Objective

Data professional with a strong passion for solving complex data problems at scale. Over 5+ years of experience in Data Governance, Data Analysis, and Data Analytics, with a proven ability to interpret and analyze data to drive impactful business solutions. Experienced in supporting product feature enhancements through data insights, leveraging data visualization and advanced analytical tools. Demonstrates a strong interest in large-scale applications and actively seeks opportunities to work on projects that adopt and implement emerging technologies.

Experience

- WNS Global Services**

01-2025 - 04-2026

Lead associate collibra developer (DG)

 - Led enterprise data governance and metadata management initiatives using Collibra Data Intelligence Cloud, supporting cataloging, lineage, stewardship, and compliance.
 - Configured and managed Collibra Data Catalog to enable data discovery, transparency, and trust for business and technical users.
 - Integrated SQL Server and relational databases with Collibra using built-in connectors and REST APIs for automated metadata ingestion and synchronization.
 - Created and governed Collibra assets including databases, schemas, tables, columns, datasets, reports, KPIs, reference data, and business terms.
 - Designed and managed Communities and Domains aligned with the enterprise data governance operating model, including stewardship roles and RACI.
 - Built and maintained Business Glossary and Data Dictionary, ensuring standardized definitions across business and technical teams.
 - Implemented Data Quality management with rules, checks, scorecards, issue workflows, and dashboards to monitor and improve data health.
 - Enabled end-to-end lineage and impact analysis, catalog curation (classification, tagging, ownership, certification), regulatory compliance, and user adoption through training and documentation.
 - Implemented Edge connections to extract and integrate data from multiple data sources.

- Edgerock Software Solutions Pvt. Ltd**

03-2022 - 12-2024

Collibra Developer (Associate Data Governance)

 - Designed and managed Collibra Communities, Sub-Communities, and Domains aligned with enterprise data governance structures.
 - Created and governed Business and Technology Assets, establishing relationships across datasets, applications, systems, and processes to support lineage and impact analysis.
 - Configured, tested, and maintained Collibra workflows (Retention, Sample, Obsolete) using Eclipse and BPMN.
 - Supported metadata loading, automation, and integration using the Collibra Operating Model and REST APIs.
 - Implemented reference data and hierarchy management, performed data validation and cleansing, and collaborated with Erwin for metadata modelling and governance alignment.

- **Edgerock Software Solutions Pvt. Ltd**

08-2020 - 03-2022

Data Analyst

- Acquired and integrated data from primary and secondary sources across multiple user interfaces and databases.
- Applied data analytics to optimize business processes and improve operational efficiency.
- Partnered with business and sales leaders to analyze data and deliver actionable insights through reports and dashboards.
- Analyzed end-to-end workflow data to identify pain points and recommend improvements to enhance customer experience.
- Owned end-to-end dashboarding, analytics, and reporting, collaborating with cross-functional teams and handling client requirements.

Skills
