governance Risk Assessments by evaluating the design and operating effectiveness of Data Controls, strengthening Governance Compliance and enterprise control assurance.
- Identified data quality issues, governance risks, and reporting inconsistencies, enabling timely remediation and improving governance accountability across business functions
- Delivered independent validation findings, governance risk insights, and remediation recommendations, supporting informed decision-making and continuous improvement
- Governed remediation lifecycle activities, partnering with stakeholders to improve governance accountability, control effectiveness, and timely issue resolution.
- Produced executive governance reporting highlighting Data Integrity trends, governance risks, control performance, and remediation progress for senior leadership.
- Standardized Enterprise Data Governance practices by strengthening KPI definitions, Data Quality Frameworks, and Data Controls across business divisions.

Regulatory Adherence & Policy Governance

- Conducted Core Data Management Standards (CDMS) adherence reviews, validating governance requirements for Critical Data Elements (CDEs) and identifying governance gaps to strengthen Enterprise Data Governance and Governance Compliance.
- Verified Data Steward assignments within Collibra, confirming active stewardship and governance accountability in support of Core Data Management Standards (CDMS) compliance.
- Performed Governance Risk Assessments by evaluating adherence to Data Management Policies, Minimum Control Standards (MCS), and enterprise governance requirements.
- Aligned Data Controls with regulatory requirements and enterprise governance standards, improving governance maturity and audit readiness.
- Produced audit-ready Regulatory Evidence Management documentation, ensuring accurate, complete, and timely regulatory submissions.
- Recommended remediation strategies that strengthened Governance Compliance, Data Integrity, and Enterprise Data Governance practices.
- Led annual regulatory inventory recertification, maintaining governance compliance across enterprise data assets.
- Facilitated governance awareness sessions to promote Data Stewardship, governance accountability, and adoption of Enterprise Data Governance standards.

Stakeholder Management & Governance Leadership

- Partnered with Technology, Risk, Compliance, Operations, Data Stewards, and cross-functional stakeholders to strengthen Enterprise Data Governance and improve governance accountability.

- Collaborated with senior stakeholders to resolve governance risks, prioritize remediation activities, and enhance Governance Compliance across strategic initiatives.
- Acted as the primary governance contact for leadership forums, presenting governance insights, Data Integrity metrics, and remediation progress.
- Led governance working groups that improved Data Stewardship practices, reduced reporting inconsistencies, and strengthened governance accountability across business functions.

People Management & Team Leadership

- Provided functional leadership and mentoring to junior analysts, strengthening governance capability, reporting quality, and process adherence.
- Support onboarding, training, and capability building, improving team productivity and consistency in governance deliverables
- Review and quality assure deliverables (dashboards, reports, validation outputs), ensuring accuracy, completeness, and alignment to leadership expectations
- Drive a culture of accountability, continuous improvement, and control awareness within the team and across delivery stakeholders
- Collaborate across teams to prioritize workload, manage dependencies, and ensure timely delivery of critical governance outputs

Portfolio Governance, Reporting & Automation

- Lead Clarity PPM governance, ensuring accuracy of delivery plans, milestones, dependencies, forecasts, and RAID data.
- Performed structured Data Quality Framework assessments across portfolio reporting, validating milestones, RAID logs, dependencies, and delivery forecasts to improve Data Integrity.
- Drive disciplined governance routines, embedding standardized reporting cycles and data accountability across teams.
- Own and enhance Milestone Roadmap dashboards, improving visibility of delivery risks, slippage, and dependencies.
- Delivered executive governance dashboards and portfolio health insights, enabling proactive risk identification and informed decision-making.
- Validated GFMS actions, RAG status changes, governance narratives, and Data Controls, ensuring reporting accuracy, governance compliance, and audit readiness.
- Implement automation for reporting and action tracking, improving traceability, efficiency, and audit readiness.
- Build SAP BI reporting solutions, enhancing data visualization, reporting quality, and process efficiency.
- Leverage AI (Copilot) for reporting automation, improving productivity and standardization of outputs.

JPMorgan Chase & Co.— Various Roles

June 2009 – June 2023

Data Governance, Privacy, Controls & Risk Management

- Governed data privacy frameworks, including DPIA approvals, DSIR processing, and regulatory compliance.
- Maintained Records of Processing Inventory (ROPI) aligned to GDPR and global privacy standards.
- Delivered privacy governance reporting and insights to senior stakeholders and forums.
- Performed root cause analysis on data incidents, strengthening preventive control mechanisms.

Risk, Controls & Governance

- Conducted QA reviews of control frameworks, improving quality, consistency, and risk transparency.
- Strengthened policy adherence, SOP governance, and control documentation frameworks.
- Supported audit readiness and control enhancement initiatives across business units.

Records, Resiliency & Access Governance

- Managed records lifecycle governance, ensuring compliance with retention, legal, and regulatory standards.
- Delivered business continuity and resiliency governance, including testing, reporting, and plan validation.
- Governed identity & access management controls, ensuring compliance with SOD and access control policies.

EDUCATION & CERTIFICATIONS

- Bachelor of Arts – Mumbai University
- ISO 27001 Lead Auditor
- ITIL Intermediate – Service Operations
- ITIL Foundation
