PROFESSIONAL SUMMARY

Markets operations professional with 3 years of experience across securities settlements, post-trade operations, exception management, reconciliations, operational controls, and corporate action income processing within global wealth management operations. Experienced in managing end-to-end settlement workflows across Equities, Fixed Income, Structured Products, and FX-related processes, investigating settlement fails and cash breaks, coordinating with custodians and brokers, and working to market deadlines and operational SLAs. Strong track record in root-cause analysis, risk mitigation, process improvement, and automation of repetitive operational workflows using Excel-based solutions. Experienced in supporting regulatory and market-driven change, including the US T+1 settlement transition.

CORE COMPETENCIES

Trade Lifecycle Controls | Securities Settlements | Exception & Fail Management | Cash & Position Reconciliations | Root-Cause Analysis | Operational Risk & Controls | KPI Monitoring | Custodian & Counterparty Management | Buy-In Risk Management | Corporate Actions | Process Automation | SWIFT Messaging | Advanced Excel | Stakeholder Management

PROFESSIONAL EXPERIENCE

Security Settlement Analyst, UBS Business Solutions | Jul 2023 – Present

Risky Markets – Equity & Fixed Income / Structured Products | Mar 2025 – Present

- Own daily settlement controls across multiple European and emerging markets, monitoring trade status, pre-matching exceptions, settlement instruction mismatches, market deadlines, and aged fails to support timely settlement and reduce operational risk.
- Investigate and resolve settlement exceptions involving trade economics, pricing, settlement instructions, counterparty mismatches, and internal processing issues; perform root-cause analysis and coordinate corrective actions with internal teams and external parties.
- Perform daily cash reconciliations between internal books and custodian records, investigate breaks and missing cash flows, and drive exceptions through timely resolution.
- Monitor potential buy-in exposure and fail risk, applying market-specific timelines, notice periods, and escalation requirements to prevent avoidable costs and client impact.
- Coordinate with custodians, brokers, middle office, risk, and other stakeholders to resolve high-priority settlement issues and improve operational outcomes.
- Track operational queues and exception ageing against deadlines and SLAs, prioritizing high-value, client-critical, and market-cutoff-sensitive items.

Fixed Income & Structured Product Settlements – Clearstream, DTC/Fed and German Market | Nov 2023 – Feb 2025

- Managed end-to-end post-trade settlement workflows, including pre-matching, instruction validation, settlement monitoring, fail investigation, exception resolution, and escalation across domestic and international markets.
- Used SWIFT and market/custodian information to investigate trade and settlement discrepancies, liaising with brokers and custodians to resolve breaks and support value-date settlement.
- Investigated failed trades, identified underlying causes, coordinated remediation, and implemented preventive controls to reduce recurring settlement issues and financial exposure.
- Supported the 2024 US market transition from T+2 to T+1 by adapting operational monitoring and settlement processes to compressed timelines and heightened exception-management requirements.
- Identified repetitive manual activities and developed automation solutions for pre-matching notifications, settlement queue monitoring, email categorization, urgent-item flagging, and turnaround-time reporting.
- Improved workflow efficiency and settlement turnaround through process enhancements while maintaining records of settlements, reconciliations, exceptions, and escalations for control and audit requirements.

Corporate Action Income Processing | Jul 2023 – Oct 2023

- Created and validated corporate action income events and supported accurate processing of dividends, interest, and redemption payments in line with market standards and internal controls.

- Performed control checks over event setup and payment processing, investigated discrepancies, and used SWIFT messaging to support timely and accurate cash-flow processing.

SELECTED PROCESS IMPROVEMENT & CHANGE EXPERIENCE

- Developed automation for counterparty pre-matching outreach and settlement queue monitoring, reducing repetitive manual activity and improving visibility of pending and urgent trades.
- Built an Outlook-integrated email categorization and TAT-monitoring workflow to classify counterparty and custodian queries, flag urgent cases, and support management reporting on response times.
- Automated elements of an Israel-market capital-gains-tax cash reconciliation process, including calculation support and MT599-related operational messaging after settlement.
- Contributed to market-structure change initiatives and settlement process improvements, with practical experience adapting controls and workflows for compressed settlement cycles.

TECHNICAL SKILLS

Securities Settlement | Trade Lifecycle Management | Fail Resolution | Reconciliations | Corporate Actions | SWIFT | Microsoft Excel (VLOOKUP, Pivot Tables, Reconciliation Analysis) | Microsoft Office | Operational Reporting | Custodian & Counterparty Coordination

EDUCATION

Lovely Professional University, Punjab | Integrated MBA – Corporate Banking & Financial Modelling | Aug 2020 – May 2024
