PROFESSIONAL EXPERIENCE

BNY Mellon International Operations

Oct 2025 – 29 Jul 2026

Financial Planning & Analysis Representative

- Managed budget tracking and utilization across three teams—Service Delivery, Infrastructure and Development—covering software, hardware and technology service spend.
- Supported the Procure-to-Pay process by creating and managing Purchase Orders while ensuring compliance with procurement policies and purchasing controls.
- Coordinated with Vendor Management and internal stakeholders for supplier onboarding, PO processing and timely procurement.
- Supported leadership teams on process enhancement, automation initiatives and control-strengthening programmes.
- Performed invoice coding and validation for 50+ invoices per month, ensuring accurate cost allocation and timely submission to Accounts Payable.
- Automated recurring financial reporting and management approval workflows using SharePoint, reducing manual effort by 60% and improving audit-documentation efficiency.

BNP Paribas Global Securities Operations Pvt. Ltd.

May 2022 – Oct 2025

Fund Accounting & Trade Settlement Analyst

- Managed the post-trade lifecycle from trade execution and CTM confirmation through settlement, reconciliation and exception resolution, with focus on downstream accounting and NAV impact across multiple asset classes.
- Performed trade confirmation and portfolio pricing across Asian and European markets using Bloomberg, Datascope and IDC, validating trade and pricing information before NAV finalization.
- Performed trade capture and validation through CTM, reviewing fund/account, security, quantity, price, trade date, settlement date, currency and counterparty details before downstream processing.
- Performed bulk trade uploads and pre-upload validation, reviewing trade files for completeness, accuracy and required trade attributes to minimize processing errors and STP breaks.
- Investigated and resolved STP breaks and unmatched trades relating to trade attributes, settlement information and SSI, coordinating with brokers, custodians and internal teams before NAV finalization.
- Validated and maintained Standing Settlement Instructions (SSI), identifying incorrect or missing settlement details and coordinating corrections to reduce settlement exceptions.
- Utilized TLM for reconciliation and exception management, investigating trade, cash and position breaks, performing root-cause analysis and coordinating resolution with stakeholders.
- Performed daily cash, securities and derivatives reconciliations with Asset Management, Accounting, Transfer Agents and Depositary Banks, covering IRS, FX Forwards, Options and Futures.
- Verified transactions across Equities, Bonds, Funds, Futures, Swaps, Options and Forwards, ensuring accurate accounting and downstream position and valuation reporting.
- Investigated pricing, valuation, accounting, cash and position breaks through exception management and root-cause analysis.
- Processed corporate actions including dividends, stock splits, mergers, interest accruals and other market events, ensuring accurate fund portfolio accounting.
- Performed portfolio valuation and management/performance fee calculations for European client portfolios in accordance with fund agreements and supported accurate NAV reporting.

- Supported derivative clearing activities and developed practical knowledge of clearing workflows and their downstream impact on trade processing and fund accounting.
- Worked with CDS product information and clearing workflows as part of derivative and fund accounting operations.
- Prepared KPI reports and supported audit-query resolution for Asian and European mutual fund clients, coordinating with the Client Account Management team for timely deliverables.

Key Achievements

- Reduced manual effort in Corporate Action validation by 60% during trade pricing by collaborating with technical teams to develop an internal automation tool.
- Demonstrated leadership in client onboarding, transition management, process migration and operational stabilization for high-priority initiatives.
- Developed an Excel macro for portfolio reconciliation by matching portfolio positions against custody files, reducing reconciliation time by 70%.
- Contributed to governance frameworks, operational controls, reporting standards and process documentation across multi-jurisdictional fund operations.
