Profile summary

Senior Tech Lead | Backend Engineer 14 Years in Java, Microservices, and Scalable Systems

Senior Tech Lead & Backend Engineer with 14 years of experience in **Java (J2SE, J2EE), Spring Boot, and Microservices**. Expertise in distributed systems, high-performance APIs, and cloud-native architectures. Skilled in **Kafka, MySQL, MongoDB, Redis, Docker, Kubernetes and CI/CD automation**. Strong leadership in team mentoring, architecture decisions, and scaling systems.

Key Achievements:

- ✓ Scaled high-traffic application modules, handling millions of transactions/day with 99.99% uptime.
- ✓ Optimized API response times by 40% using indexing, caching, and query tuning.
- ✓ Architected microservices for seamless integration with Adyen Drop in, PayPal, and Trustly for payment and application modules.
- ✓ Lowered deployment time by 60% through containerized microservices and CI/CD automation. Focused on building scalable systems, improving performance, and mentoring teams.

Skills: Java, J2EE, Spring, Spring Boot, JSON, MySQL, MongoDB, JUnit, MVC Architecture, Microservices, Java Design Patterns, Kafka, Redis, GIT, Maven, Docker, Kubernetes, API Gateway, Java Spring Framework, Unit Testing, Mockito, Performance Tuning, Cursor, CI/CD Pipeline, REST API Design, JPA, Hibernate, Hexagonal Architecture, Event-Driven Architecture

Work experience

Senior Technical Lead – Nextory Pvt. Ltd.	Oct 2016 - Present
---	--------------------

Key Contributions & Technical Expertise:

- **Enterprise Application Design**

Designed and implemented OOP-based reusable modules that decreased code duplication by 35% and cut feature delivery time by 20%.

Lessened technical debt by 40% and improved code maintainability by implementing Clean and Hexagonal architecture, along with Java design patterns like Factory, Singleton, and Strategy.
- **Microservices Development**

Designed and deployed scalable microservices for User, Library, Payment, and Product modules using Spring Boot and Spring Cloud, reducing API response time by 30% and supporting 10K+ concurrent users.

Built secure, scalable APIs with JWT-based authentication, pagination, and robust exception handling, improving system reliability and reducing production errors by 40%.
- **Event-Driven Architecture with Kafka**

Built high-throughput, event-driven systems with Apache Kafka (10K+ events/sec), enabling real-time processing and reducing data latency by 50%.

Integrated Kafka into order, payment, and subscription workflows, decoupling services and improving system resilience, resulting in 40% fewer service failures.
- **Data-Driven Applications using Apache Camel**

Engineered data-driven integration pipelines using Apache Camel and EIPs, processing 500K+ messages/day and reducing integration latency by 40%, enabling real-time communication across 5+ internal systems..
- **Database Engineering**

Designed and optimized high-performance applications using MySQL, MongoDB, and Redis, reducing average query response time by 60%.

Tuned queries, indexes, and schema designs, improving transaction throughput by 3x and supporting 99.99% system uptime with HA configurations.
- **Multithreading & Concurrency**

Leveraged Java's concurrency APIs to implement parallel task execution, reducing processing time by 65% for high-volume batch jobs and improving system throughput from 300 to 900 requests/second under peak load.

- **Cloud-Native Development & Deployment**

Containerized and deployed 15+ microservices using Docker and Kubernetes, reducing deployment time by 70% and enabling zero-downtime releases.

Managed Kubernetes clusters supporting 1M+ daily requests with 99.99% uptime and auto-scaling to handle traffic spikes during peak hours.

- **Version Control & Team Collaboration**

Led Git strategy and branching model implementation across 3 teams (15+ developers), reducing merge conflicts by 40% and accelerating release cycles by 25% for large-scale backend projects

Senior Software Developer – HCL Technologies Pvt. Ltd.

Sep 2014 - Oct 2016

- **QlikView Development:**

Developed interactive QlikView dashboards and custom jQuery plugins that improved real-time data visualization speed by 30%, enabling faster decision-making for 50+ business users.

- **Web Application Development:**

Designed and deployed responsive Spring MVC web applications with Ext JS and AngularJS, reducing page load time by 40% and increasing user engagement by 20% for over 10,000 monthly active users.

- **Collaboration & Communication:**

Facilitated agile collaboration across cross-functional teams of 8-12 members, improving sprint delivery success rate by 25% and enhancing alignment between business and technical teams.

Software Developer – Speroware Technologies Pvt Ltd

Apr 2011 - Aug 2014

- Designed and developed scalable, high-performance web applications over 3.5 years, serving 20,000+ monthly users using technologies like Spring MVC, MySQL, JSP, HTML5, jQuery, JSON, and AJAX.
- Built interactive, responsive user interfaces and backend logic, resulting in a 35% reduction in page load times.
- Integrated Google Protocol Buffers (protobuf) for data serialization, improving data transmission speed by 40% and reducing network latency.
- Developed RESTful APIs and optimized MySQL queries, leading to a 25% improvement in query response time and enhanced overall application throughput.
- Implemented asynchronous data processing and AJAX interactions, improving UI responsiveness and reducing user wait times by 20%.
- Collaborated with cross-functional teams of 8+ members to gather business requirements and deliver tailored solutions.
- Led efforts that increased customer satisfaction scores by 15% through effective feature delivery.
- Facilitated clear stakeholder communication, contributing to a 30% reduction in project delays.
- Applied Agile methodologies to consistently deliver projects on or ahead of schedule.

Education

B.Tech/B.E. | Electronics/Telecommunication

2010

Jawaharlal Nehru Technological University (JNTU)

Marks - 64%
