Integration	REST Web Services, External System Integration
Reporting & Administration	Reports, Dashboards, Users, Groups, Roles, Forms, Views
Programming	JavaScript, Java, HTML, CSS, SQL
Methodology	ITIL, Agile

PROFESSIONAL EXPERIENCE

Senior ServiceNow Developer | MSC Technology Aug 2025 – Present

- Develop and configure ServiceNow ITSM solutions, including Record Producers, Service Catalog items, workflows and Flow Designer automations.
- Create Record Producers with customized forms and client-side and server-side validations based on business requirements.
- Design and manage end-to-end catalog request lifecycles covering approvals, fulfillment tasks and notifications.
- Create Scheduled Jobs to automate recurring tasks and system processes.
- Support migration activities involving data and configuration across ServiceNow environments.
- Analyze technical documents and translate requirements into functional requirements and implementation activities.
- Gather requirements from stakeholders, support solution design and prepare functional documentation.
- Perform testing and deploy Update Sets across Development, Test and Production environments.

ServiceNow Developer / Administrator & Tester | Wipro May 2022 – Jul 2025

- Develop and customize ServiceNow ITSM solutions across Incident, Security Incident, Problem, Knowledge, Change and Service Request processes.

- Configure Business Rules, UI Policies, UI Actions, Client Scripts and ACLs, including advanced scripting for platform customization.
- Design and implement ServiceNow workflows, modules, notifications, SLAs, scheduled reports and Service Portal components.
- Create and configure Service Catalog requests and workflow-driven fulfillment processes in collaboration with the functional team.
- Support ServiceNow version upgrades, enhancements, incident resolution and service request management.
- Manage users, groups, roles and data imports; use Import Sets and Transform Maps for loading data into ServiceNow.
- Move Update Sets between environments and support release/deployment activities.
- Create dashboards and reports to provide operational visibility.
- Provide production support, configuration troubleshooting and testing to maintain platform stability.
- Design and execute manual test cases, test scripts and test plans; perform functional testing, debugging and regression validation.
- Analyze client requirements and contribute to test planning, test scenarios and project documentation.
- Support external system integration using REST Web Services.
