Profile Summary

7+ years of experience in Banking and Financial Services, including 4+ years in Data Governance, Data Quality, Metadata Management, Data Lineage, and Critical Data Elements (CDEs). Experienced in collaborating with cross-functional teams to improve data quality, ensure regulatory compliance, and maintain end-to-end data traceability.

Skills

- **Data Governance:** Data Lineage, Metadata Management, Business Glossary, Data Catalog, Critical Data Elements (CDE), Data Profiling, Data Quality
- **Tools:** Collibra, JIRA, SQL, Power BI, Advance Excel, TLM, GENEVA, Bloomberg
- **Methodologies:** Agile (Sprint Planning, Scrum, Issue Tracking)

Work Experience

State Street

Jan 2023-Sep2025

Emerging Lead

- Managed Data Lineage and Data Quality initiatives using Collibra Data Governance, ensuring accuracy, consistency, and compliance of critical data assets across the enterprise domain and community structures.
- Led the Data Attestation process by coordinating with Application Owners to validate inflows, outflows, Non-ADS gaps, and control mechanisms, and drove remediation of incorrect or missing data flows through Collibra workflows, glossary management, domain alignment, community collaboration, and metadata governance.
- Performed data profiling, root cause analysis, and Data Quality (DQ) assessments on Critical Data Elements (CDEs) using SQL queries to identify data anomalies and ensure data integrity.
- Collaborated with application teams to request and implement metadata changes in Collibra and internal systems, maintaining accurate and up-to-date metadata repositories, business glossary terms, domain ownership, community participation, and asset relationships.
- Drove Data Harmonization initiatives to align data elements, data flows, and application architecture with product standards, enterprise data governance policies, domain definitions, and community best practices.
- Analyzed and published QA Breaks and Non-ADS reports using SQL, created and tracked JIRA tickets, and coordinated with stakeholders to remediate identified issues across domains and communities.
- Onboarded new Critical Data Elements (CDEs) into the application architecture and established lineage relationships using Collibra asset functions, including asset creation, classification, domain assignment, community mapping, and relationship management.
- Configured and managed Collibra workflows, customized data capture templates, and leveraged JIRA while following Agile methodologies, including Sprint Planning, Product Backlog Grooming, and Sprint Backlog Management.
- Analyzed business requirements and translated them into high-level and low-level use cases, activity diagrams, and functional specifications to support data governance, metadata management, domain modeling, and community engagement initiatives.
- Utilized SQL for data extraction, validation, reconciliation, and reporting activities to support data quality assessments and lineage verification.
- Worked closely with Data Stewards, Application Owners, and cross-functional teams to enhance metadata management, business glossary, data lineage, domain governance, and community collaboration capabilities using Collibra.

Northern Trust

May 2022 -Nov 2022

Technical coordinator

- Monitored daily data loads and managed broker uploads in the TLM application.
- Resolved reconciliation breaks and ensured data accuracy and integrity.
- Served as SME and Quality Auditor, providing SQL-based data validation and issue resolution.
- Managed client onboarding and developed SQL scripts for data integration and validation.
- Performed data mapping, transformation, and migration activities.
- Delivered GPO migration projects for CIBC and TD clients with minimal operational impact.
- Led migration calls with stakeholders and resolved data-related issues.

- Conducted root cause analysis and implemented data quality improvements.
- Monitored data quality and performed validation checks on transactional data.
- Collaborated with Operations, Technology, and Client teams to resolve production issues.
- Used SQL for data extraction, analysis, validation, and reconciliation.
- Supported release and migration activities through data load validation.
- Maintained reports and documentation to support audit and compliance requirements.

**State Street
Specialist**

Nov 2020-May2022

- Managed Data Lineage and Data Quality initiatives to ensure compliant and reliable data assets.
- Led Data Attestation activities and resolved missing or incorrect data flows.
- Performed data profiling and DQ assessments on Critical Data Elements (CDEs).
- Maintained metadata repositories and supported data harmonization initiatives.
- Analyzed QA Break and Non-ADS reports and tracked issues using JIRA.
- Onboarded new CDEs and maintained end-to-end data lineage across systems.
- Created JIRA workflows and supported Agile processes, including Sprint Planning and Backlog Management

BNY Mellon

Jan 2018-Oct 2020

Senior Associate

- Managed monthly and quarterly NAV calculations for hedge fund portfolios.
- Prepared investor allocations, capital calls, and distributions in compliance with fund agreements.
- Priced complex securities, including derivatives, private investments, and structured products, ensuring GAAP & IFRS compliance.
- Performed and reconciled trading and non-trading accruals, including interest, dividends, P&L, management fees, and fund expenses, ensuring accurate financial reporting.
- Managed subscription and redemption bookings, ensuring accurate investor allocations, capital flows, and compliance with fund terms.
- Prepared the final NAV pack, performed billing activities, and calculated quarterly management fees.

Sales executive in Sharekhan Limited

04.2017-11.2017

Sales executive in Bloomsbury Solution

05.2016-12.2016

Education

- PGDM- **Finance** & Marketing from Indus Business Academy in 2015
- Bachelor Degree in **Mathematics** Honours from West Bengal University in 2012
