

R Sundar | Senior Technical Business Analyst | CSPO | PMP certified

 sundar94@gmail.com  +91 9659271186  www.linkedin.com/in/sundarravisankar/

Senior Business Analyst with 9+ years of experience working across digital transformation, payments and banking projects. I've gathered and clarified requirements, mapped end-to-end processes, and worked closely with product, engineering, testing, and operations teams to deliver clear, scalable solutions. I'm hands on with tools like JIRA, Confluence, and Power BI. I'm a certified SAFe Agilist, Certified Scrum Product Owner (CSPO) and a PMP practitioner.

PROFESSIONAL EXPERIENCE

Senior Technical Business Analyst, Platform Engineering, Elanco 01/2024 – Present

- Worked with engineering, product, QA, and security teams to gather requirements, define user stories, and translate platform needs into clear delivery plans.
- Led requirement workshops and process reviews for automation and developer experience initiatives, improving requirement clarity and reducing requirement rework by 40%.
- Mapped current vs. target processes and supported modernization efforts, contributing to cost savings of \$100K+ annually and reducing manual effort by 30%.
- Defined and validated non-functional requirements (scalability, performance, compliance) for cloud-based tools running on Azure and GCP, ensuring enterprise readiness.
- Built monitoring and reporting dashboards in Power BI and Tableau to track deployment frequency, cycle time, and environment usage—reducing provisioning delays by 25%.
- Supported release readiness, documentation, and governance activities to ensure predictable delivery across distributed teams in the US, UK, and APAC.

Senior Business analyst | Agile Lead, Societe Generale 02/2021 – 01/2024

- Led three Agile squads delivering improvements across digital workflows, reporting automation, and internal platforms—improving predictability and reducing sprint spillover by ~28%.
- Ran discovery workshops with business teams to gather requirements, refine scope, and create user stories, which reduced clarification loops and delays during build and testing.
- Improved data quality and validation logic for reporting and workflow automation, reducing manual review time by ~22% and improving accuracy of operational reporting.
- Contributed to solution design by analyzing integration rules, data flows, and system constraints, helping engineering teams estimate and deliver with fewer assumptions.
- Applied product and architectural concepts from platforms including Avaloq, Newgen BPM, Appian, and Pega to guide workflow configuration, onboarding logic, and automation rules.
- Coordinated UAT, regression testing, and release readiness using Jira, Confluence, and Zephyr, improving release quality and reducing last-minute issues by 35%.

Business analyst, Atos - Syntel 11/2016 – 01/2021

- Supported core banking programs at American Express across cards, payments, dispute handling, and merchant servicing, working closely with teams in the US and Europe.
- Gathered and translated business needs into BRDs, FRDs, user stories, and process flows for projects like card transaction processing improvements, chargeback workflow modernization, merchant settlement optimization, and fraud/risk monitoring.
- Worked closely with engineering teams to design system integrations across payment gateways, risk engines, settlement platforms, and dispute systems — improving data flow and reducing mapping-related defects in testing.
- Improved operational processes by documenting current vs. target workflows, identifying gaps, and simplifying steps, which reduced manual work and improved processing accuracy.
- Supported testing cycles by writing test cases, validating end-to-end scenarios, logging issues, and ensuring releases met business and regulatory expectations.

SKILLS

Business analysis and delivery: Requirement elicitation & validation, Business process modelling (AS-IS/TO-BE), End-to-end process mapping, Banking workflows (onboarding, payments, deposits, loans, investments), Risk & dependency tracking, OKRs, KPI-based delivery tracking, Cross-functional collaboration, Stakeholder alignment, Change control & governance reporting

Tools: JIRA, Confluence, Zephyr, ServiceNow, Power BI, Trello, Figma, Microsoft Office Suite, Visio, Pega

Technical Expertise: Avaloq, Azure, GCP, SQL, BigQuery, REST APIs, GitHub, Postman, Tableau, Cloud cost optimization, Observability frameworks, Finalce, Newgen BPM, Data mapping and migration

Documentation: BRDs, FSDs, Process Flows, Workflow Diagrams, API documentation, Mapping Documents, Release Notes

Delivery and Frameworks: Waterfall, Agile (Scrum, SAFe, Kanban), SDLC, Sprint ceremonies, Backlog management, Release readiness and go-live coordination, Regression/UAT/Test scenario support, Continuous improvement

EDUCATION

B.E. Electronics and Communication Engineering, Sri Eshwar college of engineering 2012 – 05/2016

CERTIFICATION

Certified SAFe Agilist (5.1) Practitioner • Certified Scrum Product Owner (CSPO)
