PROFESSIONAL SUMMARY

Results-oriented Business Analyst with 4+ years of experience across requirements documentation, QA coordination, change management, and stakeholder communication in Agile and hybrid delivery environments. Strong hands-on exposure to BRD, SRS, user stories, UAT planning, regression coordination, and production issue analysis. Experienced in client-facing roles requiring documentation discipline, traceability, and controlled change delivery.

CORE SKILLS

- Requirements Gathering (BRD, FRD, SRS)
- Manual Testing and QA Process
- Requirement Traceability Matrix
- Change Request and Impact Analysis
- User Stories and Acceptance Criteria
- UAT Planning and Execution
- Regression Testing and Release
- Client Stake Holder Management
- Root Cause Analysis

PROFESSIONAL EXPERIENCE

Technical Project Analyst

IQVIA | Sep 2023 – February 2026

- Act as a client-facing analyst for customization of IRT applications in global clinical trials.
- Own requirement clarification, documentation, and validation across IT, Business, and external stakeholders.
- Manage Software Change Requests (SCRs) including scope definition, feasibility checks, and impact analysis.
- Prepare and review UAT plans, scenarios, and test cases aligned with client-specific guidelines.
- Coordinate UAT execution, issue tracking, defect triage, and resolution with cross-functional teams.
- Validate fixes and enhancements to ensure release readiness and quality compliance.
- Support production issue analysis, documentation, and corrective actions.

- Develop training materials, SOPs, and user documentation for internal and external users.
- Maintain effective communication with internal teams and client stakeholders throughout delivery cycles.

Business Analyst

LOYLTWO3KS IT Pvt. Ltd. | Jul 2021 – Sep 2023

- Owned end-to-end requirement gathering for small to mid-scale product enhancements, bug fixes, and CRs.
- Created and maintained BRD, SRS, user stories, acceptance criteria, workflows, and validation rules.
- Conducted GAP analysis, feasibility studies, and detailed impact analysis before development start.
- Acted as the single point of contact between clients, product, QA, and development teams.
- Supported manual testing activities, reviewed test cases, and validated test results.
- Prepared release notes, user manuals, FAQs, and training documentation.
- Supported clients during production issues, performed RCA, and ensured resolution closure.
- Assisted in defining QA and documentation best practices within Agile (Scrum) framework and Waterfall methodologies.
