PROFESSIONAL SUMMARY

Senior Java Backend Developer with 6+ years of experience building scalable, high-performance enterprise applications using Java, Spring Boot, and Microservices architecture. Proven expertise in REST API development, event-driven systems with Apache Kafka, cloud-native deployments on AWS, CI/CD automation, and secure application design. Experienced across Banking, Healthcare, Retail, and E-commerce domains.

TECHNICAL SKILLS

Languages: Java 8/11, XML

Frameworks: Spring Boot, Spring MVC, Spring Security, Spring Cloud, Hibernate, JPA

Microservices: REST APIs, API Gateway, Config Server, Distributed Systems

Messaging: Apache Kafka, JMS

Cloud & DevOps: AWS (EC2, S3, CloudWatch), Docker, Jenkins, Git, PCF, IBM Cloud

Databases: MySQL, Oracle, Redis

Frontend: HTML, CSS, JavaScript, React JS

Testing: JUnit, Mockito

Tools: Maven, SonarQube, Splunk, Postman, Swagger, Slingshot (AI), Prompt Engineering

Security: OAuth2, JWT, Role-Based Access Control

Methodologies: Agile, Scrum, Waterfall

PROFESSIONAL EXPERIENCE

Publicis Sapient — Senior Java Developer (Sept 2025 – Present)

Project: E-Commerce Platform (US Client — Home Depot)

- Led migration of legacy monolithic applications to Spring Boot microservices architecture
- Improved application scalability and performance through cloud-native on AWS.

- Implemented secure authentication and authorization using Spring Security and OAuth2
- Utilized AI-assisted tools for code modernization and refactoring
- Contributed to CI/CD automation using Jenkins and Docker

IBM — Java Backend Developer (Dec 2022 – Sept 2025)

Project: TC-04 Mortgages (Barclays Bank)

- Designed and developed scalable backend microservices using Spring Boot and Spring Cloud
- Implemented API Gateway and centralized configuration management
- Integrated Apache Kafka for asynchronous event-driven communication
- Improved code quality using SonarQube and automated unit testing
- Supported CI/CD pipelines and deployment automation

Zensar Technologies Ltd — Java Developer (Dec 2021 – Dec 2022)

Project: CDAT HR Digital (Cisco)

- Developed backend modules using Spring MVC and Hibernate
- Implemented role-based authentication and OAuth2 security
- Built RESTful services for HR digital platform
- Created unit and integration tests using JUnit and Mockito

Legato Healthcare Technologies LLP — Software Engineer (May 2020 – Apr 2021)

Project: ICR Healthcare Platform (Anthem)

- Developed backend services for healthcare management applications
- Optimized database queries to improve system performance
- Supported production issue resolution and enhancements

Knack Systems & Services Pvt Ltd — Hybris Developer (May 2019 – Apr 2020)

Project: Retail Platform (GAP Client)

- Developed UI components using JSP, JavaScript, and Bootstrap

- Implemented authentication using Spring Security
- Integrated REST APIs with SAP systems

CERTIFICATIONS

AWS Certified Developer – Associate (Valid till Nov 2027)

Cloud Security Training — Siemens Pvt. Ltd. (2021)

EDUCATION

Bachelor of Engineering — Electronics & Communication Engineering

Rajeev Gandhi Technical University, Bhopal, India
