Bangalore, Karnataka.

Technical Skills

- **Frontend:** Angular, HTML5, CSS3, JavaScript, TypeScript, Bootstrap.
- **Backend:** Spring Boot, Java 8, RESTful Web Services, Microservices, REST APIs, Design Patterns.
- **Databases:** MySQL, MSSQL, MongoDB.
- **Tools/Platforms:** Git, GitHub, Jenkins, JIRA, IntelliJ IDEA, Eclipse, VS Code, Kafka, Docker, Postman, Insomnia
- **Others:** Agile/Scrum methodologies, Unit Testing, CI/CD

Core Components

- Software Development Lifecycle (SDLC).
- Troubleshooting and Resolving Technical issues.
- Requirement Gathering & Analysis.
- Interpersonal Skills.
- Project Management and Coordination

Achievements

- Felicitated with the Unsung Hero Award of Recognition and Appreciation - Apr 2023

Soft Skills

- Problem Solving, Time Management Skills
- Collaboration / Teamwork Skills
- Accountability, Leadership, Work ethic

Education

- **Bachelor of Engineering (BE) - Computer Science and Engineering** | C.Byregowda institute of technology, Kolar, Karnadaka | 2018 - 2022

Personal Details

- **Date of Birth:** 16th July 2000
- **Languages Known:** English, Kannada, Hindi & Telugu.
- **Address:** Bangalore- 560087, Karnataka, India

Profile Summary

Full Stack Java Developer with 3 years of experience building robust, scalable web applications using Angular, Spring Boot, and MySQL. Proven ability to design and integrate RESTful APIs, optimize SQL queries, and implement CI/CD pipelines for high-performance deployments. Skilled in Agile methodologies, with hands-on experience in sprint planning, code reviews, and cross-functional collaboration. Adept at solving real-world technical challenges including global search functionality, messaging systems, and performance tuning. Known for delivering clean, maintainable code and driving continuous improvement across systems and processes.

Experience

Professional Experience

Dec 2022 - Present | Digital Harbor, Inc., Bangalore | Software Engineer
Roles & Responsibilities

- Designed and implemented a **microservice-based** system with **Java 8, Spring Framework, Spring Boot, Angular, RESTful API, MySQL**, increasing user engagement by 40%.
- Collaborated with **cross-functional teams** to meet evolving project requirements.
- Developed a reliable **Messaging system** with metadata and guaranteed delivery using queues and acknowledgments.
- **Code Quality & Collaboration:** Conducted detailed code reviews to maintain high software quality standards and collaborated with cross-functional teams to align technical efforts with evolving business goals.
- Optimized end-to-end application performance by profiling and resolving backend bottlenecks (**slow queries, high CPU usage**) and enhancing frontend load times through efficient state management, **lazy loading**, and minimized **API payloads**—resulting in faster response times and smoother user experience

Projects

Know Your Provider 4.0 - CA & NM States
Description, Key Features & Contributions

Dec 2022 - Present

- **Description:** The **Know Your Provider (KYP)** platform is a comprehensive solution designed for Medicaid provider enrollment and compliance monitoring. The platform enables healthcare organizations and government agencies to verify the credentials, licensing, and compliance of Medicaid providers. The primary goal is to streamline the provider enrollment process while ensuring continuous monitoring for regulatory compliance
- **Provider Enrollment Workflow:** Developed and optimized the end-to-end Medicaid provider enrollment process, including data verification, document submission, and approval workflows
- **Global Search System:** Integrated a high-performance global search platform across multiple applications, improving search efficiency and user experience.
- **Messaging Infrastructure:** Developed a robust messaging system with guaranteed delivery, supporting metadata for message integrity.
- **Performance Optimization:** Enhanced backend performance, reducing response times by 30% and improving system efficiency
- **Caching & Data Integrity:** Implemented caching strategies and data integrity solutions to maintain performance under high traffic
- Collaborated with **Portal teams** from **Bolivia, QA teams, and PMG** teams to understand and exceed their expectations.
- Developed a more efficient and **user-friendly system**.
