

R DESHPANDE

Senior Data Expert – Data Analyst & Data Modeler

📞 91 7887870020

✉️ radhikadeshpande99@gmail.com

📍 Pune, Maharashtra

EMPLOYMENT HISTORY

Senior Data Expert

TEKsystems

📅 11/2025 Present 📍 Pune

- Leading end-to-end data solutions across analytics, modeling, transformation, and reporting for enterprise clients.
- Architecting scalable data models, ETL pipelines, and Power BI reporting platforms enabling accurate, business-ready analytics.
- Delivering SQL, Python, PySpark and cloud-based data solutions that directly support strategic decision-making.
- Acting as trusted analytics partner to stakeholders, ensuring delivery quality, clarity, and governance consistency.

Senior Data Analyst

BARCLAYS GLOBAL SERVICES CENTRE

📅 10/2021 09/2025 📍 Pune

- Led advanced analytics initiatives that delivered **\$2M in measurable business impact** through efficiency gains, cost optimization, and revenue-enabling insights.
- Built and maintained **20 enterprise Power BI & Tableau dashboards** serving **200 business users**, reducing decision latency by **60%**.
- Designed and optimized Databricks-based ETL pipelines processing **5 TB of data monthly**, cutting transformation latency by **25%**.
- Created scalable Erwin data models across critical business functions, reducing query response times by **35%** and enabling selfservice analytics.
- Automated **30 reporting workflows**, saving **500 hours annually** and significantly improving analytics productivity and governance reliability.
- Delivered analytics leadership across **3 major business launches**, driving **\$1.2M in business impact**.
- Implemented Salesforce data automation and validation pipelines, improving data accuracy by **89%** and reducing QA workload by **75%**.
- Designed and implemented **data quality scorecards and control frameworks**, and improving data completeness across enterprise reporting.
- Partnered with business, risk, and technology stakeholders to **identify, investigate, and resolve complex data concerns**, reducing false positives and improving trust across reporting streams.
- Led root-cause data investigations using SQL and Python, enabling accurate understanding of pattern exceptions and influencing data reliability recommendations.
- Led **statistical and exploratory data analysis EDA** initiatives using Python to detect anomalies, identify risk patterns, and support governance-aligned decisioning — driving **15% efficiency improvement** and **\$800K in cost optimization**.

SUMMARY

Senior Data Analytics & Platform Engineer with 9 years of experience driving enterprise analytics, data governance, and reporting transformation across global Fintech and BFSI organisations. Proven expertise in architecting enterprise BI platforms, scalable ETL pipelines, and **statistical analytics frameworks for exploratory data analysis EDA , anomaly detection, and data risk identification**. Recognized for delivering multi-million-dollar business impact through automation, data quality controls, and compliance-aligned reporting solutions. A trusted cross-functional partner skilled in resolving complex data issues, strengthening regulatory readiness, and enabling faster, more reliable executive decision-making.

EDUCATION

Bachelor of Computer Engineering

NBN Sinhgad School of Engineering

📅 01/2012 01/2015

Diploma in Computer Engineering

Maharashtra Institute of Technology

📅 01/2008 01/2011

KEY ACHIEVEMENTS

\$2M business impact delivered

through enterprise analytics, automation, and platform modernization

500 analyst hours saved annually via

automation of reporting workflows

60% reduction in decision latency for senior leadership through enterprise BI platforms

89% Salesforce data accuracy improvement via automation pipelines

Barclays “Drive”, “Excellence”, and “Service” Value Awards

Managed NLP QA programs validating 1,000 scenarios improving chatbot accuracy by 22%

EMPLOYMENT HISTORY

ETL Data Engineer

BARCLAYS GLOBAL SERVICES CENTRE

📅 04/2017 09/2021 📍 Pune

- Owned and scaled **100 ETL workflows** processing **10 TB of data weekly**, improving pipeline throughput by **40%**.
- Led Hadoop-based enterprise data engineering architecture, tripling ingestion speed and improving downstream analytics readiness.
- Designed star and snowflake schemas supporting BI and data warehousing across **7 business departments**.
- Instituted enterprise data quality frameworks reducing reporting discrepancies by **65%**.
- Managed NLP chatbot QA, leading a **5-member team**, validating **1,000 conversational scenarios** and improving response accuracy by **22%**.
- Implemented metadata lineage and compliance traceability across **30 systems** supporting regulatory audits.

- Contributed to Agile delivery excellence achieving **98% preproduction defect resolution rate**.
- Implemented **metadata lineage and traceability frameworks** that improved audit readiness and compliance across 30 enterprise systems.
- Collaborated with cross-functional governance and risk teams to formalize **data control processes**, strengthening data reliability and downstream analytics accuracy.

Consulting Data QA Analyst

AXIS TECHNICAL GROUP

02/2016 08/2016 Pune

- Supported healthcare data platforms by implementing **data quality controls, SQL-based validations, and ETL verification processes**.
- Performed **root-cause analysis on recurring data integrity issues**, partnering with business and engineering teams to remediate systemic defects and improve reporting accuracy by **38%**.
- Optimized SQL workflows and validation logic, reducing query latency by **45%** and enabling faster availability of analytics outputs for decision-support systems.
- Contributed to **governance-aligned testing strategies** that reduced UAT failures by **50%**, improving delivery stability and confidence in production data assets.
- Established early **data control and validation frameworks** that laid the foundation for standardized QA practices across client reporting systems.

SKILLS

Analytics & Engineering: SQL, Python Pandas, NumPy), PySpark, Power BI, Tableau

Big Data & Cloud: Databricks, Hadoop, Hive, Google BigQuery, GCP

Modeling & Governance: Erwin Data Modeler, Dimensional Modeling, Metadata Lineage, Data Governance

Automation & Testing: SaaS/Cloud Testing, API/UI Automation, STLC, SIT, Regression Testing

Leadership & Delivery: Stakeholder Management, CrossFunctional Leadership, Agile & Waterfall, Team Leadership, Executive Communication

KEY ACHIEVEMENTS

Reduced recurring data discrepancies by **65%**

through proactive control frameworks and automated validation.

Implemented enterprise data quality processes

improving reporting completeness and timeliness for critical business functions.

Recognized for influencing cross-team data reliability improvements, reducing escalations and increasing confidence in executive reporting outputs.

PASSIONS

Curious Learner

Actively explore Fintech innovation, regulatory analytics, and cloud-native data engineering practices to stay aligned with emerging financial technology trends.

Mentoring Peers

Enjoy mentoring peers on SQL, Power BI, and Python-based analytics, and contributing to collaborative problem-solving within analytics communities.

SKILLS

Data Reliability & Risk Frameworks:Data Quality Controls, Data Lineage & Traceability, Root Cause Analysis, Data Risk Management

Technical & Analytical:SQL (advanced), Python for data analysis, Data Profiling, Data Validation & Scorecards

Cross-Functional Collaboration:Stakeholder Management, Cross-

Team Issue Resolution, Business Partnering, Communications & Reporting

Analytics & Data Science: Statistical Analysis, Exploratory Data
Analysis EDA , SQL, Python Pandas, NumPy), PySpark, Power
BI, Tableau

PASSIONS

Traveling

Enjoy exploring new cultures and gaining global perspectives.
