Education

Bachelor of Engineering 2008-2012
Tagore Engineering College
Anna University

Master of Business Administration 2012-2014
Anna University

Expertise

- Risk Identification & Assessment
- Risk Mitigation Strategies
- Regulatory Compliance Testing
- Control Frameworks (COSO)
- Enterprise Risk Management
- Control Design & Effectiveness Testing (RCSA)
- SOX Compliance & ITGC Testing
- IT Risk Management & Operational Risk incident Management.
- Data Analysis & Reporting
- Microsoft Office

PRIYADHARSINI ANANDAN

Risk Management | Operational Risk | Control Testing | Control Assurance

Risk and Controls professional with over 10 years of experience in banking and financial services, specialising in operational risk management, RCSA, internal controls, and regulatory compliance. Proven track record of identifying and reporting operational losses and incidents, driving remediation cycles, and preparing risk reports and management information that support confident, data-driven governance decisions by senior stakeholders and committees. Eager to contribute a structured, process-driven approach to operational risk framework development within a dynamic, international banking environment.

Experience

Wells Fargo International Solutions Private Limited Senior Independent Testing Specialist SEP 2023-FEB 2026

- Led end-to-end operational risk assessment and control testing programs as part of the second line of defence (2LOD), applying structured frameworks to evaluate internal controls, policies, and practices, ensuring continuous alignment with Group standards, regulatory requirements, and enterprise risk appetite across the organisation.
- Coordinated and performed Risk and Control Self-Assessments (RCSA), maintained the risk register, and executed root cause and impact analyses for identified control deficiencies; monitored action plans and conducted regular follow-up with business owners, driving measurable improvement in control maturity and achieving sustainable issue closure across critical risk functions.
- Identified, analysed, and reported operational losses and incidents through dedicated governance tools, maintaining key risk indicator (KRI) reporting and preparing risk reports and management information for governance committees and boards, enabling faster, data-driven decision-making by senior stakeholders.
- Took ownership of developing, updating, and maintaining risk policies, functional concepts, and procedural instructions, including AML and financial crime regulatory requirements, ensuring alignment with Group rules and evolving regulatory standards.
- Identified a gap in post-disposition follow-through on third-party findings and implemented validation cycles to track corrective actions through to resolution, directly strengthening the control environment, reducing residual risk, and improving overall risk management maturity.

Barclays Shared Services Assistant Manager- Risk & Controls Management FEB 2018-JULY 2023

- Managed enterprise-wide RCSA programs, scoping and assessing inherent and residual risks across operational areas, mapping findings to key and non-key controls in the Risk Control Matrix, and maintaining consistent audit readiness.
- Led walkthroughs to evaluate control design effectiveness, identify critical gaps, and establish test objectives and documentation standards directing end-to-end design and operational effectiveness testing using statistical sampling methods to identify control weaknesses requiring remediation.
- Partnered with business control owners to develop detailed remediation plans, define accountability, and monitor progress through governance dashboards presenting findings and actionable insights in risk committee forums to support informed decision-making by senior management.
- Reviewed and approved test documentation and workpapers ensuring adherence to global audit methodologies and internal quality standards maintaining high-quality control assurance delivery across all risk functions.
- Identified a critical manual control vulnerability, built the case for automation, and collaborated with the technical team to implement the solution **delivering 2 FTE savings, eliminating human error risk**, and directly contributing to a stronger financial risk control environment across the organisation.

Personal Info

Date of Birth : 29 March 1991

Nationality : Indian

State Street HCL Services, Chennai

Senior Finance Analyst

APR 2016-FEB 2018

- Managed daily middle office operations for OTC derivatives, mutual funds, and other investment banking products, ensuring accurate trade capture, processing, and lifecycle management.
- Performed detailed position, cash, and General Ledger (GL) reconciliations as part of the Record to Report (R2R) process, identifying and resolving discrepancies to maintain financial accuracy.
- Prepared and reviewed financial reports related to trade activity, positions, cash flows, and GL postings, supporting timely and compliant financial reporting.
- Coordinated with front office, back office, and finance teams to ensure seamless trade settlements, break resolution, and effective operational controls throughout the R2R cycle.
- Conducted quality assurance and governance checks on end-of-day (EOD) processes, validating reconciliations and ensuring completeness of financial reporting.
- Supported month-end and quarter-end financial close activities by providing accurate position, cash, and GL data essential for accounting and audit purposes.

TCS - Morgan Stanley Bank, Chennai

Senior Finance Analyst

JUNE 2014-JAN 2016

- Managed middle office operations with a focus on position and cash reconciliation for derivatives.
- Identified and resolved discrepancies in daily reconciliations to ensure accurate financial records.
- Coordinated settlements by working closely with front and back office teams to ensure timely and accurate trade settlements.
- Assisted in preparing reports related to reconciliations, settlements, and financial data accuracy.
- Supported end-of-day processes to maintain data integrity and ensure timely resolution of issues.

Core Competencies

- Program & Project Management – Drives large-scale risk and control testing initiatives, ensuring alignment with regulatory and audit requirements.
- Agile & Hybrid Delivery – Utilizes Agile Scrum, Kanban, and Hybrid models to optimize testing cycles and enhance delivery efficiency.
- Risk Management – Performs end-to-end risk identification, assessment, and mitigation in line with COSO, SOX, and ERM frameworks.
- Stakeholder & Governance Management – Leads cross-functional collaboration, governance reporting, and performance tracking through KPI-driven dashboards.
- Process Optimization – Implements Lean and automation strategies to streamline operations and strengthen control assurance.
- Issue Remediation – Manages root cause analysis, corrective actions, and sustainable issue closure aligned with enterprise risk appetite.
- Coaching & Mentorship – Develops team capability through knowledge sharing, training, and best practice implementation.
- Domains: Capital & Liquidity Risk, Operational Risk, SOX Compliance, ITGC Testing
