

Puneeth BA

Full Stack Developer (Angular | Java | Spring Boot | Flutter)

puneethba2000@gmail.com | +91 7022287803 | [linkedin.com/in/puneeth-ba-61b555220](https://www.linkedin.com/in/puneeth-ba-61b555220) | Bangalore, Karnataka

Professional Summary

Full Stack Developer with 3 years of hands-on experience in designing and developing enterprise applications using **Angular (13+)** for dynamic, responsive frontends and **Java Spring Boot** for scalable, high-performance backends. Strong expertise in **Core Java, Spring Boot, Spring Security, JPA/Hibernate, and Dependency Injection**, with proven ability to build secure, efficient REST APIs and integrate with relational databases. Skilled in developing **modular Angular components, RxJS-based state management, reactive forms, routing, and lazy loading** for seamless user experiences. Adept at working in **Agile/Scrum teams**, delivering clean, maintainable code, and mentoring junior developers.

Recognized for quickly adapting to new technologies, optimizing application performance, and delivering high-quality solutions that align with business goals.

SKILLS

Frontend (Angular):

- Angular 13+, TypeScript, RxJS, JavaScript (ES6+), HTML5, CSS3, SCSS
- Angular Forms (Reactive & Template-driven), Routing, Guards, Lazy Loading
- State Management (RxJS), Custom Directives & Pipes, Component Communication
- UI Frameworks: Angular Material, Bootstrap
- PWA (Progressive Web Apps), Responsive Web Design

Backend (Java & Spring):

- Core Java (OOPs, Collections, Streams, Exception Handling)
- Spring Boot, Spring Data JPA, Hibernate ORM
- Spring Security (JWT, OAuth2, Role-based Access Control)
- Dependency Injection (DI), RESTful API Development
- Database Integration: MySQL, MongoDB

Tools & Platforms:

- Git, GitHub, Azure DevOps, Maven, Gradle, Postman, Swagger
- VS Code, IntelliJ IDEA, Eclipse

Other Skills:

- Application Performance Optimization (caching, lazy loading, query tuning)
- Debugging & Troubleshooting, Agile/Scrum Methodology
- Cross-browser Compatibility, Basic UI/UX Principles
- Flutter (Android & iOS) – cross-platform mobile app development, state management, and deployment to Play Store & App Store

PROFESSIONAL EXPERIENCE

Software Developer – Talentpace Pvt Ltd — Bangalore, India (Jan 2023 – Present)

- Developed and maintained **full-stack applications** using **Angular (13+)** and **Spring Boot**, ensuring scalable and secure enterprise solutions.
- Designed and implemented **modular, reusable Angular components** and integrated them with **REST APIs** secured by JWT, improving maintainability and security.
- Built RESTful APIs with **Spring Boot, Spring Data JPA, Hibernate, and MySQL**, enabling efficient data handling for large volumes of transactions.
- Optimized frontend performance using **lazy loading, routing strategies** reducing page load times by **25%**.
- Developed cross-platform mobile applications using Flutter (Android & iOS) and deployed them to Google Play Store and Apple App Store, ensuring smooth performance and intuitive user experience.
- Collaborated with cross-functional teams (QA, UI/UX, Product) in an **Agile/Scrum** environment, ensuring timely delivery of high-priority features.
- Conducted code reviews, enforced clean coding practices, and mentored junior developers.

KEY ACHIVEMENTS

- **Improved API performance** by 20% with optimized SQL queries and caching strategies.
- **Led a 4-member team** to deliver critical features ahead of schedule.
- Consistently delivered **high-quality, defect-free code**, reducing production issues significantly.

KEY PROJECT

Dynamic Docket – *Angular, TypeScript, Spring Boot, MySQL, JPA, RxJS, Angular Material*

- Built reusable Angular components for **workflow automation** and implemented transactional REST APIs for backend processing.
- Improved API response time by **30%** through optimized queries and caching.

Leap HUSA – *Angular, TypeScript, Spring Boot, SCSS, Bootstrap, RxJS*

- Developed modular UI for **content management system** with role-based access using Spring Security.
- Implemented complex **Reactive Forms** with server-side validation for improved data integrity.

EZEE-HR – *Angular, Spring Boot, JPA, Bootstrap*

- Delivered **HR workflow features** for employee management, integrating Angular UI with secure backend endpoints.
- Enhanced stakeholder satisfaction by prioritizing feature enhancements and ensuring smooth deployments.

Himalaya Cares – *Flutter, Java Spring Boot, Bloc and Cubits*

- Built a **cross-platform event registration app** using Flutter for Android & iOS, enabling users to browse, register, and manage events seamlessly.
- Designed intuitive and responsive **UI screens with Flutter widgets**, enhancing user experience and accessibility.
- Integrated **Spring Boot REST APIs** for event listings, user authentication, registration tracking, and notifications.
- Implemented **state management** for real-time updates in event registration and attendee status.

AWARD AND RECOGNITION

- **Guiding Star Award** for consistently assisting teammates and supporting team success.
- **Quick Starter Award** for rapid adaptation and high-quality early project delivery.
- **Beyond Expectations Award** for proactively exceeding responsibilities and ensuring project success.

EDUCATION

Bachelor of Engineering in Computer Science
East point college of engineering

2018-2022
