

RAM VERMA

SUMMARY

Over 9 years of experience in the IT industry, with strong expertise as a Technical Lead in US Healthcare application support, specializing in RIS, PACS, and imaging integrations. Delivered L2/L3 production support across radiology environments using UNIX-based servers, log analysis, and monitoring to ensure high availability. Strong hands-on experience with PACS platforms, DICOM workflows, image routing, and viewer access. Skilled in HL7 interface troubleshooting using Cloverleaf and SQL queries to analyze orders, studies, and interface issues for faster incident resolution and RCA. Experienced in incident management, SLA adherence, and vendor coordination while ensuring HIPAA-compliant data security.

EXPERIENCE

Delivery Senior Specialist, 7/2026-current
NTT Data

- Provided technical and functional expertise for US healthcare applications, supporting end-to-end healthcare delivery workflows and business operations.
- Managed L2/L3 production support activities, ensuring timely resolution of incidents, service requests, and application issues within defined SLAs.
- Analyzed healthcare workflows, system integrations, and data flows across RIS, PACS, EHR/EMR, HL7, and other healthcare platforms.
- Collaborated with clients, business stakeholders, product teams, and technical teams to identify requirements, resolve issues, and deliver effective solutions.
- Performed root cause analysis and impact assessment for critical production issues while driving preventive and corrective actions.
- Supported process improvements, knowledge management, compliance initiatives, and continuous service enhancements across healthcare technology solutions.

Technical Lead, 06/2026 - 07/2026
Infinite Computer Solution

- Led L2/L3 production support teams, ensuring high availability and timely resolution of critical healthcare application incidents.
- Provided technical leadership for RIS/PACS applications, HL7 interfaces, databases, and healthcare system integrations.
- Managed incident, problem, change, and release activities while ensuring adherence to SLA and operational standards.
- Performed root cause analysis, troubleshooting, and performance optimization to minimize recurring production issues and downtime.
- Collaborated with cross-functional teams, business stakeholders, vendors, and infrastructure teams to drive technical solutions and successful implementations.

TECHNICAL SKILLS

- HL7
- PACS
- RIS
- UNIX
- Cloverleaf
- EPIC
- Sybase
- SQL Server Management Studio
- Putty
- Vagrant
- Tomcat
- Service Now
- Control-M
- Splunk
- Bash Scripting
- Jira
- GIT
- Loggly
- BMC Remedy
- Python

- Mentored team members, conducted knowledge-sharing sessions, improved support processes, and drove automation and continuous service improvement.
- Performed troubleshooting and production support for .NET-based applications, analyzing application errors, logs, database issues, and system performance to identify root causes and resolve incidents efficiently.

Technical Lead, 05/2022 - 06/2026

CitiusTech

- hands-on experience in Healthcare Interoperability, supporting data exchange across US healthcare systems.
- Strong experience with HL7 v2 messaging (ADT, ORM, ORU), including message analysis, acknowledgements, and data mapping.
- Worked with CCDA clinical documents for exchange of patient demographics, orders, results, and clinical summaries.
- Working knowledge of FHIR resources and REST APIs (Patient, Encounter, Observation, Diagnostic Report).
- Experience using Cloverleaf Integration Engine to monitor, troubleshoot, and support healthcare interfaces.
- Exposure to US healthcare data models and workflows, including patient registration, scheduling, orders, results, and clinical documentation.
- Independently troubleshoot production interoperability issues, resolving message failures, data discrepancies, and interface outages.
- Performed root cause analysis (RCA) using integration engine logs, application logs, and system diagnostics.
- Used SQL queries to analyze backend healthcare data and validate clinical transactions.
- Applied basic scripting/programming skills (shell scripting) to support automation and troubleshooting tasks.

Software Engineer, 02/2021 - 05/2022

Qwikilver Solutions

- Provided L2 production support for business-critical applications, ensuring system stability and timely issue resolution.
- Monitored application and process alerts, proactively identifying and resolving incidents to minimize downtime.
- Developed and executed SQL queries/scripts to investigate and resolve database-related issues reported by users.
- Supported application deployments, coordinating activities and validating successful releases.
- Performed post-deployment functional testing to ensure application stability and expected behavior.
- Analyzed application and system logs to diagnose issues, perform root cause analysis, and support permanent fixes.

Application Administrator, 07/2018 - 02/2021

IPsoft Global services

- Working experience in rotational shifts and L1 Production support
- Working as Production Support, attending production calls, troubleshooting the application and resolving bugs at L1 and L2 level
- Writing SQL for ad hoc and monthly reports requested by upper management or users
- Working and Used UNIX shell scripts to automate repetitive task
- Work with QA, Release Management and DEV and BA teams to ensure Quality Rollouts in weekend deployment
- Interaction with the business users collected the requirements, analyze the

requirements, design and recommend solutions

- Developed SQL and Sybase scripts to resolve issues reported by users for application databases
- Automation to frequently requested reports by clients via SSRS
- Debugging/Enhancement to SSIS packages in case of Production issues
- Monitoring and working on control-M Jobs running in Production environment
- Providing root cause analysis of reoccurring issues
- Handling all the escalations related to applications and communicating with multiple teams to get the issue resolved
- Moody's Ratings Operations production enhancement and maintenance
- Databases: Oracle 10g, Sybase, Sql Server 2008, SSRS
- Scripting Languages: PL-SQL, T-SQL, UNIX Shell Scripting
- Role: Application production enhancement L1 engineer

Intern

- During my internship, I was involved in managing the intranet website and development of IMS Web application (developed using Java, Angular JS, Servlet, SQL Server) and all IS related work
