ABOUT ME

Business Analyst with 10+ years across Market Risk, Risk Engineering, and Investment Banking Operations. Experienced in VaR/FRTB, validating end-to-end risk data flows, improving data quality, and strengthening reconciliations across asset classes.

Skilled in requirements gathering, gap analysis, BRD/FRD documentation, SQL-based DQ checks, and UAT in Agile environments. Strong collaboration with Risk, Technology, and Front Office teams to deliver accurate risk solutions.

WORK HISTORY

Risk Engineering- Market risk - Business analyst – Crisil, Chennai (May 2025 – Till date)

- Supported Market Risk architecture by validating data flow from upstream systems into the Risk Data Warehouse (RDW), ensuring accurate aggregation and seamless feed transmission to risk sign-off and back testing portals.
- Designed and implemented new reconciliations and data quality (DQ) checks using SQL to improve data integrity and support FRTB and Market Risk calculations.
- Assessed new products for market risk impact to identify required updates in product mapping, book mapping, risk factors, and DQ controls; maintained detailed records with defined closure timelines in portal.
- Led UAT and test management processes, including test case design, defect tracking, and production deployment, for Market Risk model and system changes.
- Performed validation and amendment testing for VaR and FRTB, verifying in-scope product feeds (Sensitivities, P&L Vectors, VaR data) and ensuring correct product flagging.
- Partnered with Technology, Market Risk, and Front Office teams to resolve data flow issues and support production stability across the Market risk ecosystem.

Market risk - Business Analyst – Barclays, Chennai – (June,2023 – May,2025)

- Managed project activities including requirement gathering, BRD/FRD documentation, interface and gap analysis, and solution design.
- Prepared and executed UAT test plans, analyzed defects, and ensured timely sign-off from Risk Managers before production release.
- Worked in an Agile environment, leveraging JIRA and Confluence for sprint planning, backlog tracking, and documentation. Actively participated in Scrum ceremonies (Sprint Planning, Daily Stand-ups, Reviews, and Retrospectives) to align deliverables, manage dependencies, and ensure timely completion of business requirements.
- Collaborated with Market Risk Operations, Risk Managers, and Developers to resolve production issues and support tactical and strategic changes.
- Delivered material growth initiatives across multiple asset classes.

EDUCATION

MBA Finance (2013–2015)

Pondicherry University, India

B.com (2010–2013)

Saradha Gangadharan College, India
